ABSTRACT

A survey of area employers was conducted by Los Angeles City College in Fall 1979 to determine: (1) the skill requirements for entry-level secretarial and clerical workers, (2) the salaries earned by these employees, (3) the word processing equipment commonly used by employers, (4) future employment trends in secretarial/clerical fields, and (5) employee interest in enrolling in community college business courses. Survey participants included a stratified random sample of 367 businesses and industries representing six Standard Industrial Categories: construction, manufacturing, transportation, wholesale/retail trade, finance, and services. Also included were random samples of 100 medical offices and law firms. The survey instrument contained 36 items soliciting relevant information, including the shorthand and typing skills required of secretaries, the methods used by employers to test typing speed, the weight employers give to the associate degree when making salary decisions, the type of documents produced most often on word processing equipment, the in-service training provided by employers, and anticipated increases or decreases in the hiring of 12 secretarial/clerical job classifications. The survey report, based on a 15% response rate, analyzes findings for each item and discusses implications. The questionnaire is appended. (JP)

## LOS ANGELES COUNTY OFFICE SURVEY

Although community colleges place strong emphasis on providing quality occupational training in the secretarial and office administration fields, their programs often lack the necessary articulation with the occupational market. Advances in technology have brought about changes in offices, and college curricula need to be evaluated and refined in light of these advancements. Making contact with business is essential. There is a need for two-way communication to not only keep occupational training programs up to date but also to make the business community aware of what the community colleges have to offer.

### PURPOSE OF THE STUDY

The study was conducted by the writer with the help and cooperation of Dr. Ben Gold and the Los Angeles City College Research Office. The purpose was to survey business and industry in the geographical area served by the Los Angeles Community College District to assess the following:

1. skills requirements for entry-level secretarial and clerical workers
2. salary information for entry-level positions
3. word processing equipment usage
4. evaluation of secretarial and clerical workers
5. trends for the future
6. community interest in enrolling in a community college business course or arranging on-site training programs

## METHODOLOGY

### Sample Selection

A stratified random sample of 367 businesses and industries was selected from the 1978 Chamber of Commerce Directory. (This was the latest edition available since the 1979 volume had just come off the press and was not for sale.) The sample was stratified by separating the firms into Standard Industrial (SIC) categories:

<u>SIC Classification</u>	<u>No. of Firms in Sample</u>
Construction	20
Manufacturing	205
Transportation	20
Wholesale/Retail Trade	49
Finance	21
Services	52
Total	<u>367</u>

The sample size selected was proportionate to the number of firms in each SIC listed in the Directory. Each category, or cell size, contained at least 20 firms. Example: 5% of the 17,585 listings were transportation firms; 5% of 350 = 17 (+3 to equal 20)

An additional random sample of 100 medical offices was selected from the 1978-79 L.A. County Medical Association Director of Members.

Another random sample of 100 legal offices was selected from the 1979 Parker Directory of Attorneys.

All firms in the sample were located in zip code areas within the Los Angeles Community College District boundary.

### Instrumentation

After examining the content of questionnaires used in other office surveys and with the input of L.A. City College Office Administration Department faculty, the attached 36-item instrument was devised. A rough-

draft version and a pilot survey were distributed to several faculty members and business firms to test the questionnaire before the final draft was prepared.

The legal and medical program faculty requested that an additional open-ended questionnaire form be included to legal and medical offices. (See attached forms in Appendix B.)

Mailing

The first mailing was sent on November 14, 1979. The questionnaires were addressed to either the president or general manager of each firm with instructions to forward the survey to the appropriate person in his/her company. (See attached cover letter in Appendix B.)

Since the response rate was low, 15%, a follow-up mailing was sent four weeks later. The final response tally was as follows:

<u>Nature of Business or Company</u>	<u>No. of Respondents</u>
Communication/Utility	2
Construction	6
Finance	2
Insurance	5
Manufacturing	37
Real Estate	1
Service	13
Transportation	4
Wholesale/Retail Trade	13
Other	11
	<hr/>
	94 = 26%
Medical	18 = 18%
Legal	15 = 15%
	<hr/>
Total Respondents	127

Twenty-four questionnaires were returned by the post office as undeliverable (4%).

ANALYSIS OF THE DATA

The items on the questionnaire were pre-coded, and the responses

were punched on computer cards. Using the packaged computer program, Statistical Programs for the Social Sciences (SPSS), a printout of response frequencies on each item was obtained. These response frequencies are reported in Appendix A. In addition, cross-tabulations were run in order to specify the responses by type and size of business.

#### LIMITATIONS OF THE STUDY

There are two limitations of the study which restrict the generalizability of the findings. First, the response rate was fairly low, especially from the medical and legal offices. Second, the firms included in the survey were taken from those listed in directories, which means that not all offices in Los Angeles County were part of the survey.

#### SUMMARY OF MAJOR FINDINGS

##### Shorthand

Of the offices responding to the survey, 63% do not require the ability to take shorthand for secretarial jobs; 37% do require shorthand. Although the differences among types of firms were not significant, there were offices in several categories that most often reported not requiring shorthand: Construction, Insurance, Law, Manufacturing, Medical, and Service. Of those businesses that reported requiring shorthand, the speed requirement was 80 words per minute for 4-5 minutes for the majority of respondents.

