ABSTRACT

The major purpose of the Georgia State Module was to demonstrate and investigate effective recruiting methods for Adult Basic Education (ABE) classes in the Appalachian Region of Georgia. In order to better understand the strengths and limitations of recruiters with differing backgrounds, this project utilized college students, lay persons, volunteers and Adult Basic Education teachers as recruiters. It was found that of the recruiting groups those who were responsible for the implementation of the program had the greatest retention. The college student recruiter was not successful in dealing with this population. Better than 80% of those students enrolled by the ABE teacher-aide recruiter and/or the ABE teacher recruiters remained in the program. The increase in local and state interest is apparent by the expressed desire to expand the program by the increase of materials and by their active participation in the program as consultants. The participants in ABE classes in the target area numbered 89 in FY 68, 199 in FY 69, and 608 in FY 70. Thus, the number of participants in the classes has increased by threefold. (Author/CK)

ABSTRACT
Georgia State Module
Adult Basic Education Recruitment Research Program

The major purpose of the Georgia State Module was to demonstrate and investigate effective recruiting methods for Adult Basic Education classes in the Appalachian Region of Georgia.

In order to better understand the strengths and limitations of recruiters with differing backgrounds this project utilized college students, lay persons, volunteers and Adult Basic Education teachers as recruiters. All of the recruiters participated in orientation and in-service sessions. These sessions included information concerning characteristics of the underestimated adult and basic interpersonal skills and human relations.

It was found that of the recruiting groups those who were responsible for the implementation of the program had the greatest retention. The college student recruiter was not successful in dealing with this population. Better than eighty percent (80%) of those students enrolled by the ABE teacher-aide recruiter and/or the ABE teacher recruiters remained in the program.

The increase in local and state interest is apparent by the expressed desire to expand the program by the increase of materials and by their active participation in the program as consultants.

The participants in ABE classes in the target area numbered eighty-nine (89) in FY 68; one hundred ninety-nine (199) in FY 69; and six hundred eight (608) in FY 70. Thus, the number of participants in the ABE classes has increased by threefold.

FINAL REPORT
Georgia State Module
Adult Basic Education Recruitment Research Program

INTRODUCTION

The Georgia State Module of the Adult Basic Education Recruitment Research Program started in September of 1967 as a pilot project with Towns County being the only participant. In October of 1968 Banks, Habersham, Rabun, Stephens, Union and White Counties and the City of Gainesville became associated through their Boards of Education. During 1969 Gainesville withdrew from the program and Franklin, Hall and Pickens Counties became participants. This resulted in a total of ten (10) Appalachian Counties with a target population of some 37,000 being active, continuing participants.

The major purpose of this project was to investigate ways in which intervention into the lives of poor and illiterate adults might break the ongoing Appalachian poverty cycle.

To achieve this purpose, the technique of using trained personnel from differing social backgrounds was utilized. The recruiters were selected, instructed and placed in areas where the reduction of illiteracy is dependent upon intensive and continuous recruitment of the target population.

The concept that active intervention is necessary if the existing life styles are to be changed is generally accepted by adult educators and by

educators at large. However, there is a considerable empirical and theoretical gap between the generalization and the systematic implementation of techniques and procedures to foster continuous participation. For example, the nature of the experiences which foster personal behaviors conducive to getting others involved in ABE programs and their relationship to later human involvement is not fully understood. The interplay of external planning and family climate is not clear. In addition there remains the question of techniques for getting the underdeveloped person to utilize the resources available to improve his own opportunities for self-fulfillment. In other words, how do recruiters and adult educators interest poor people in acquiring the skills necessary to live in ways different than their present life patterns?

Recruiting techniques are not, then, the simple acts of adopting or adapting a program of speech. It is, on the other hand, a process of determining the interaction of the recruiter and the "recruitee" and of the total supporting resources of the community. The recruiter must understand the situation as the "recruitee" sees it and he must be able to communicate his own feelings and concerns in an empathic way to the potential participant. The poor adult must, in other words, see the opportunities as relevant and possible for him. He must see the probability that the program will make a difference in his life, and that the difference made will be those desirable to him. He must see himself as being able to become totally involved in today's complex society, and,

perhaps of more importance, he must see a need for becoming involved.

Recruitment of adults for educational programs is the most difficult of all administrative tasks, and yet it is obvious that without adequate recruitment we cannot change the life styles of the underestimated and underdeveloped adult. It is furthermore apparent that since parents are the most influential of all teachers and that young children tend to adopt the life styles of their parents that this poverty cycle will continue until adult behavior is changed. Adult education is necessary — yet without personal recruitment those at the lowest level of poverty are usually not reached.

OBJECTIVES

The major objective of the Georgia State Module of the Appalachian Adult Basic Education Demonstration Center has been to develop effective procedures for the recruitment and retention of Adult Basic Education students. The resources of National (Appalachian Adult Basic Education Demonstration Center), State (Adult Education Unit of the Georgia State Department of Education) and Local (local school boards, business and civic organizations) Agencies have been coordinated in this recruitment effort.

The specific objectives as stated were:

1. To develop a training program for Adult Basic Education recruiters and Adult Basic Education teachers (and to provide extensive and intensive In-Service Education programs to indigenous lay recruiters).

During the development phase of this project three (3) types of training have been used for the Adult Basic Education recruiters and teachers. These three (3) types are: individual pre-service and in-service, local systems small group pre-service and in-service, and multi-system in-service. As new recruiters and teachers joined the program, the director and/or consultants from the State Department of Education and the University of Georgia met with them for an orientation program. The extent of this program varied with the particular needs of the person and ranged from one (1) hour to six (6) hours

with a mean of three (3) hours. This orientation was carried out through the cooperation of the local school system with a local person usually participating in the pre-service and later in-service training.

Three (3) multi-system In-Service Workshops have been held during this project. Representatives from the ten (10) counties participated with a total involvement of approximately one hundred fifty (150) persons. The participants indicated a preference for small group sessions assisting in better ways to individualize interaction and instruction.

Thirty-six (36) individual county small group meetings have been held for orientation, instruction and evaluation. These meetings included specific help from State Department and University consultants with specific emphasis placed on requests and needs of the specific groups. For example, the director and consultants observed the teacher-class interaction and then worked with the teachers and the adult students in human relations and self-understandings. These group sessions suggest that contrary to some research the culturally underestimated may not be lacking in motivation. They may not be lazy or shiftless, but are victims of not having the understandings about self and the skills necessary to cope. They do not, in other words, see hope and possibilities for themselves - - - they are poor of spirit, which may be more crucial than poor of purse. More of this small group work is needed in the future as we seek ways to reach the poor.

In addition the director has met with individual recruiters and adult basic educators as the need arose. One hundred twenty nine (129) individual sessions were held for the purpose of evaluating and redirecting the activities of the recruiters and teachers.

It is hoped that as the teachers and recruiters become more expert that the number of director contacts can be cut down with the teachers and recruiters assisting each other. These initial meetings are necessary as new recruiters and teachers learn to understand themselves and the adults with whom they are to work.

Additional information concerning these sessions can be found in the Appendix.

of Workshops

Table I - Pre-Service and In-Service Training Sessions

2. To compare the effectiveness of various types of recruiters.

Since September of 1969, nine hundred eighty-two (982) contacts have been made by the recruiters of this project. Of these two hundred seventy-one (271) or twenty-eight percent (28%) have enrolled in the Adult Basic Education programs.

