IDENTIFIERS Florida; *Quinmester Program

ABSTRACT

This document summarizes the background of the Dade County Quinmester Extended School Year Program involving five high schools in a pilot project. The program resulted from a study of alternative plant utilization plans for the most efficient use of school facilities to reduce the need for capital expenditure during the next five years. Discussed are (1) fiscal implications, including an analysis of projected costs; (2) evaluation plan; (3) plans to review administrative procedures and practices; and (4) specific recommendations concerning the future development of the quinmester program. The appendixes contain questionnaires sent to the business and the academic communities. Related documents are EA 004 047 and EA 004 051. (Author/MLF)

A REVIEW OF THE STATUS AND PROJECTIONS FOR THE
DADE COUNTY QUINMESTER EXTENDED SCHOOL YEAR PROGRAM

On August 14, 1969, the Dade County School Board authorized the Division of Instruction to conduct a plant utilization study. The study was to have as its purpose the exploration and recommendation of alternate plant utilization plans for the most efficient use of Dade County school facilities so as to reduce the need for capital expenditure during the next five (5) years. The recommendations which were to evolve from the study were expected to maintain the present level of instruction and where feasible, provide an opportunity for the improvement of the educational program while still effecting plant economies.

Two plant utilization strategies became apparent as the study progressed. They are: (1) the extended school day; (2) the extended school year.

The extension of the school day (Ten Hour Day) has the potential of becoming operational in a short period of time since no major curriculum revision or restructuring is required, and it does not significantly increase school operating costs. The Ten Hour Day extended day plan increases the capacity of a school facility by approximately 75% by dividing the schools enrollment into two equal groups and dividing the day into two equal sessions. Each student is assigned five subjects but may elect to extend his regular five hour day and take an additional subject. In the 1970-71 school year twenty-three Dade County secondary schools adopted the Ten Hour Day plant utilization plan.

The extension of the school year was considered to be a far more complex strategy to implement and the long term plant utilization benefits can not be accurately projected. The plant utilization study reviewed seven extended school year plans, all of which were considered as being impractical for implementation in Dade County. The experiences of other school systems would indicate that the following criteria need to be considered prior to the development of an extended school year program for the Dade County schools:

1. The extended school year design that produces the greatest plant utilization benefit requires the greatest adjustment in living patterns and such designs have proved least acceptable to communities at large.
2. Extended school year designs that mandate specific vacation periods to pupils are not as acceptable to communities as are those extended school year programs that are voluntary in nature.
3. Extended school year designs that demand a radical departure from existing school calendars are not accepted by communities as well as those extended school year plans that require only slight calendar changes.
4. The extended school year plan that increases the students' options of course selection, attendance sessions, and vacation options are more acceptable to students and patrons than those plans which maintain present restrictions in the areas of curriculum, attendance and vacation periods.
5. Extended school year plans that do not provide a common vacation period for all pupils and staff members are resisted by the community more than those that provide a period in which all the schools are closed and a common vacation period is available to students and staff.

On the basis of the above criteria, the Quinmester Plan was developed by the Division of Instruction and recommended to the Dade County School Board for piloting in selected secondary schools.

The Quinmester Extended School Year design was developed around a calendar that divides the school year into five 45-day or 9-week sessions. (See Chart I). Pupils in schools operating with the Quinmester organization must attend four (4) quinesters in the five (5) quinmester school year. The student has the option of attending all five (5) quinesters and accelerating his graduation from high school or electing a vacation quinmester other than the traditional summer vacation period. (See Chart II). Each fifth quinmester attended by the pupil could possibly accelerate his graduation from high school forty-five days although the fifth quinmester may be used by pupils for enrichment and remedial experiences and not result in an accelerated graduation.

This extended school year organization does not radically effect the present operational calendar of the Dade County Schools, and provides the community with the option of an extended school year program while maintaining the present calendar structure for those people in the community who prefer the traditional 180 day school year. The Quinmester Program is designed to be different than the present summer programming in that the summer quinmester is expected to be an extension of the four other terms of the school year and is not considered to be primarily a vehicle for remediation or enrichment. Although these types of programs will be available in quinmester schools, the Quinmester Extended School Year Plan makes available regular school programming throughout the calendar year with the exception of a two to three week summer vacation period. The above average student could accelerate under this plan while other pupils could more easily repeat grades failed. (Gifted and motivated pupils could complete 6 years of secondary schooling in five years by attending four summer quinesters between grades seven and eleven, while less gifted pupils who did fail grades could get their elementary and secondary school

180 Day School Year				
1st Quinmester, 45 Days	2nd Quinmester, 45 Days	3rd Quinmester, 45 Days	4th Quinmester, 45 Days	5th Quinmester
Theoretical Registration 2500 Student Capacity - 2,000 Student Membership - 2,000 Students Vacationing - 500	Theoretical Registration 2500 Student Capacity - 2,000 Student Membership - 2,000 Students Vacationing - 500	Theoretical Registration 2500 Student Capacity - 2,000 Student Membership - 2,000 Students Vacationing - 500	Theoretical Registration 2500 Student Capacity - 2,000 Student Membership - 2,000 Students Vacationing - 500	Traditional Summer Sch. 30 Days Theoretical Registration 2500 Student Capacity - 2,000 Student Membership - 2,000 Students Vacationing - 500

Total # of Students Enrolled for 180 Days - 2500

Total # of Students in Attendance Each Quinmester - 2000

Total # of Pupils Vacationing Each Quinmester - 500

Total # of Days School is in Operation - 225

education in the present normal twelve year period.) The voluntary features of this plan permits those who wish to attend a full year to do so and those who strongly object to being in school for an elongated period attend only the regular 180 day school program.

