PREFACE

This quinmester course is designed as a guide to develop the understanding of the advanced student in cooking and baking. It focuses especially on that student who has the potential for managerial occupations.

The student must have successfully completed Receiving and Storing Occupations (9193.23) before entering this course. The course is 90 hours in length and consists of 10 blocks of instruction which are further subdivided into several units each.

It is designed to teach effective management and control of that area of a food service establishment commonly called the "back of the house." Emphasis is placed on labor control, supplies, utilities, laundry, uniform, equipment repair, replacement and depreciation, departmental relations and effective sanitation practices. Butchering and carving are also discussed.

The student will learn through lectures, group discussions, individual assignments, resource persons, research, audiovisuals and practical experiences.

This outline was developed through the cooperative efforts of the instructional and supervisory personnel, the Quinmester Advisory Committee and the Vocational Curriculum Materials Service, and has been approved by the Dade County Vocational Curriculum Committee.

THE MANAGEMENT PROCESS

DESIRED RESULTS AND OBJECTIVES:

- To acquaint the student with some of the decisions required to be made in managerial positions.

EXAMPLES OF THREE KINDS OF DECISIONS

First-Level (broad decisions)	Second-Level (operating decisions)	Third-Level (performance decisions)
Location	Kind of detergent to buy	When to remove a ham-burger from the griddle
Sanitation standards	Applicant's qualifications	How to make a soft-serve cone with a twist at the top
Menu	Inspecting deliveries	How to slice an onion
Personnel policy	Checking ad results	How to mop a floor
Food quality standards	Whether to fill in for absent employee	When to mop a floor
Advertising and promotion policy	Number of portions to produce	When to call a purveyor
Manager's role		
Rate structure		

Unconscious Factors Affecting Decisions

It is also helpful in thinking about decision-making to recognize the influence of unconscious factors. All of us make important decisions without being completely aware of the influences which directed them. The following chart illustrates how the unconscious mind interacts with the conscious mind in making a decision.

EXAMPLE OF THE DECISION-MAKING PROCESS

- The Problem: Is a particular location good for a restaurant?
- The Decision: "Yes" or "No"

CRUST OF RELUCTANCE TO RISK MAKING AN IMPORTANT DECISION

Conscious Level	Automobile traffic Pedestrian traffic	Drainage features Size of lot	Competition	Cost of lot Speed zone
Unconscious Level	Past experience with similar sites	Likes and dislikes for the neighborhood	Health of the person making the decision	How the site affects the person's picture of himself and his need for status and success

Mentally follow a cook through the preparation of an item which is frequently on the menu, for example, macaroni (Fig. 1).