See Appendix:

Table II - Adult Basic Education Recruitment Summary

Table III - Comparison of Recruiting Methods in Each
County

Table IV - Characteristics of Recruiters in Relation
to Number of Contacts and Enrollment of ABE
Students

An analysis of the recruiting data shows:

- (1) Five (5) ABE Teacher Recruiters made one hundred twenty-three (123) contacts. Of these, seventy (70) or fifty-seven percent (57%) enrolled in the ABE classes.
- (2) Four (4) public school teacher recruiters made sixty-eight (68) contacts, of whom twelve (12) or eighteen percent (18%) enrolled.
- (3) Seven (7) Lay Recruiters made two hundred thirty-eight (238) contacts enrolling sixty-six (66) or twenty-eight percent (28%).
- (4) One (1) Lay Teacher Aide Recruiter made ninety-three (93) contacts and enrolled fifty-nine (59) or sixty-three percent (63%).

- (5) One (1) Lay ABE Student Recruiter made four hundred thirty-four (434) contacts and enrolled sixty-four (64) or fifteen percent (15%).
- (6) One (1) College Student Recruiter made twenty-six (26) contacts, but none of them enrolled.

3. To determine the relationship between types of recruiters and retention in program.

These data reveal that those persons actively involved in the continuing educational program (in this case the ABE teachers and ABE teacher-aide) were more successful in the recruitment than were those who were not. The College Student was unsuccessful in recruiting in this population.

Table VII (see Appendix) reveals that of the six hundred eight (608) enrolled, paid recruiters enrolled three hundred three (303) or fifty percent (50%). Volunteers and mass media enrolled only twenty-four percent (24%), whereas other personal contact (in this case institutional and vocational school personnel) accounted for twenty-six percent (26%).

Examination of data in Tables II, III and IV (see Appendix) shows that the holding power of the ABE teacher aide recruiter and ABE teacher recruiter is also higher than any other group. Of the one hundred twenty-nine (129) enrolled by this group eighty-seven percent (87%) have remained in the program.

The lay recruiters enrolled sixty-six (66) persons and with follow-up efforts had a retention record of seventy-seven percent (77%). Of the twelve (12) persons enrolled by public school teachers forty-eight percent (48%) have remained in the program. Of those persons recruited by the lay ABE student recruiter seventy-four percent (74%) have remained in the program.

These data reveal, then, that those persons who were more personally involved with and responsible for the success of the individuals involved had a higher retention rate. From these data one might postulate that when a person is responsible for involving a person in a program of which he is responsible he will be concerned with finding ways to make the program significant to the individual. It may be that in our society those persons who are reimbursed for their services feel a deeper sense of involvement than those who are not.

- 4 & 5. To develop and utilize recruiter "log books" and to improve the recruiting program through an analysis of the recruiter "logs".

Examination of Attachment C in the Appendix gives some descriptive data concerning the nature of employment, educational background and reasons for interest in the ABE programs.

Of those attending the ABE program less than ten percent (10%) were unemployed. They were primarily in the eighteen (18) - forty-five (45) year age bracket and had an average income of three (3) - four (4) thousand dollars

annually. A majority of the participants were married with approximately fifty-five percent (55%) female and forty-five percent (45%) male. Factories in the communities provided employment for the largest number of participants with the largest number stating a reason for attending as being that of self-improvement. The logs further reveal that most of the participants in the ABE program had reached junior high but had not gone beyond the eleventh (11th) grade level. Actual performance data indicates that they do not perform at junior high level, but they had attended school for that period of time.

The development and utilization of recruiter and teacher logs have not been as extensive as it should have been. This was partly due to the lack of adequate staff but was also due to the exploration of ways to utilize the data and to find the kinds of data needed. For example, it was decided that additional data concerning how one felt about himself, his peers, and the educational setting should be a part of the log. In the future the log will need to be expanded to include not only pre and post information but systematic changes in cognitive and affective behaviors.

The log will, in effect, become a tool for curriculum revision and redirection. It will serve as a continuing evaluation and feed forward tool in the overall program.

6 & 7. To provide instructional skills to indigenous lay recruiters and to use some of the local recruiters in individual instruction.

These objectives have not been met as effectively as had been hoped. The two (2) major reasons for this were the lack of program staff for adequate training and, therefore, the lack of adequate opportunities for the isolated "hard-core" families and the inability to identify and recruit (due to the lack of staff) indigenous lay recruiters.

Efforts in this direction have been made and these objectives will carry major importance in future programs in this area. In two (2) counties the ABE teacher-recruiter has given time to visit families and to find ways to assist with home instruction. They have been well received and currently plans for intensive program planning and implementation of such progress are underway.

In addition each of the work-study sessions (workshops) have included ways to work with the underestimated adult and ways to individualize instruction to meet the person's peculiar needs and expectations.

See Appendix:

Attachments D - In-Service for ABE Teachers

Georgia ETV Network

8. To continue recruiting for regular classroom programs of Adult Basic Education.

If the poverty cycle is to be broken in Appalachia, recruitment is the necessary ingredient. Research has shown that those who need to come to programs often do not, and of those who start a large percentage drop out. The Georgia Recruitment Program continues to support the fact that efforts to reduce illiteracy are primarily dependent upon intensive and continuous recruitment. The results of the project also suggest that the particular kind of recruitment is dependent upon the particular situation. Each area and indeed perhaps each person differs in the kinds of communication which is most effective. It is, therefore, necessary that the recruiter have intensive training in interpersonal skills and human understandings. The recruiter must understand his own purpose in order to understand the needs and desires of other complex human beings. He must understand the unique ways in which man utilizes his available resources, and how he defends himself against those facets of the environment which may be anxiety provoking or threatening to him.

The director of this project is continuously working with recruiters and teachers in finding ways to more effectively and efficiently develop and utilize human capabilities. The results of these efforts have been seen in the formation of ten (10) new classes and an increase in ABE programs by local school officials.

In the recruiting the director has solicited the services of mass media, VISTA volunteers, church and civic organizations, business leaders and community leaders as well as paid recruiters.

9. To maintain achievement records on each adult enrolled so comparisons between groups and techniques can be made regarding relative achievement.

Cumulative, comprehensive folders have now been set up for each student in this project. These data include informal reading inventories, a few standardized tests on some, logs, teacher made tests, student work samples, etc. The data acquired to date, however, is not sufficient to adequately assess this objective.

There are many reasons for this objective not having been met. A major reason is the lack of previous planning as to the nature of data to be collected and a systematic way to collect the data. Another major reason, and perhaps a more important one, is the observed fact that these people are often threatened when any kind of test data is required. Initial testing is probably not accurate due to these fears and anxieties. It may be that some of the adults are threatened enough not to return when tests are given during the first few sessions. It seems that a more realistic assessment for these adults may be actual behavior assessment (performance) through systematic

observation techniques. That is to say, techniques designed to have the person approach his level of competency in real life situations may be a more accurate way to assess these persons who have had years of unsuccessful educational and life experiences.

10. To assess the views adults in ABE classes hold about themselves and their abilities.

The adults in this project were administered the "How I See Myself Scale" developed by Ira Gordon and standardized by Pearline Yeatts.

A factorial analysis of the data revealed six (6) factors. The factors are: (1) Interpersonal; (2) Physical; (3) Teacher-School; (4) Academic; (5) Emotions; (6) Autonomy. It further showed that all the ABE students, including those who had been participants in the program for one (1) year, saw themselves as less adequate than do middle class adults on all factors.