Quinmester Pilot School Involvement

Second secondary schools have been identified as quinmester pilot schools. They are Miami Springs Senior High School, Miami Beach Senior High School, North Miami Beach Senior High School, Nautilus Junior High School, Henry Filer Junior High School, Hialeah Junior High School and Palmetto Junior High School.

All but two of the pilot schools (North Miami Beach Senior High School and Miami Beach Senior High School) will be offering a quinmester program starting in June, 1971. The other two pilot schools will start their first quinmester in September, 1971.

During the 1970-71 school year, the pilot schools were involved in a comprehensive study of the administrative and curriculum implications of the Quinmester Program, through representation on all the subject area advisory committees and the administrative review and steering committee.

The individual pilot schools in addition to writing curriculum support material for the Quinmester Program, conducted a community information dissemination campaign designed to acquaint the community with the Quinmester Extended School Year Program.

Plant Utilization Implications of the Quinmester Extended School Year Program

The Quinmester Plan theoretically has the potential to increase the capacity of school plants by 25%. A school having a capacity of 2,000 pupils could conceivably enroll 2,500 and due to the staggered attendance periods have but 2,000 pupils in attendance during any

given quinmester. (See Chart II). Increased plant capacity could also be achieved through an acceleration procedure developed under this plan. The fact that the fifth quinmester coincides closely with the Dade County Base Plan for summer school operation is likely to make attendance in summer school for acceleration purposes more appealing. To achieve the maximum benefit from this plan relative to plant utilization 4/5 of the total secondary school population would need to be in attendance each quinmester. (See Chart II)

This maximum benefit indicated above could only be achieved by mandating pupil attendance and vacation periods. The Quinmester Extended School Year design, as presently being planned in the Dade County schools does not anticipate this mandatory procedure.

The prevailing patterns of family and community living and working, although presently undergoing change, militate against the acceptance of any extended school year design by the community that assigns pupils to specific attendance sessions for plant utilization purposes. It is anticipated that as community mores and habits change, the number of families that elect to vacation in a period other than the summer will increase and more students will attend fifth quinmester program that affords them the same academic opportunities that are available in the regular school year program.

Attendance statistics from the 1970 six-week summer session indicate that 34% of the potential secondary school population attended an academic summer school for credit. These attendance figures provide some data for a projection of what summer quinmester attendance might become after several years of operation.

It is not projected that attendance at a summer quinmester will always be reflected in an accelerated graduation for students; however, it can be generally assumed that in most cases each summer quinmester attended by a pupil will result in the saving of 25% of a pupil station.

The projection of 3,384 pupils attending quinmester programs during the summer of 1971 could conceivably provide a savings of 846 student stations computed at .25 pupil station per student in attendance. The economic benefits derived from savings in operating costs per pupil between 10-month operation and fifth quinmester operation is shown in Chart III. The degree to which pupils avail themselves of the acceleration factor in the Quinmester Plan and the degree to which pupils voluntarily elect a vacation period other than the traditional summer months will in effect represent the sum total of the plant utilization benefits available from the Quinmester Plan.

The present pupil capacity deficit in the Dade County schools makes it unfeasible to consider the Quinmester Extended School Year Program as a replacement for the ten hour day plant utilization plan. The 75% pupil capacity increase available with the ten hour day plant utilization plan, could not possibly be matched by the voluntary Quinmester Extended School Year Plan. The operation of the ten hour day or any extended school day program is, however, compatible with the Quinmester Extended School Year Program and schools can be expected to operate both plans simultaneously.

Community Involvement: Implications for the Quinmester Program

A public information campaign was conducted by the five pilot schools with the patrons of the school community and interested civic, social, and religious organizations. The new curriculum, the possibility of mid-year vacation periods and the possible reduction in the school system's capital outlay requirements were the main areas of interest at quinmester informational meetings. Numerous groups within the community and the school system were contacted by the staff of the Division of Instruction relative to the Quinmester Extended School Year. These groups included school P. T. A., League of Women Voters, university groups, curriculum councils, district principals' groups, professional organizations, and individual school facilities.

CHART III
A COMPARISON OF THE PER PUPIL OPERATING COST
OF THE TEN MONTH REGULAR PROGRAM AND THE
5TH QUINMESTER IN FIVE PILOT SCHOOLS

Pilot Schools	1970-71 Operating Budget	Membership Oct. - 1970	Regular School year Operating Costs Per Pupil	Projected Operating Costs-5th Quinmester	Projected Enroll- ment-5th Quin- mester	Projected Pupil Oper- ating Costs 5th Quin- mester	Percentage Increase in Per Pupil Operating Costs in Pilot Schools Operating 5th Quinmester
Miami Springs Sr.	\$ 1,802,028	3,354	\$561.00	\$121,068	1,140	\$106.20	+18.9%
Nautilus Junior	\$ 792,950	1,434	\$553.00	\$ 53,865	488	\$110.38	+19.9%
Henry Filer Junior	\$1,039,688	2,049	\$507.00	\$ 74,128	697	\$106.35	+20.9%
Hialeah Junior	\$ 940,855	1,462	\$644.00	\$ 53,865	497	\$108.38	+16.8%
Palmetto Junior	\$ 995,420	1,652	\$602.00	\$ 62,586	562	\$111.36	+18.5%
	\$5,570,971	9,951		\$320,625	3,384		

Note 1: Average per pupil operating costs in pilot schools for 180 day program - \$560.00.