##### Typewriting

The majority of respondents reported that they require a typewriting speed of 50-59 words a minute for entry-level secretaries. Law offices reported the highest speed requirements for typewriting. More than half (60%) of the respondents give a typewriting test to job applicants

seeking secretarial positions. The majority of the typewriting tests are 5-minute timed writings which are scored by Net Words per Minute (penalty for each error subtracted from the total words typed).

#### Salaries

25% of the respondents reported an entry-level salary of \$800-900 monthly for secretaries; 24% reported \$700-800 monthly. The remaining respondents reported a wide range of salaries--from less than \$500 monthly (N=2) to \$1,201-1,400 monthly (N=4). The salaries for clerical workers were approximately \$100-200 less per month than those for secretaries according to the majority of the offices responding. The highest salaries for secretaries were reported by Law and Transportation firms, the lowest, Construction and Service. When asked whether they offer higher salaries to employees who hold A.A. degrees than to those without post-secondary degrees, 75% reported that they do not.

#### Word Processing

Of the offices responding, 73% reported that they do not use automatic typewriting equipment (word processing). Communication/Utility, Finance, Insurance, Law, Manufacturing, Medical, Real Estate, Service, and Wholesale/Retail firms were included in the 27% that reported using word processing equipment. The typewriting speeds reported for word processing operators ranged from 60-70 words per minute for the majority of respondents. The type of work most often produced on word processing equipment was form letters. Salaries for word processing operators (entry-level) were between \$800-1,000 monthly for the majority of firms.

#### Future Trends

When asked whether they anticipated an increase, decrease, or no

change in the number of employees working in any of 12 given office jobs, the only job title expected to increase was that of clerk/clerk typist. No change was expected in the numbers of employees working in the other 11 job titles.

The majority of respondents (61%) reported that they were uncertain as to whether their office employees would be interested in enrolling in a class at a community college to upgrade their office skills. 12% responded positively to this item.

The complete details of the survey's findings are available by contacting the writer at Los Angeles City College.

#### IMPLICATIONS OF THE FINDINGS FOR EDUCATION

From the responses obtained in this survey, it appears that the ability to take shorthand is not a widespread requirement for entry-level secretarial positions. In those instances where it is required, the speed of dictation is fairly low; i.e. 80 words a minute. Office Administration departments might want to reconsider their requirements of three semesters of shorthand for their career majors since it seems that the higher shorthand speeds are not in demand.

The salaries for secretaries and clerical workers have remained at low levels. This is an area which can, perhaps, be influenced by the community colleges. Students should be encouraged to seek the highest salaries possible, and employers should be advised by Office Administration departments that they need to raise salaries in order to attract the best-qualified workers.

Business and industry office employees represent an untapped source of enrollment for community colleges. Since the majority of firms expressed

uncertainty about their employees' interest in upgrading their office skills, it might be profitable if the community colleges actively solicited enrollment through publicity and by invitation.

#### RECOMMENDATIONS

This survey should be conducted on a more widespread basis, including larger numbers of firms so that the findings are more generalizable and reliable. Also, it would be most beneficial to faculty and students if this type of survey were repeated at regular time intervals in order to assess changes, keep abreast of the latest developments, and maintain a closer relationship with the business community served by the Los Angeles Community College District.

51 to 150 employees	(20.5)
151 to 500 employees	(15.7)
More than 500 employees	(8.7)

3. Approximately what percentage of your total employees at this location are secretarial and clerical employees?  
(N=126)

Fewer than 10 percent	(35.7)
11 to 19 percent	(19.8)
20 to 29 percent	(9.5)
30 to 39 percent	(8.7)
40 to 49 percent	(10.3)
50 percent or more	(15.9)

4. Approximately what percentage of your total secretarial and clerical employees are males?  
(N=126)

None	(45.2)
1 to 2 percent	(23.8)
3 to 5 percent	(7.1)
6 to 10 percent	(11.1)
More than 10 percent	(12.7)

5. Approximately what percentage of your records are on microfilm or microfiche?  
(N=126)

None	(81.0)
1 to 20 percent	(13.5)
21 to 50 percent	(2.4)
51 to 80 percent	(1.6)
More than 80 percent	(0.0)
Uncertain	(1.6)

**APPENDIX B**  
**SURVEY FORMS**

November 9, 1979

**WE NEED YOUR HELP!**

Our curricula for secretarial and clerical office workers need to be updated to meet the present demands of business and industry.

As a member of the Los Angeles business community, you can help us to better serve you by filling out the enclosed questionnaire. It takes only 10-15 minutes and will give us the facts we need to prepare our students for the future.

Please forward this office survey to the appropriate person in your company and encourage him/her to respond promptly. Thank you in advance for your cooperation.

Sincerely,

Dr. Ben Gold  
Research Office

Andrea Rudnitsky, Associate Professor  
Office Administration Department