On all factors of the Self-Concept the males felt less adequate than females. Those who had been in the program for one (1) year felt more adequate in all factors except autonomy and physical adequacy.

The white members saw themselves as being more adequate on the interpersonal and autonomy factors than did their negro counterparts. However, the blacks saw themselves more positive in the areas of (1) teacher-school, (2) physical appearance, (4) academic adequacy, and (5) emotions. The boys in the

Correctional Institution saw themselves more adequate in all factors than did any other group.

It may be that the blacks see themselves in a more positive way due to cultural expectations. For example, dropping out of school is more often accepted in the black community and, therefore, they are as adequate as their associates. Perhaps the fact that whites have, in the past, been able to initiate conversation with both whites and blacks account for their feeling of greater interpersonal adequacy. It may also be that in the black culture doing self-directed things is not customary and they, therefore, do as much as they desire; whereas, the poor whites may not have opportunities to do things on their own, but see other whites making their own decisions.

The fact that the boys in the Correctional Institute saw themselves as more adequate than those in the other groups may be a result of the length of now successful experiences. That is to say, the fact that they are younger may be a factor in this feeling of adequacy and may, therefore, be a positive for them.

See Appendix:

Attachment F - "How I See Myself Scale"

COMPONENTS

The original purpose of the Georgia State Module was that of the component "outreach". As the program has developed and expanded, further components were essential to give the meaning and depth to the "outreach" component.

Outreach. In order to recruit someone it seems necessary to know something about the characteristics of the persons you wish to recruit. A first phase of this project was, then, to identify some of the unique qualities of the underestimated adult. The following observations were made by the recruiters, teachers and director of this project concerning the nature of those with whom initial contacts were made:

- (1) These people are as unique within the group as they are between groups.
- (2) Those persons seeing themselves as more able and the world as more friendly were easier to recruit.
- (3) Many of those "hard-core" were self-defeated and poor in spirit as well as poor of purse.
- (4) The language patterns of the poor are different, but they are not non-verbal.
- (5) There is a feeling of being other-directed and repressed, rather than self-directed and coping.

- (6) There is little feeling of community responsibility.
- (7) The adults do not have current information concerning possibilities or probabilities.
- (8) He has a difficult time maintaining a sense of dignity, due to discrimination and low marketable skills.
- (9) The roles the underestimated can play are limited. This is due to the lack of skills and meaningful relationships.
- (10) He is always having to attend mere survival needs and, therefore, has little time to concern himself with his self-enhancement needs.
- (11) The underestimated do not deal with causality or consequence as often as middle class people do. They tend to behave according to the concrete situation as it appears at the moment.
- (12) The ego does not appear to be as developed. That is to say, it does not know all the possible alternatives and, therefore, cannot deal with reality in the same ways as the middle class can.
- (13) The underestimated are, however, constantly striving to enhance self while still maintaining their current self.

During the development of this recruitment program procedures also had to be

developed. The cooperation of ten (10) system superintendents (counties: Banks, Franklin, Habersham, Hall, Pickens, Rabun, Stephens, Towns, Union and White) was acquired. They assisted in identifying recruiters and students, and in finding facilities and communication necessary for the establishment of the programs. The county people further assisted the director, State Department of Education Consultants, University of Georgia Consultants and the Appalachia Adult Basic Education Demonstration Center in the pre and in service training programs for the recruiters and teachers. In all meetings emphasis was placed on the understanding of the underestimated adult and in ways to establish and maintain rapport with them.

In an effort to determine the most effective recruiting technique a variety of recruiters were utilized. These included college students, ABE students, indigenous lay recruiters, teachers, ABE teachers, VISTA volunteers and other lay recruiters as ministerial and civic associations. Since September 1, 1969, nine hundred eighty-two (982) people were contacted with two hundred seventy-one (271) enrolling in ABE classes.

The "Recruiter Logs" were kept in an effort to gather data concerning the target population. These logs resulted in a personal folder being made for each student which was then used for program planning and instructional needs.

Many agencies as Health, Family and Children Services, OEO - Ninth

District Opportunities, Inc., Ninth District Educational Services, Adult Education Unit of the Georgia State Department of Education, Young Harris College and the University of Georgia, and other civic and professional groups were cooperative in planning and implementing this program.

The Georgia State Module of the Adult Basic Education Recruitment Research Program is OUTREACH. These recruitment procedures continue to change as additional information is gathered, but currently, it appears that the best recruiters are those who are actively involved in all phases (recruiting, implementing and evaluating) of the program.

See Appendix:

Forms - Log for Recruiters

Retention. If effective ways to retain the group are not utilized, recruitment is of little value. Retention, then, is a major component of the Georgia State Module.

Research as that of Deutsch and Combs shows that when a person believes he can, he will spend the time necessary to do. In other words, a person behaves according to how he believes the situation to be — not as others believe it to be. In an effort to assess how the adults viewed themselves and the situation their views of self were reviewed. Unfortunately these were not acquired until near the end of the program and could not, therefore, be

utilized in program planning for the entire year. The information was used for redirection of the project and in the future plans include early assessment of views of self.

The director and consultants worked with recruiters and teachers, as well as with the adult participants, in helping the adult understand himself as a capable human being. Programs to expand this aspect of the program will be extended for future participants.

Realizing that returning to school for an ABE student is a major step, the teachers realized the necessity of helping each person find successful experiences during each session. The teachers utilized the "log" and other information given by the recruiter in understanding the specific needs and desires of the individual. His program was then set up with relevant activities.

The adults needed constant assurance and reinforcement in their activities.

From observations and student discussion one can assume that those ABE classes which are individualized will have a higher retention rate than those which are not. These programs must be paced to meet the immediate needs of the adult. That is, they must be simple enough to insure success, yet at the same time complex enough to cause the person to "reach" and grow. All the activities must be real life based so as to meet the needs of the individual.

Practical usable skills are much more meaningful than are theory and abstract ideas.

Eighty percent (80%) of the adults who entered the Georgia State Module Program have remained active. When one considers that more than fifty percent (50%) of the high school students in this area drop out of school this is indeed successful.

One will note from Tables V and VI the reasons given by the twenty percent (20%) who left the program. Other than those students leaving the Correctional Institutions the largest number of reasons given were lack of interest in only two (2) counties and conflicting work schedules in one (1) county.

See Appendix:

Table V - Comparison of Reasons for Withdrawals by Counties
in Relation to Enrollment

Table VI - ABE Enrollment Summary

Diagnosis. It was noted earlier that caution is needed when testing the ABE participants at the beginning of a program. It has been found that the informal interview method is the most successful. This approach with a systematic observation should improve this aspect of the program in the future.

In addition to the informal interview technique a brief oral test in word recognition or informal reading inventory is used to establish the

student's placement in class and to indicate the reading material that he can use successfully. Standardized tests ABLE I and II are also being used.

As the program progresses, in the future additional tests will be needed. It is expected that upon entrance to the program the adult will work with the teacher in getting the data necessary to help plan his program. This will necessarily include cognitive skill tests as well as such affective measures as Gordon "How I See Myself Scale" and other attitude scales. A continuous testing program will be necessary to evaluate and redirect the program as to specific behavioral and performance objectives.

Manpower. Interest in the Georgia State Module has grown and the concern is currently seen by continuous requests for additional programs.

The director has successfully acquired the services of volunteers from the local schools, universities and other educational media in recruiting and transporting. The State Department of Education continues to furnish materials and funds for the classes as well as supplying classroom facilities, etc.