Note 2: Average per pupil operating costs in pilot school for 5th quinmester - \$108.53

Note 3: The operating costs of the 5th quinmester (summer) is approximately 19% of the 10 month cost per pupil. This means that the present cost per pupil for a school to operate a 12 month Quinmester Program would be 119% of the present operating cost per pupil.

Twenty-thousand copies of a brochure entitled "Quinmester Program Progress Report" were distributed to all School Board employees as well as interested community groups and educational agencies. A telecast was broadcast over Channel 2 during a teacher work day. The telecast included a panel of teachers assigned to several of the quinmester pilot schools who answered questions concerning the Quinmester Plan that were solicited from the county at large.

Numerous references and informational items concerning the Quinmester Program have been published in Checkpoint and the school newspapers of the pilot schools. Several of the pilot schools have developed and distributed brochures to their patrons and pupils.

The Evaluation Department of the Division of Instruction has distributed 2,000 questionnaires to the business community in Dade County. Questionnaires have also been developed for patrons, pupils, teachers, and administrators as well as for every college and university of the state (Appendix). The data collected in these questionnaires will be published at a later date.

The Greater Miami Coalition has coordinated a Committee to assist the Dade County schools in the dissemination of information about the Quinmester Program to the community. The committee convened for five meetings to study the Quinmester Program in depth. On April 8, 1971, the committee voted to recommend to the Greater Miami Coalition, Board of Directors, that the implementation of the Quinmester Program in the Dade County schools be fully supported by the Coalition and that procedures be established to publicize the Quinmester Program to the community at large.

It is planned to continue the Public Information Program with additional telecasts and progress reports published at regular intervals throughout the school year. The public information and involvement campaign requires a continued emphasis since historically, extended

school year programs have met with considerable public opposition due to a lack of cooperative planning between school personnel and the general community.

Fiscal Implications of the Quinmester Extended School Year Program

In the 1970-71 school year the Dade County quinmester developmental effort was funded with a \$490,000 budget--\$240,000 of which was provided by the State Department of Education through a legislative grant and \$250,000 of which was provided by the Dade County School Board.

The 1970 Summer Quinmester Program at three pilot schools was funded by the allocation of State Special Teacher Service Units. It is anticipated that a similar funding procedure will be used for the 1971 summer program at the five quinmester pilot schools.

Three separate funding requests were submitted to the State Department of Education during the 1970-71 school year;

1. A request to the State Department of Education for an extension of Minimum Foundation Program funding beyond the 180 day school year to support the 9-week quinmester pilot program at five (5) Dade County quinmester pilot schools during the summer of 1971.
2. A request to the State Department of Education for the allocation of \$240,000 to be used for the continuing development of the Quinmester Program during the 1971-72 school year.
3. A request for an operational assistance grant of \$382,625 for the operation of five (5) quinmester pilot schools during the summer of 1971.

The status of these three requests cannot be fully determined until the 1971 legislative session is completed. The request for the \$240,000 developmental grant has been included in the governor's

budget while the \$382,625 operational assistance grant was deleted from the governor's budget.

The State Board of Education is taking under consideration the Dade County request for Minimum Foundation Program funding for the 1971 summer session. At this writing the decision of the State Board is not known, although indications are that a precedent for the extended school year funding has already been established in other schools within the state. Authority for this state funding procedure is presently included in State Statute 236.04 (2) (d).

The implementation of an extended school year program can generally be approximated to increase the operating costs of the school system in direct proportion to the increase in the employment period of instructional personnel. The projected increase in the operational costs of the Dade County schools operating under the Quinmester design is not expected to increase by 25% irrespective of the fact that the instructional period is being extended by 25%. This is due to the present Dade County employment policies which provide for the employment of senior high school principals, central office and district personnel and various support personnel for a 12-month period. The projected increase in the operating costs of quinmester schools for the fifth quinmester can be considered to be 19% or approximately \$108.00 per pupil (See Chart III).

Present plans call for the operation of the quinmester pilot schools to be funded by Special Teacher Service Units for the 1971 summer program. (Chart IV) Special Teacher Service Units are allocated to the Dade County schools by a Minimum Foundation Program formula partially based on the 10-month average daily attendance. A Special Teacher Service Unit can be generally valued at \$1,200 per unit and can only be used for salary purposes. The salary cost of a teacher unit in the Quinmester Program will be approximately \$2,250. Local funds will be used to make up the difference between the Special Teacher Service Unit value and the actual salary expenditure required for each teacher unit. In addition to the salary supplement support services are provided from local resources.