The teachers in the program give additional time for follow-up activities and are assisted by nineteen (19) paid recruiters, one (1) secretary, one (1) part-time bookkeeper, a project director and other consultants and research assistants.

Three (3) multi-county workshops have been held with approximately one hundred fifty (150) participants. In addition twenty (20) area teachers attended a credit course on "Teaching the Disadvantaged Adult".

Additional assistance from local persons will continue to be a major concern, and in the future emphasis will be on acquiring more assistance from the ABE students themselves. They could be a vital and powerful source in recruiting and teaching "hard-core" unemployed.

Materials and Curricula. It has not been the purpose of this project to evaluate curricula materials. The State Adult Basic Education Curriculum Guide and state approved instructional materials are being used. In addition educational television has been utilized by the teachers. Attachment E (see Appendix) shows a report of the television program.

In the future more evaluation of materials will be necessary. It is not possible to individualize learning without evaluating the materials to be used for effectiveness with the particular individual. It may also become necessary to develop certain materials to utilize a wider variety of materials. Programmed learning will probably be used more with future ABE classes.

Methods and Teaching Techniques. A variety of teaching methods have been utilized. The chief emphasis has been on active individual participation in interpersonal situations. Teachers have employed demonstration, role playing,

group discussion and the Socratic method - using a variety of materials such as films, tapes, speakers, tape recorders, transparencies, filmstrips, EDL reading machines, language masters, television, film loops, and books. The utilization of various resources and materials allowed each individual to learn in his own style preference, thereby increasing the retention of the students.

Persons in the community (including members of the ABE classes) were used as resource people and assisted others in particular skills and interest.

The in-service programs were enriched by the members of the Southern Regional Education Board, by University of Georgia staff, by the staff of the Appalachian Adult Basic Education Demonstration Center and by consultants from the Adult Education Unit of the Georgia State Department of Education.

Continuous in-service experiences have provided the teachers and recruiters with new techniques for working with the underestimated adult, and have also given them the opportunity to share with each other, thereby getting new ideas.

The evaluation of the in-service (see Appendix) program shows that the recruiters and teachers shared in their positive evaluation of the work-study sessions. It is apparent from the data that the participants saw a need for a variety of experiences and desired assistance in all areas of understanding and working with the underestimated adult.

In the future additional work sessions will be held in utilizing ways to further individualize.

Continual and Terminal Counseling. This project does not employ a counselor. The director, University of Georgia consultant and teachers have assisted in employment counseling and in self-understanding, but in-depth counseling has not been a part of this project.

Placement. Employment Status forms have been distributed.

Follow-Up. The recruiters make telephone or home contacts to persons who are absent from class. This has allowed the adult to know that his presence is important and has given him a sense of dignity and worth. It has been an asset in the retention program and will continue to be an important part of the project.

There has not, however, been adequate follow-up of those finishing or leaving the ABE program. In the future better follow-up programs will be needed in order to determine the effectiveness of the program in promoting behavioral and occupational change.

STATE SUPPORT

The State Department of Education has shown interest in and support of the entire Georgia State Module. They have served as consultants for the project and have assisted in the evaluation of this project.

In the future it is planned that they will continue to assist by sponsoring in-service projects and by assisting in the evaluation of materials and in the location of new materials.

The State Department of Education is aware of the need to recruit and have verbalized a desire to recruit, but at present do not have funds that can immediately be transferred into a recruitment fund. It is hoped that in the future more funds will be available for an enlarged recruitment program.

The State continues to provide funds for the teachers of the ABE classes as well as for the classroom space and materials. They will provide additional work-study sessions for the recruiters as well as for the ABE teachers. Consultants will also be available for assisting in orientation sessions for the recruiters and for in-service sessions.

RECOMMENDATIONS

In March of 1969 a number of recommendations concerning the Georgia State Module were made in the interim evaluation prepared by Jude T. Cotter. Action has been taken on most of these recommendations, as follows:

1. The Advisory Committee be convened at the earliest possible opportunity. The Committee met in May of 1969 and again in February of 1970, with interim individual communication.
2. That a specific training program be conducted that could be packaged for use in other State Modules.

Successful and unsuccessful aspects of various techniques are currently being investigated. During the following year it is hoped that an entire training program will be established.

3. That a program be established in Pickens County based on the goals established for the Gainesville project.

This has been started, but due to local difficulties has not been successful.

4. That the Gainesville project be discontinued.

The project was discontinued.

5. That the institutions of higher learning be approached to secure student recruiters who would receive tuition grants and college credit.

Investigation into this possibility continues, but has not as yet been feasible. One might note that the college student recruiter was not successful as a recruiter in this area. A college student from the environment has recently been employed to recruit in one area.

6. That a concerted program of information to local newspapers be started.

Newspapers and other media are being used for communication purposes. It is, however, often difficult to get space in some of the local newspapers. Efforts in this area are continuing.

7. That orientation be given teachers who had not taught Adult Basic Education classes.

This is being carried out in multi-county workshops and a more intensive in-service program will be carried on.

8. That the possibility of establishing an ABE program at Alto be explored.

Classes have begun at the Correctional Institute. They have been rewarding with some one hundred fifteen (115) students having enrolled.

NEW RECOMMENDATIONS

The major weaknesses of this program have been the frustrations derived from not being able to reach a larger percentage of the target population.

1. In those counties where the administrative staff has not been actively involved in the recruiting program (has not displayed an active interest), the recruitment has not been as effective. It may be that when the lay public sees those whose business is education as not being interested that they do not see education as being advantageous to them.

Efforts to improve the program in these counties continue, and some success is being seen through the efforts of finding influential civic and church leaders. However, these areas are areas where home (door to door) recruitment is needed.

2. The ten (10) county area is such a large geographic area that it is difficult for the director to make as many contacts as are needed. This was helped during the spring by the employment of a continuing consultant from the University of Georgia. The consultant met with groups and assisted in planning, evaluating and redirecting, recruiting and teaching. This will be expanded in the future and should facilitate the director being able to work more in personal contacts.

In addition, three (3) local system counselors and/or supervisors were employed to implement and supervise programs in their area.

3. It was found that in this target area that in order to reach the "hard-core" additional home visits are necessary. In the future it is recommended that many of the adults be reached initially through home adult programs. These will be done through an effort where the recruiter-teacher will go into homes and teach the adults to work with their own or other children in a specific learning task (as reading). These programs will then be expanded into community programs. That is, programs where three (3) or four (4) neighboring adults will meet as a group to learn specific skills to teach their children. The adults will then be encouraged to attend regular ABE classes.
4. It is expected that through the process of learning to teach their own children that the adults will learn the basic attack skills themselves, and will learn them without the fears attached to going back to school.
5. It is further expected that by working with the parents in finding ways to help their own children that the poverty cycle can be broken by changing the image the child has of an adult and the views the adult holds about education.

6. Although the purpose of this project is not to evaluate curricula materials, it is necessary to continuously evaluate the effectiveness of the materials. There is currently a need for new materials which integrate reading, writing and computing into one (1) unit. These units should concern themselves with self-understandings as well. The director of the project will need to spend more time in the future with the evaluation of materials used.
7. The home programs will allow the adults to learn how to utilize the resources available to them for intellectual learnings, and how to change their environment to meet their own needs.
8. The major emphasis of this project for the following year should be to perfect the technique of home recruiting and home teaching. It is the intent of the director to spend a major portion of her time on this task.
9. In order to more adequately assess the total program a systematic testing and information program will be set up for the future. This will allow for better direction and for a more accurate assessment of ongoing programs.

SUMMARY OF ORIENTATIONS GIVEN RECRUITERS AT PRE- AND IN-SERVICE TRAINING
SESSIONS

GEORGIA STATE MODULE

1. What is Adult Basic Education?
2. Who finances ABE?
3. Who is eligible to attend ABE classes?
4. What are some of the problems of adult illiteracy?
5. What are a few of the causes of adult illiteracy?
6. What are the goals of Adult Basic Education?
7. What are some of the characteristics of the underestimated adult?

These are some of the questions that we attempted to answer by buzz groups, role playing, general discussions, question & answer periods, panels, etc.

Recruitment of the Underestimated:

It is difficult to entice the adult to attend ABE classes. If there is to be a great degree of success in recruitment of the underestimated, there must be total community commitment to the ABE program -- community resources, human resources and institutions and organizations. How does one encourage enrollments? How do you persuade men and women who have little formal education to return to school? How do you convince them that they should leave their home, their family, friends, favorite TV programs, etc. just to learn to read and write or to improve their educational level?

The first essential is to know and understand the people, their problems, attitudes and desires. Many are shy, retiring, noncommunicative. Their lives have been with one disappointment after another. Recruitment is difficult because of embarrassment, suspicion, fear, lack of understanding, etc.

Methods of Recruitment:

Extend to the recruitee a personal invitation to attend classes. If you approach with the idea of "Do something for these people", you will fail miserably. It is only when we "do something with them" that we succeed. Recruitment is not "going slumming" or "doing good". It is all of us helping each other to help ourselves.

Look for the strengths, talents and contributions that the prospective ABE student may make rather than the weaknesses and obvious needs. When we consider them only as needy individuals who require our special help, it is easy to feel superior and condescending — an attitude which they sense and deeply resent. If we really want to help, we must look for and honor their unique talents, thus boosting their already shaky self-esteem.

Be friendly and non-critical. If you are cold or authoritative, the shy and fearful ABE prospect will withdraw not blossom. They hide their true feelings and skills for fear of ridicule or rejection — both of which they have probably experienced throughout their lives.

Encourage them to talk freely about topics of interest to them. If one does this, their special interest and abilities may emerge and they will be willing to try an ABE class. If some remain silent, be patient. It may take several visits to win their trust. Always recognize their strengths.

To be a successful recruiter one must have or develop these traits: patience, optimism, understanding, acceptance, cultural awareness and sensitivity to feelings of inadequacy. Above all, a recruiter must have a genuine liking for "different" people. If you don't

like people with different backgrounds and values from your own, you can't hide it from the disadvantaged underestimated adult. No matter how hard you try to hide your feelings you will give non-spoken clues to them through gestures, tone of voice, facial expressions; all of this reinforces their feelings of worthlessness and inadequacy. Your simple, friendly, relaxed attitude will help the recruiter feel comfortable and unthreatened.

The recruiters are always reminded to contact agencies such as Family & Children Services, Health Department, civic & religious groups, local school administrators, newspapers & radio news media, business, etc. for help and names of eligible adults.

THE FOLLOWING WAS SHARED WITH RECRUITERS AT AN IN-SERVICE WORKSHOP AND THROUGH THE NEWS-LINE PUBLICATION:

AN INVITATION IS NOT ENOUGH
Jim Hester

Too often do we as recruiter and teacher feel that if we invite a prospect to enroll in our adult class that we can expect him to be at our next meeting, and the next, and the next.

We can all agree that our recruiting and holding power is not what we would like for it to be. Much progress has been made during the past year and is currently being made in our ability to enroll and hold a student. One only has to compare current figures over the previous year to see this. Although things are going well in our program, we must not get discouraged or complacent with our accomplishments but must ever be receptive to new and better techniques.

First of all, we must recognize the fact that our students have all cultivated and nourished negative habits and seldom, if ever, have they been responsible for major planning that effects their lives. With this fact recognized, we must then begin to move the student from a negative, dependent attitude to a positive, independent attitude before we can hope to realize significant academic achievement.

When we invite a prospect, we nearly always have reason to believe that the program can enrich his life in some fashion. If the prospect is responsive, he must have reason to believe it can enrich his present circumstances or he would not join the class. As a team the recruiter and class teacher are equally charged with the responsibility of seeing that these reasons are kept even alive.

The following proposal is being suggested to recruiter and teacher as a way to increase enrollment and strengthen holding power.

1. When appointment is made with prospective student, avoid him the remainder of the week and do not answer the telephone or provide other avenues for him to cancel before the meeting.
2. Don't over-emphasize that we will teach him how to read and write during the interview.
3. Pick up prospect, take and stay for first class. (Be a little early in case he is still doubtful.) If you pick him up, you can always be sure he will be there.
4. Reassure the prospect on the way to the meeting. Be sure and gain his confidence and let him know he has your continued support.
5. Introduce prospect to all present and make him feel comfortable.
6. Once he is at class, then the teacher takes over.
7. Go slow on academic expectations first few nights.
8. Spend first night on ego boosting and improving self concepts.
9. Form teams (pair-off) and have team members be responsible for getting each other back to meetings. They can pick up, call, or otherwise encourage each other.
10. Take first few minutes each class to re-motivate.
11. Make sure a program of follow-up and visitation is worked out so students will know the recruiter will follow up.

NARRATIVE DESCRIPTION OF RECRUITMENT GIVEN BY AN ABE STUDENT RECRUITER:

Preparation: Received permission from elementary schools to go through files of children's parents - notes taken from all who did not finish high school as to last grade attended and location where they; any other research to find dropouts. Put information into brief form as to location, etc., and tried to contact all people in that vicinity at or on the same trip.

Approach: Meet people, usually knock on door, tell person something about where I live, work, and who I am.

Usually make some remarks about something of interest in the house to get them to talking about themselves or children. I act interested in anything of interest to them, children, hunting, cooking, gardening, etc. and get them to talking about themselves.

Tell them about the adult classes and explain what a good opportunity it would be for them to get their high school diploma. Mention the fact that all materials are free, and try to get them to commit themselves to at least try to come for one night to see exactly how our classes work and operate. Usually tell them that I have been attending classes and how much I enjoy going.

NARRATIVE DESCRIPTION OF RECRUITMENT BY AN ABE TEACHER AIDE RECRUITER:

When I realized that I had accepted the job of recruiting people who had not finished high school to attend ABE classes in our small town, I was excited, but frustrated — HOW? Where does one start to find the people? I believed I could "sell" them if I could find them. I wanted to convince them that learning has always been and still is such fun!!

I truly believe that people "sit in darkness" who cannot read. Without meaning to be pious, I began to pray for guidance as to where and how to reach these people. I pondered several days before I made any attempt. Then the thought of visiting nearby county stores, leaving handbills (furnished by Mrs. Orr's office) to be posted about the classes. I added my name and phone number to these. I asked the storekeepers for names of people who needed this opportunity. I did the same at leading stores in town; the stores, cafes, etc. also in the negro section. I visited the managers of the industrial plants who were very cooperative. I had special brochures (from Mrs. Orr's staff) explaining the class with places for the interested ones to sign. I gathered these later and made a personal contact. I visited all the ministers, both black and white, leaving the brochure with an appeal for all eligible person to avail themselves of this opportunity. The ministers echoed the appeal. The announcement was made via radio and local papers.