CHART IV
ANALYSIS OF THE PROJECTED COST OF OPERATING THE DADE COUNTY
QUINNESTER EXTENDED SCHOOL YEAR PROGRAM IN FIVE PILOT SCHOOLS
DURING THE SUMMER OF 1971

	I	II	III	IV	V	VI	VII	VIII	IX	X
	1970-71 2nd mo. ADA	Projected 1971 sum- mer sch. enroll- ment	Teacher- librarian allocation based on projected S. S. en- rollment	Teacher Salary Cost	Admini- strative allocation Principal Asst. Miami Springs Sr. High Sch.	3354	1140	40.8 + 2	\$ 96,300	1 2	\$ 9,900	\$106,200	\$14,868	\$121,068	\$106.20
Nautilus Jr. High School	1434	488	17.0 + 1	\$ 40,500	1 1	\$ 6,750	\$ 47,250	\$ 6,615	\$ 53,865	\$110.38
Henry Filer Jr. High Sch.	2049	697	24.9 + 1	\$ 58,275	1 1	\$ 6,750	\$ 65,025	\$ 9,103	\$ 74,128	\$106.35
Hialeah Jr. High School	1462	497	17.0 + 1	\$ 40,500	1 1	\$ 6,750	\$ 47,250	\$ 6,615	\$ 53,865	\$108.38
Paimetto Jr. High School	1652	562	20.4 + 1	\$ 48,150	1 1	\$ 6,750	\$ 54,900	\$ 7,686	\$ 62,586	\$111.36
TOTALS		3384	120.1 + 6	\$283,725	5 6	\$36,900	\$320,625	\$44,887	\$365,512	*

- II. Based on 1970 Summer School Report, which indicated that 34% of Dade County Secondary school students enrolled in academic programs during 1970 summer session.
- III. Personnel allocation based on Dade County personnel allocation formula.
- IV. Teacher salary costs based on average of \$250 per week.
- V. Administrative allocation based on Dade County personnel allocation formula.
- VI. Administrative salary costs based on an average cost of \$400 per week for a principal and \$350 per week for an assistant principal.

* An approximate average cost per pupil for these five schools is \$108.53. This figure is used as the basis for computing the projected costs in Chart

The local supplement required by the funding of the Quinmester Program from Minimum Foundation average daily attendance funding is considerably less than the funding required by the Special Teacher Service Unit plan. (See Chart V).

Present State Statutes permit the attendance of pupils in an extended school year program to be added to the attendance totals of the regular 10-month program. This procedure would provide the Dade County schools with approximately \$2.20 for each day a pupil is in attendance in a Quinmester Program. This fiscal support for the fifth quinmester program at the five pilot schools would permit a reduction in the local funding required for the operation of the summer Quinmester Program. (See Chart V) The \$2.20 per pupil would be available for use by the Dade County schools during the 1971-72 school year and is not limited to a salary expenditure.

To be eligible for this funding the Dade County schools are expected to operate during the summer, a program that is equal in academic value and intensity to the program that is operational during the regular 180 day school year.

The funding procedure finally employed in the operation of the fifth quinmester at the five pilot schools during the 1971 summer program cannot be fully determined at this time. The request for Minimum Foundation Program Average Daily Attendance funding is presently under consideration by the State Board of Education and final planning must await the decision of this group.

The full-cost benefits available by the implementation of the Quinmester Program cannot be fully determined at this time. The increased budgeting allocations required for operational costs needs to be equated with the fiscal benefits that will be accrued by the school capacity increases gained as a result of rotating vacations and student acceleration. The educational concomitant of the improved curriculum and the projected decrease in the number of dropouts and failures also represent direct cost benefits which must be weighed against the increase in operating costs.

CHART V

A COMPARISON OF THE LOCAL FISCAL SUPPORT REQUIRED FOR THE OPERATION OF THE 5 QUINMESTER PILOT SCHOOLS DURING THE SUMMER OF 1971 USING SPECIAL TEACHER SERVICE UNITS AND USING PROJECTED MFP - ADA SUPPORT

	I	II	III	IV	V	VI
Schools	Projected 5th Quinsemester Enrollment	Total Projected Cost of Operating Schools, 5th Quinsemester	State-STS Funds Allocated to Schools @\$1200 Per Unit	Total Local Funding Required to Supplement STS Support	State Funding Projected To Be Available By ADA Computation	Local Support Required to Supplement ADA Support
Miami Springs Sr.	1140	121,068	56,760	64,308	107,345	13,723
Nautilus Junior	488	53,865	28,500	25,365	44,930	8,935
Filer Junior	697	74,128	37,800	36,328	64,173	9,955
Hialeah Junior	497	53,865	27,300	26,565	45,759	8,106
Palmetto Junior	562	62,586	32,550	30,036	51,744	10,842
TOTAL	3384	365,512	182,910	182,602*		51,561**

V. Based on 93% pupil attendance.

* Local funds required to supplement STS units assigned quinsemester pilot schools - \$182,602

** Local funds required to supplement projected ADA support for quinsemester pilot schools - \$ 51,561

The 1971-72 local budget request for the continued development of the Quinmester Program has been increased from \$250,000 to \$346,000 so as to make possible a developmental thrust on the elementary level. The full plant utilization benefit that might be available from the rotation of vacations cannot be expected until families of multi-aged pupils can be assured that all the pupils in a family can have a common vacation period.