Soon my telephone was ringing and I was making appointments to visit. Wherever I went I asked for names of other interested people. Then one would tell another. Most of the people knew me because of my having done substitute teaching throughout the county; therefore, they believed in me. After the ground work was laid the names just came in. Few people I visited rejected the opportunity.

This has been a most rewarding experience!!

THE FOLLOWING IS A SAMPLE OF THE "BROCHURE" (HANDBILL) THAT SOME RECRUITERS USED.

(These were posted at such public places as industrial plants, county stores, cafes, etc.)

Banks County Board of Education, Homer, Georgia
_____, Superintendent of _____ County Schools

RE: ADULT EVENING CLASSES (At Your Local School in _____ County)

This is a program to help people help themselves through continuing education. Adult Basic Education classes make continuing education a reality for adults who are seeking greater fulfillment in life, by keeping up with the changing times, and preparing for tomorrow's job.

- WOULD YOU LIKE TO:
- Learn to speak, read, and write English
 - Learn job-getting skills
 - Learn needed arithmetic skills
 - Learn about spending money wisely, home management, civic responsibility and job opportunity
 - Prepare for the GED High School Equivalency Diploma Test

If so, join your friends in an Adult Basic Education class at you local school center. These classes are your classes so please let us know your needs. The classes will meet for 6 hours each week. There is no charge to attend these classes.

Please fill out the form at the bottom of page and return it immediately to the place from which you are obtaining this copy. As soon as these forms are returned, you will be contacted by a recruiter and notified of the organizational date for this class.

TAKE A GOOD LOOK AT YOUR EDUCATION. LEARN TO EARN

I would like to join an Adult Basic Education Class ()
I do not wish to attend an Adult Basic Education Class ()

WORKSHOP REPORT AND EVALUATION

Excerpt from NEWS-LINE September 1969

Fifty-two (52) people attended the Adult Basic Education Teacher-Recruiter Workshop at Cleveland Elementary School, Cleveland, Georgia on September 20, 1969.

Areas represented were eleven (11) Northeast Georgia counties; Oconee County, South Carolina; South Carolina State Department of Education; Morehead State University, Morehead, Kentucky; and the Adult Education Unit of the Georgia State Department of Education.

The purpose of the workshop was to determine what specific individual changes and skills on the part of the recruiter and instructor were necessary to facilitate the success of recruiting and retaining students in Adult Basic Education in this area.

Upon first analyzing the results of the study to measure the meaning of certain things to the adult learner by having them judged against a series of description scales, a three (3) point change in attitude toward the adult learner is indicated. Further data concerning this study will be reported.

1. Rank in order of importance to you from 1 to 4 with 1 being the highest the following:

Forty-four (44) participants rated GROUP SESSION as number 1, highest, with a weight score of 131.

Forty-three (43) participants rated FILM as number 2, with a weight score of 109.

Forty-four (44) participants rated GROUP REPORTS on Case Studies as number 3, with a weight score of 106.

Forty-two (42) participants rated SUMMER WORKSHOPS REPORTS as number 4, with a weight score of 101.

2. On the scale below, please indicate your general reaction to the workshop presentation by circling the appropriate number:

(1) - Excellent	13
(2) - Good	14
(3) - Average	7
(4) - Fair	2
(5) - Poor	5
. . - None	3

3. The response indicates that future training sessions should be SMALL GROUP SESSIONS. These groups should study teaching and recruiting methods and techniques, case studies developed from actual classroom situations, developing curricula, and looking at source materials and services.

These requests will be included in future Training Sessions.

SUMMARY OF ABE RECRUITMENT RESEARCH EVALUATION

October 1, 1968 - April 18, 1970

WORKSHOP PARTICIPANTS - Please check one of the following:

Teacher 14; Teacher Recruiter ; ABE Coordinator ; ABE Teacher
Recruiter 3 ; Teacher Aide Recruiter 2 ; ABE Student Recruiter 1 ;
lay recruiter 3 ; Other (list) 5 .

When planning future activities, it is important that I have your views concerning past activities of the adult programs and your needs for the future. Please use the following system when evaluating:

- 1 = VERY HELPFUL . . . I have found this most satisfying. (92)
- 2 = HELPFUL, but should be used in a limited way. (88)
- 3 = Really didn't make a difference to me. (15)
- 4 = POOR . . . I felt that my time was often wasted. (9)
- 5 = VERY POOR . . . should not be continued. (6)

EVALUATE EACH OF THE FOLLOWING WITH 1, 2, 3, 4, or 5 as shown above:

- (1) Those sessions with one other staff person.
- (1) Those sessions held with a local or small group.
- (2) Those sessions held with the entire group (all ten counties).
- (1) Those sessions meeting with the small groups of the entire group.
- (2) Those sessions with speakers.
- (2) Those sessions with panel discussions.
- (1) Those sessions with consultants.
- (1) Those sessions by ourselves (without consultants or speakers).

HOW DO YOU RATE THE SUCCESS OF THE RECRUITMENT RESEARCH PROGRAM? — 1 = Successful;
2 = Fair; 3 = Poor:

- (1) The educational aspects
- (1) The recruiting aspect
- (2) Retention of enrollees

WHAT ADDITIONAL KINDS OF HELP WOULD YOU LIKE? (Please check those desired):

- (13) Material development
- (13) Use of materials
- (20) Individualizing programs
- (10) Human relations
- (9) Recruiting
- (9) Working with instructional aids
- (12) Working with community resources
- (2) Other: _____

WORKSHOP REPORT AND EVALUATION

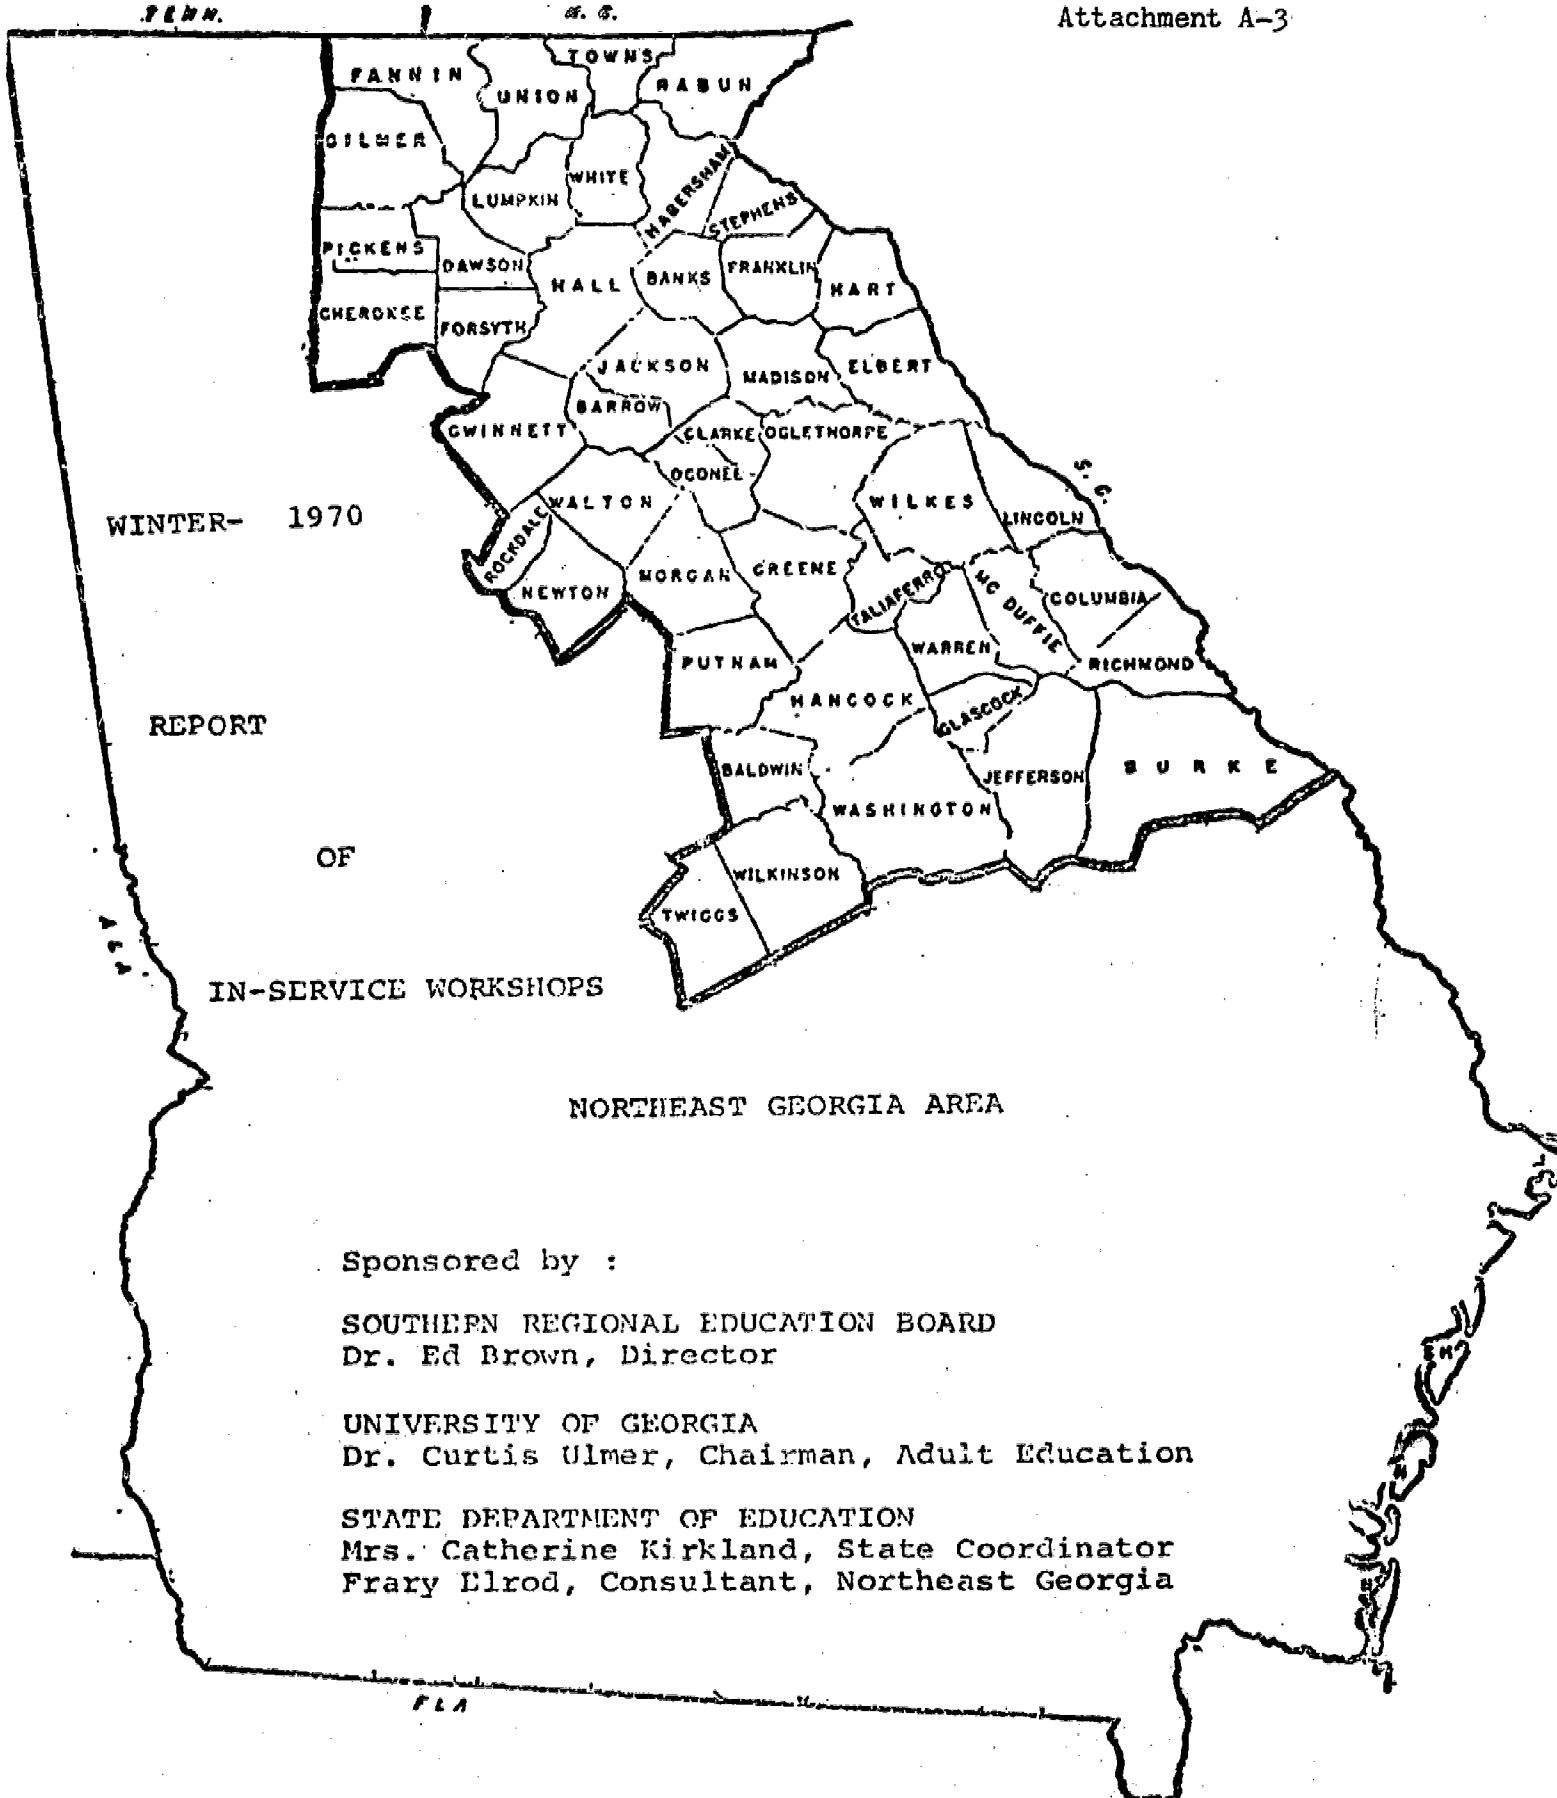

Excerpt from NEWS-LINE April 1970

An ABE Recruiter-Teacher Workshop was held on Saturday, April 18, 1970 at the Cleveland Elementary School, Cleveland, Georgia with thirty-four (34) present. Nine of the ten participating counties were represented. Participation in the activities for the day was excellent. A big "Thank You" for all your help, interest, enthusiasm, ideas, and cooperation.