The increased budget proposal (Appendix) also includes computer support for student record keeping, and personnel support for the continued development of quinmester courses of instruction for the secondary level.

The budget which has been prepared incorporates the reallocation of the \$240,000 state legislative grant which is now pending approval by the state legislature. (Appendix)

Curriculum Implications of the Quinmester Extended School Year Program

The strategy of the Quinmester Extended School Year Program provides significant implications for curriculum improvement. The revisions necessary to implement this program of instruction enhances the opportunities for the Dade County Public Schools to further stimulate each student attending school through a study plan unique to his level of interests, capabilities and needs.

A program of nine-week, non-graded, non-sequential courses of instruction has been developed in each subject area of the curriculum. There is a broad range of courses, from the remedial to the highly sophisticated, making possible the development of a pupil program unique to each individual student. This type of curriculum structure provides each student with the opportunity to individualize his program by selecting from a large number of quinmester courses the learning experiences which will be of greatest interest and meaning to him while complying with the standards established by the state accreditation program and the Dade County School Board.

The Division of Instruction provided leadership and support to approximately 500 Dade County educators representing all work levels who developed the quinmester curriculum structure. Subject area advisory committees were established to develop course titles and descriptions for each course of instruction to be developed within the discipline and to recommend guidelines for the implementation of the proposed curriculum structure to the staff of the Division of Instruction. Subject area consultants and teachers on special assignment conferred on the interdisciplinary aspect of many of the courses to make feasible a student taking a course in one subject area and being granted credit in another subject area when there was an interrelationship of concepts.

The titles and descriptions of 1300 quinmester course offerings have been comprehensively reviewed by the Division of Instruction staff and, following approval of the Administrative Cabinet and the Dade County School Board, will represent the authorized courses of study for the Dade County Public Schools.

Each school participating in the pilot Quinmester Program has been asked to identify the courses of instruction which are appropriate for the pupil population served by the school. It is intended that as the program is further implemented, each school will select those courses from the master catalog of authorized courses which best suit its student needs, therefore offering a catalog of courses unique to its own school population. It is not expected that every school offer every course. This type of structure provides for the great variety of school populations as well as the great variety that exists within each school population.

At this phase of quinmester curriculum development it is anticipated that approximately 350 courses of instruction will be available to the quinmester pilot schools at the start of the 1971 summer (fifth) quinmester. Individual teachers and teams of teachers are preparing the courses in each subject area according to priorities established by the schools. It is projected that by the summer of 1973 all courses listed in the master catalog will be available to any school

within the Dade County School System interested in the implementation of the quinmester curriculum.

Since curriculum development is a continuing process, the teachers in the fields, the professionals who will be working with the program in their class situations, will play a great part in the continuous reviewing, evaluating, and rewriting of the courses of instruction. Channels of communication are open between the subject area consultants and the classroom teachers and administrative personnel for the constant revision and updating such a program demands.

Evaluation of the Quinmester Extended School Year Program

An evaluation of the Quinmester Program will be conducted by the Department of Program Evaluation of the Division of Instruction.

The evaluation plan for 1970-71 includes the use of attitudinal surveys of the business community of Greater Miami, the academic community of the state of Florida, numerous social agencies, and students, parents, teachers and school administrators in Dade County. The results of these surveys will be utilized in anticipating as far as is possible the impact this program will have on these groups.

As the quinmester pilot school operation progresses (1971-72) data will become available which will enable evaluation of the following areas:

1. Academic achievement of students in quinmester schools. Achievement of students in the program will be compared with the achievement of similar groups in other programs.
2. Achievement by students after high school graduation. The graduate's progress will be followed for 2 years after graduation, whether he seeks employment, further education, or both; and his success will be compared with that of graduates from schools not in the Quinmester Program.

3. Non-academic effects on students. Non-academic effects on students will be determined by conducting personal interviews, surveys, and by examination of records of attendance, vandalism, suspensions, and failure. Data obtained will be interpreted to determine the program's impact on student motivation, personal affairs, and other non-academic areas of possible significance.
4. Operational effects on the educational system. Through the establishment of committees representing various work levels, reports will be developed which will enable us to determine the effect of the Quinmester Program on the use of available resources.
5. Effects on family relationships. Through survey and personal interviews, the effects of the Quinmester Program on family economics, family logistics, and other pertinent areas of family life will be examined.
6. Effects on parent/school relationships. Surveys of parents, teachers and school administrators will be made to determine the effects of this program on these relationships.
7. Effects on community/school relationships. Following the survey of the leadership of the community's institutions as to expected effects, the Quinmester Program will be evaluated as to its actual effect on these areas of community activity.
8. Effects on the fiscal resources of the Dade County Public Schools. A study will be conducted to determine whether the Quinmester Program enables the county to more effectively utilize fiscal resources.

Administrative Implications of the Quinmester Extended School Year Program

The changes in administrative procedures and practices need to be comprehensively reviewed as a school system changes from a regular 10-month, 180 day program to a quinmester extended school year program. The plant utilization and curriculum benefits that are concomitant

to the quinmester design can only be realized as the program becomes administratively feasible and manageable.