The tabulation of the results from the ABE RECRUITMENT RESEARCH EVALUATION sheets indicate that the Educational and Recruitment Aspects were successful; the Retention Aspect was fair.

Twenty-eight (28) Workshop participants filled out the Evaluation Sheets; eighteen (18) indicated that "those sessions meeting with the small group of the entire group" (all ten (10) counties) was the most satisfying or most helpful.

Twenty (20) of the twenty-eight (28) checked INDIVIDUALIZING PROGRAMS when asked, "What additional kinds of help would you like?"

WINTER- 1970

REPORT

OF

IN-SERVICE WORKSHOPS

NORTHEAST GEORGIA AREA

Sponsored by :

SOUTHERN REGIONAL EDUCATION BOARD
 Dr. Ed Brown, Director

UNIVERSITY OF GEORGIA
 Dr. Curtis Ulmer, Chairman, Adult Education

STATE DEPARTMENT OF EDUCATION
 Mrs. Catherine Kirkland, State Coordinator
 Fray Elrod, Consultant, Northeast Georgia

FLA

During January and February, 1970, staff training meetings were held in the Northeast Georgia quadrant at Milledgeville, January 10, Augusta, February 14, and Cleveland, February 28 with a total of 123 persons attending. At the Augusta and Milledgeville sessions all school systems with ABE programs were represented and at the Cleveland workshop Elbert, Gwinnett, Madison and Jackson systems had no one attending.

The program at each workshop was the same. The participants worked in three groups. One group consisted of coordinators and the teachers were divided into two groups. The coordinators were assigned the task of determining what the State Department of Education and coordinators could do to help strengthen the ABE program. One teacher group worked on what the colleges and teachers could do and the other teacher group on what the local school systems and teachers could do to strengthen the program.

A consolidation of the findings are attached as reported by the recorder from each group.

The Georgia State Module was host to the Cleveland Workshop on February 28, 1970.

HOW THE STATE DEPARTMENT CAN HELP COORDINATORS

Inservice training of teachers
funds should be set aside by State
at least two a year - for credit
expand teacher training program - film, "Teaching The
Disadvantaged" - should be show once a week

Inservice training for coordinators
should teach coordinators how to work more effectively
in local areas
summer institute for coordinators

Local advisory committees
should be recognized by SDE and efforts appreciated

Coordinators' salary
to low - scale should be brought into smaller ADA margins

Coordinate basic education and vocational training

What can be done about student transportation?

Give recognition and appreciation to local advisory committees

Expand into secondary program

HOW UNIVERSITY CAN HELP TEACHERS

Study on recruiting adults

Provide in-services on
processing and developing ABE materials including audio-visual

Develop pertinent and proper tests for adults in relation
to their culture

Continue and expand television programs for teachers

Prepare future teachers to teach disadvantaged

HOW LOCAL SYSTEM MAY HELP TEACHERS

School principals could put more emphasis on ABE program through various school organizations such as PTA and others

Local people should contact civic, religious, industrial and business groups to advertise ABE

Solicit volunteer recruiters for ABE students

Provide chairs and tables which will be more comfortable for adults

Sponsor annually an open house so that board members and other interested persons may become more aware of students and programs

Transportation of students should be furnished by the local system

Testing and placement information and materials needed

Increase teacher's salary

Provide use of duplicating machines, etc.

Local systems must cooperate to have successful ABE Program

HOW COORDINATORS MAY HELP

Solicit help from and coordinate efforts of local civic, service, and religious organizations, news media, and other community volunteers to help advertise and recruit.

Issue to teachers a handbook or information sheets which contain purpose, yearly schedule, method of testing and evaluation, suggested guide to teaching adults, reports and forms to be completed by teacher and other pertinent data.

Recognize each student's efforts with appropriate ceremony and award at end of each school year.

Identify local needs for in-service education.

Keep SDE informed of happenings in local program

HOW TEACHERS MAY HELP

Establish better communication between school board and ABE

Help carry program to pupils

Help keep public informed of whats going on in ABE

Keep better records and use test results

Use all equipment given us

Keep ourselves better informed of all available materials

Try to keep pupils in school

Inform school board of accomplishment of pupils

Attend in-service session conference

Help recruit suitable ABE teachers

Participate in in-service and college training programs

IN-SERVICE WORKSHOPS

Twenty-two (22) persons attended the workshops on Programmed Materials held April 28, 1970 in Franklin County and June 8, 1970 in Rabun County. These workshops were held as a result of requests from teachers of the ABE classes. Jim Hester, Coordinator, Independent Study, Ninth District Educational Services Center, was the consultant to the two (2) groups.

ABE STUDENTS FOLLOW-UP

First Follow-Up: 121 contacted. Date: October 1969 through April 1970.

COMMENTS AND RESULTS:

21	Too busy during spring & summer--will enroll in September
14	Personal problems & illness
11	Not interested - apathy, indifference
11	Planning to enroll after Christmas
7	No transportation
6	Enrolled
6	No baby sitter
6	Too busy - not enough time
6	Undecided
5	Who "drop-in", may go back
4	Rotating work shifts prevent attendance
3	Absent due to sickness - <u>returned</u>
3	Passed GED Test after attending ABE Classes
3	Shy, embarrassed, sorry for self
3	Subjects too hard
2	Moving - changing jobs
2	Not able to learn
1	Class was not of help to him -- drop-out
1	Does not like those attending
1	Did not know that a person under 18 could attend
1	Employer asked to return
1	Enroll after hunting season, possibly January 1970
1	Expelled from high school; determined never to go to school again
1	Feels she would look silly going to school at her age
1	Got promotion he wanted after attending ABE Classes

MEMORANDUM

TO: Northeast Georgia ABE Coordinators

FROM: Frary Elrod, Consultant
Adult Education

SUBJECT: In-service for ABE Teachers

This is to request that you insist that the ABE teachers in your system view the film "Teaching the Disadvantaged Adult" each Wednesday at 4:00 PM. The program is on the Georgia ETV Network.

Area in-service programs will be planned later for all the ABE teachers.

Each teacher and coordinator will greatly benefit from viewing the film and it will make the in-service program more meaningful.

April 23, 1969

MEMORANDUM

TO: Superintendents and Local ABE Coordinators
FROM: (Mrs.) Catherine S. Kirkland
SUBJECT: TV High School

We are pleased that we have been able to reschedule TV High School, the ETV series to help adults prepare to take the GED Test. The sixty lessons will start on Tuesday, September 9 and will be shown on all 10 ETV channels on Tuesdays, Wednesdays, and Thursdays at 7:30 a.m. and 7:00 p.m. The evening program will be a repeat of the morning program.

We hope every effort will be made to provide viewing centers for all interested adults and where possible teachers to assist, although no adult basic education funds may be used for this purpose.

We regret that we cannot furnish accurate information at this time concerning the kits or books for the course. The company which handled the books cannot accept the responsibility for the same price as last year. So we are still uncertain about the cost and address from which to order.

It would be well for you to publicize locally through newspaper, radio, TV and other sources the start of this series. Contacts with business, industry, Chamber of Commerce, and civic organizations could also serve to inform more people. If members of our staff can help, please let us know.

We feel this is a real opportunity to raise the educational level of our adult population in Georgia. As a result of this year's program we are issuing many more High School Equivalency Certificates than ever.