In an effort to focus in on the administrator's concern relative to the Quinmester Program, the Division of Instruction organized a county-wide Administrative Review and Steering Committee. Composed of representative personnel from the county office, district offices and schools, this committee was organized to study the administrative implications of the Quinmester Program.

In order to better study the varied countywide and school administrative problems and to identify necessary tasks to be completed, the countywide committee organized itself into smaller ad hoc groups and adopted the following guidelines for intensive study:

1. That the committees address themselves solely to the concerns unique to the Quinmester Program unless there were distinct areas of commonality found in the studies that would have significance for all schools in Dade County.
2. That since the program is in pilot status, county policy revisions be kept at a minimum unless a change in the present procedure was essential to the implementation of the pilot program.

County concerns:

1. Calendar

The quinmester calendar follows the regular county calendar closely observing the same holidays and vacation periods as the regular calendar and providing a 180 day instructional period for all students. The most notable change is the placing of teacher planning days, when students are not in school, at the end of the nine-week session. Many other schools in the county other than pilot schools are presently on a nine-week reporting period and could avail themselves of the benefits of the quinmester calendar.

2. Personnel

In its present stage of implementation, the Quinmester Program requires no changes in the personnel policies and procedures that are presently operational. The following personnel procedures were studied in depth by the Administrative Review and Steering Committee: school staffing, assignments, staff utilization, recruitment, salary schedules, retirement, pension plans, sick leave procedures, sabbatical leaves. It was generally concluded that the present design of the Quinmester Extended School Year Plan could readily function within the framework of existing Dade County personnel policies and procedures.

3. Support Services

No changes are necessary at this time in the areas of transportation and food services. When the quinmester program becomes fully implemented added transportation costs will accrue because of the extended period of service. School cafeterias will operate as they do during the regular 180 day school year. Custodians are on a twelve-month employment basis and will now have the option of taking vacation time throughout the year.

Routine maintenance will pose no greater problem in schools than it does at the present time. Major maintenance projects can be scheduled during vacation periods.

4. Accreditation

Requests for accreditation waivers for quinmester pilot schools have been made and granted by the State Department of Education. The accreditation waivers granted were:

9.823 (2) (a) - Course or Subjects Required

A waiver is requested of this standard specifically in the requirement that 90 hours of physical education in grades seven and eight to be distributed over the entire school year. It is feasible that a pupil attending a quinmester school be involved in a physical education class for two quinesters

which would total ninety hours of instruction. This waiver, if granted, would permit a pupil to enroll in physical education classes beyond the ninety-hour requirement or other elective programs offered in the school program. This request does not alter the ninety-hour requirement, but does compact it into two quinesters, or ninety days, rather than the entire school year. A waiver of this standard is required for certain 10-hour day schools.

9.952 (2) - Summer Programs Credit Limit

This waiver is requested to permit pupils attending quinester schools to earn more than one (1) credit during a 9-week summer session.

9.952 (2) - Three Year Requirement for Graduation

A waiver of this standard permits students to graduate in less than three years, grades 10-12, if they have fulfilled all other requirements for graduation.

School concerns:

1. Scheduling

The Quinester Extended School Year Program by its design requires that a school develop a master schedule each nine weeks, as opposed to developing a school schedule once during the year as is the practice in the present 180 day school program. The development of a master schedule each nine weeks would provide a maximum of flexibility to pupil programming and make available alternatives in course selections that would enhance considerably the individualization of instruction.

Due to lack of time, training, and assistance available to school personnel regarding the scheduling process, it is impractical at this time to consider scheduling a school five times per year.

Alternatives to scheduling a school each quinester have been proposed which tend to balance the degree of flexibility of

student selections with the administrative burden of scheduling the school. They include:

- (a) Scheduling two or more quinesters at the same time. This approach would be similar to the procedure of linking two semester courses together (Psychology-Sociology) presently being used by some schools. This procedure would require a definite subject commitment by students beyond one quinester.
- (b) Scheduling on a college-type arrangement in which the school administration creates a year's schedule of classes (five quinesters) in advance and students section themselves into the schedule each quinester based on the students' desires and the subjects available in the quinester schedule.
- (c) A combination of procedures using components of the two alternatives perviously described.

2. Student Records

The area of student records and accounting requires a significant amount of study for the implementation of the Quinester Program.

Student attendance records need to be redesigned to be compatable with the five 45-day quinesters. This becomes increasingly significant with students opting out quinesters which heretofore had been considered a portion of the regular 180 day school year.

The recording of the courses students take, their grades, and the completion of graduation requirements will necessitate a new procedure for educational planning and record keeping. The Central Data Processing Department is presently investigating a computer input-output system to facilitate the recording of student grades five times a year.

The investigation of areas of administrative needs must be considered an ongoing activity. The experiences of the pilot

schools during the 1971-72 school year will assist in the identification of the administrative areas that require additional study. Many of the administrative concerns of the pilot schools are being studied by the faculties and administrative staffs of the individual schools. Periodic meetings of the pilot school principals have served as a clearing house for newly developed procedures and school policies that are required for quinmester implementation.

Recommendations

Specific recommendations concerning the future development of the Quinmester Program in Dade County Public Schools will be made following the evaluation of the programs implemented in the five quinmester pilot schools this summer (1971). There are, however, a few considerations which might properly be made at this time.

1. Consider offering summer academic programs in Quinmester schools only beginning with the summer of 1972.

This implies that a sufficient number of schools must be opened during the summer of 1972 to accommodate all students who desire to enroll in academic courses. (See Charts VI, VII) The financial burden will be less for Dade County to operate summer quinmester schools reimbursed under the same provisions of the Minimum Foundation Program as our regular year programs. Reimbursement to Dade County under the summer Special Teacher Service Units which now support summer school is less than received for regular year programs.

2. Consider the implementation of the quinmester curriculum for four quinesters in an increased number of secondary schools beginning in the 1972-73 school year.

This is a logical follow-through to the consideration that all academic work offering during the summer of 1972 be in quinmester schools. If secondary schools are offering nine-week courses in 1972-73 there will be fewer problems concerning credit and articulation between the summer

program and the regular year program. It is not considered necessary or desirable that all secondary schools operate the fifth quinmester (summer quinmester).

3. Consider the addition of a few selected pilot elementary schools beginning in September, 1971 to study the implementation of the quinmester program.

In order to implement a successful extended year program in this community, it is considered essential to ultimately have all grade levels involved. From the family viewpoint of scheduling vacations alone this is a valid consideration.

4. Consider the continuation of efforts to make the public more knowledgeable about the Quinmester Extended School Year Program.
5. Consider continued fiscal support from local funds for 1971-72. Provisions for the Quinmester Program are included in budget recommendations for 1971-72 which are being prepared at this time. (See Appendix--PROJECTED BUDGET)
6. Consider the adoption of a course of study for quinmester pilot schools to use during the summer of 1971 and the 1971-72 school year.

Specific recommendations concerning this are being made to the Board on April 21, 1971, Agenda Item #4.8.

Members of the Business Community
Greater Miami Area

Gentlemen:

In an effort to deal with the problem of overcrowding in Dade County Schools, two new approaches have been developed: (1) The Ten Hour Day and (2) The Quinmester Program. The implications of these programs for the business community are of vital concern to the planners.

Possible consequences of these programs include changes in the availability of student manpower for part-time and full-time employment, acceleration of high school graduation, and effects on vacation scheduling of your employees.

To anticipate as far as possible the impact of the new programs on employers we have prepared a questionnaire covering most of the main aspects of planning for the programs, and have selected 2300 Dade County businesses for a survey. Your company was included in the sample.

We would appreciate your having the person most familiar with the hiring practices of your company complete the questionnaire and return it in the enclosed stamped envelope. The time required for completion is approximately fifteen minutes. All data will be compiled by categories--individual companies will not be identified. Your comments will be of great aid in planning a workable program.

Thank you very much for your cooperation.

Sincerely yours,

William C. Inman, Ph. D.
Director, Department of
Program Evaluation

WCI:KB/pw

EXPLANATION OF THE PROGRAMS

Ten Hour Day

The Ten Hour Day consists of dividing the school day into two sessions and assigning students to either an early session (from approximately 7:00 until 12:15) or a late session (from approximately 12:15 until 5:30). Under the Ten Hour Day large numbers of students are able to seek employment during some period of the day formerly spent in school and some early session students are able to work full-time rather than part-time. The Ten Hour Day is currently in operation in some parts of Dade County and will probably become more widespread in the near future.

The Quinmester Program

The Quinmester Program consists of dividing the calendar year into five time periods (quinesters) of approximately nine weeks each. Each student will have the option of taking his school vacation during the quinmester of his choice so long as he meets the minimum requirement of attendance at four quinesters during each calendar year. Each student also has the option of attending a fifth quinmester during a calendar year in order to take additional courses for enrichment or remedial credit or to accelerate his high school graduation. Possible effects of the Quinmester Program include greater freedom for businesses in setting up employee vacation schedules, a decrease in the number of high school students and graduates seeking employment during the summer, and an increase in the number of high school students seeking temporary full-time employment at other times of the year. Implementation of the Quinmester Program on a pilot study basis is scheduled to begin at some Dade County schools in June.

The Quinmester Program is not an alternative to the Ten Hour Day; it is an adjunct to it and both programs can be in operation in the same school.

4a. _____
(Months)

4b. Equally throughout the year

5. What do you think the effect on hiring in your business would be if high school graduations were held five times a year rather than once in June?

5a. ___ would facilitate the hiring process

5b. ___ would impede the hiring process

5c. ___ would have little or no effect on the hiring process

THE QUINMESTER PLAN MAKES PROVISION FOR ACCELERATION OF HIGH SCHOOL GRADUATION: CONSEQUENTLY HIGH SCHOOL GRADUATES SEEKING EMPLOYMENT WITH YOUR COMPANY MAY BE YOUNGER THAN CURRENT APPLICANTS.

6. What is the minimum age at which you are willing to consider applicants for employment?

6a. ___ years of age

7. Are there any special considerations that led you to select an age minimum above the lowest legal limit which is 14 years of age?

Please check all that apply:

7a. ___ legal age restrictions on working with hazardous machines

7b. ___ legal age restrictions on working hours

7c. ___ company policy

7d. ___ insurance regulations

7e. ___ government licensing regulations

7f. ___ Alcoholic Beverage Laws

7g. ___ other (what?) _____

8. Approximately how many high school graduates between the ages of 18 and 21 are hired annually by your company?

Please indicate approximate number:

8a. ___ Full-time

8b. ___ Part-time

9. If you were legally able to do so, would your company hire 16 or 17 year old high school graduates in the same positions and on the same basis as you now employ high school graduates who are 18 years or older?

9a. ___ Yes

9b. ___ In selected cases

9c. ___ No

Please explain _____

ON THE TEN HOUR DAY, STUDENTS ARE OUT OF SCHOOL IN THE MORNING OR IN THE AFTERNOON THUS MAKING THE ENTIRE MORNING OR THE ENTIRE AFTERNOON AVAILABLE FOR EMPLOYMENT. THE QUINMESTER PROGRAM DISTRIBUTES SCHOOL VACATIONS THROUGHOUT THE YEAR THUS ENABLING STUDENTS TO SEEK FULLTIME EMPLOYMENT FOR NINE-WEEK BLOCKS OF TIME AT VARIOUS PERIODS OF THE CALENDAR YEAR.

10. Please indicate the types of positions in your company which can be appropriately filled by high school students.

11. Approximately how many junior and senior high school students are currently employed by your company during the regular school year?

Please indicate approximate number:

11a. ___ Full-time

11b. ___ Part-time

12. Approximately how many students who have one or more years of high school to complete are employed by your company in temporary positions during the summer?

Please indicate approximate number:

12a. ___ Full-time

12b. ___ Part-time

13. Please estimate the number of high school students your company would find it desirable to hire in temporary full-time positions for each of the following nine week periods.

Please indicate approximate number:

- 13a. ___ August 30-November 2
- 13b. ___ November 5-January 20
- 13c. ___ January 24-March 24
- 13d. ___ April 5-June 8
- 13e. ___ June 14-August 16

14. Does your company participate in any special programs to provide training or work experience for Dade County students?

- 14a. ___ No
- 14b. ___ Yes

If yes, please use the space below to give a brief description of the program(s) and an estimate of the number of students involved:

Number Students Involved

Type of Program

ON THE TEN HOUR DAY, STUDENTS ATTEND CLASSES ON EITHER A MORNING SCHOOL SESSION OR AN AFTERNOON SCHOOL SESSION. THIS PROGRAM IS IN OPERATION IN SOME DADE COUNTY SCHOOLS THIS YEAR AND MAY BE EXERTING AN EFFECT UPON EMPLOYMENT OF HIGH SCHOOL STUDENTS.

15. In comparison with previous years, has there been a change in the number of students of high school age applying for positions with your company in the last two years?

- 15a. ___ increase
- 15b. ___ decrease
- 15c. ___ no change

16. In comparison with previous years has there been a change in the number of high school age students employed by your company in the last two years?

16a. ___ increase
16b. ___ decrease
16c. ___ no change
16d. ___ no students employed

17. Have any students previously employed by your company been forced to give up jobs because of a change in their school hours?

17a. ___ Yes
17b. ___ No
17c. ___ Don't know
17d. ___ No students employed

18. Do you permit student employees to work a split-shift (i.e., work both before and after school)?

18a. ___ Yes
18b. ___ No
18c. ___ No students employed

19. Do you permit two student employees to work a half-day each, thereby filling one full-time position?

19a. ___ Yes
19b. ___ No
19c. ___ No student employed

WCI:KB/pw

EXPLANATION OF THE QUINMESTER PROGRAM

In The Quinmester Program, the calendar year is divided into five time periods (quinesters) of approximately nine weeks each. Each student will have the option of taking his school vacation during the Quinmester of his choice so long as he meets the minimum requirement of attendance at four quinesters during each calendar year (180 school days). Each student also has the option of attending a fifth quinmester during a calendar year in order to take additional courses for enrichment or remedial credit or to accelerate his high school graduation. The Quinmester curriculum consists of a wide variety of nine week units of study each related to a general subject area.

Students will be allowed the freedom to choose their courses in accordance with individual interest and abilities so long as state requirements are met. Implementation of The Quinmester Program on a pilot study basis is scheduled to begin at some Dade County schools in June and will probably become more widespread in the near future.

MEMORABLE DATES 1971-72

The following days have been selected by a committee of school personnel for special observance in schools. It is suggested that schools plan some special type of program fitting to the occasion to commemorate these dates and to bring home to students special citizenship learnings. Utilization of community groups is encouraged.

x*	Thursday—May 18 (sunset)
x*	Friday—May 19
•	Saturday—May 20 (to sunset)

*Orthodox and Conservative Jewish Holidays
x Reform and Liberal Jewish Holidays

1. It should be emphasized that in the Jewish faith the evenings prior to the holidays are just as important as the days themselves.
2. No issue should be made of the possible absences of these students on the Jewish holidays. Knowing of these holidays ahead of time, the teachers should plan the work as usual but not schedule major examinations.
3. The student should be counted absent, but not penalized in any way by not being permitted to make up the work.
4. Written excuses for absences on these holidays should be from the parents only.

School Activities, DIVISION OF INSTRUCTION, Dade County Public Schools, Miami, Florida, February 1971
