ABSTRACT

This paper reviews computer software designed for the development, management, and updating of Individual Educational Plans (IEPs) for disabled students. Selection criteria required that the software perform multiple tasks related to the writing of IEPs, be appropriate for use in a medium-sized school district, and be appropriate for a severely handicapped population. The software identified was most frequently available for Apple systems, followed by Radio Shack and IBM personal computers. The systems' functions include, among others: developing, organizing, storing, editing, and retrieving a data bank of goals, objectives, and resources; storing student's objectives, evaluative criteria for objectives, and strategies and materials for curricular areas; developing treatment plans, service plans, lesson plans, and curricula; cross tabulating and statistical summary capabilities; and monitoring due process and procedural safeguards. For each of the almost 60 software programs listed, the following information is provided: title, publisher's name and address, computer system the software can be used on, cost, remarks on the software's utility, and information source. (JDD)

A Review of the Current Computer Software
For the Development of
Individualized Educational Programs

An important sub-component of the Data-Based Decisions Project is the investigation of the use of microcomputers for information management within classroom settings, and the use of computer technology in the development, management and updating of Individual Educational Plans. Information management programs have the potential to facilitate the IEP planning process. Many of the existing programs list a variety of curricular goals and objectives, and several also allow for the modification and/or addition of data in order to reflect the goals of individual school districts. As goals are accomplished or objectives are changed, IEPs can be revised by the teachers. Computer storage capability also allows permanent records of all IEPs to be maintained.

An important information management function which may also be performed by the use of this technology is the collection and maintenance of environmental inventories. Using "top down" or future oriented procedures, the development of curriculum goals is accomplished through the analysis of each student's current and future environments to identify needed domestic, leisure-recreation, community and vocational skills. This survey results in the targeting of the critical skills frequently required of the student in order to function most effectively within various natural environments. This process requires a program that allows a teacher to apply prioritization rules to the larger set of skills identified through the survey of the student's environment, in order to determine a smaller set of more critical skills.

In the following review of software for IEP development, programs that specified exceptionalities such as learning disabilities or communication

disorders were not included. Although the list is by no means exhaustive, it does include many of the IEP programs that are available for use in classrooms for persons with severe handicaps.

Sources

In August, 1983 the San Juan Unified School District completed a report prepared under a special study grant from the California State Department of Education. The purpose of this study was to identify and evaluate all major computer systems used to assist in the development of IEPs in order to assess the extent and practicality of computer use in writing IEPs in California. The study was updated in 1984 and included descriptions of thirty-six computer-assisted IEP systems.

The SPECIALWARE DIRECTORY, published by LINC Associates, is a comprehensive listing of over three hundred software programs available for special education. "SpecialWare" refers to both instructional courseware and administrative software that has been designed for special education or judged useful by professionals who work with handicapped students. The second edition of the directory was published in 1986 and is available in electronic formats.

The Special Education Software Center gathers and disseminates information about microcomputer software that is developed or adapted for use in the education of handicapped learners. In February, 1986, the Center's database listed over three hundred fifty software titles and descriptions. The Center is operated by SRI International of Menlo Park, California in cooperation with LINC Resources of Columbus, Ohio and the Council for Exceptional Children of Reston, Virginia.

The Center for Special Education Technology is a federally funded program that collects and exchanges information about using technology in the education of handicapped children. Based at the Council for

Exceptional Children in Reston, Virginia, the Center reviews many sources in order to identify technological advances such as voice-response technology, slow-scan television, assistive devices, microcomputers and videodisc, and educational applications in instruction, communication, and management.

Criteria for Selection

This review of IEP software was completed in the spring of 1986. No work of this nature is ever totally inclusive, and undoubtedly, new software has been developed since this list was compiled. More than fifty computer-assisted IEP systems were identified and brief descriptions of cost, hardware, and utility were included as available. Several programs were not included because they did not meet the criteria established by the project. These criteria for selection included that the software perform multiple tasks related to the writing of IEPs, be appropriate for use in a medium-sized school district, and be appropriate for a severely handicapped population.

Cost

The cost of IEP systems varies from a few hundred dollars to nearly fifteen thousand dollars. Optional objectives disks and additional administrative modules or network options will increase the cost of the basic system. Service bureaus provide printed IEPs and management reports for a fixed fee per student. Several school systems offer objective banks at minimal cost.

Hardware

Although the majority of the software is available for a variety of computer systems, Apple systems are most frequently listed. Many of the programs are also available for Radio Shack and IBM personal computers or

any microcomputer using CP/M operating system. Several titles are available for both micro and minicomputers although a few do require a mainframe.

Functions

In addition to developing, managing, and updating Individual Education Plans, many of the computer-assisted information management systems perform a variety of functions:

- provide demographic information, clinical and educational assessments, medical history, record of related services, and recommended educational prescriptions
- develop, organize, store, edit, and retrieve a data bank of goals, objectives and resources
- store student's objectives, evaluative criteria for objectives, strategies and materials for curricular areas
- develop treatment plans, service plans, lesson plans, and curricula
- include individualized reports, performance level, instructional goals and methodology, objectives, and timelines
- create, monitor, and evaluate IEPs including long-term goals and short-term objectives
- file, record, and print progress reports
- include cross tabulation and statistical summary capabilities
- include multiple language capability
- include student data-base, testing history, program information, IEP management, data search, administrative network
- monitor due process and procedural safeguards to ensure compliance with state and federal regulations

Many of the programs can be modified or customized by the user in order to reflect the goals and requirements of individual classroom teachers and school systems.

IEP Software Review

TITLE	PUBLISHER	COMPUTER SYSTEM	COST	UTILITY	SOURCE OF INFO
Automated IEP System (1985)	Harding and Harris, Inc. Reg. Office c/o Bill Allen 507 Walker Avenue Baltimore, MD 21212 (301) 433-2832	Apple II+, IIe, IIc; IBM PC; DDS 3.3	3 Disks \$150.00 Added goal back disks \$30.00	-3 Disks: 1. Master IEP Form 2. Student IEP's 3. Objectives Disk - Stores and objectives.	LINC
CAMEO (Computer Assisted Management of Educational Objectives)	Nancy Prill Brown Multnomah Education Services District P.O. Box 16657 Portland, OR 97216 (503) 255-1841	Hewlett-Packard 3000 (currently) Apple IIe	Compendium of objectives \$50.00 Magnetic tape of IEP gener- ation package or objectives package is available, price negoti- able.	Provides a listing of proposed or final IEP objectives drawn from a compendium of 7,000 objectives. Teachers identify objectives by codes and specify criteria from choice of 14 formats. Teachers may specify changes in objectives and criteria--or write their own objectives. IEP order forms are sent to a service bureau for processing.	San Juan Unified School District
Child Based Information System	Edward Glennon Central Susquehanna Intermediate Unit P.O. Box 213 Lewisburg, PA 17837 (717) 523-1155	Honeywell Optical Scanner	Objectives Manual, IEP Manual \$10.00 per copy or \$20 for both, postage included.	Teachers draw upon a listing of developmentally-sequenced objectives to select annual goals and short term objectives for each student's IEP. All assigned objectives for a given student are entered on an annual goal optical scan form. This permits computer process- ing and analysis of a variety data elements. CBIS also provides a printout with educational terminology for parents specifying accomplishment on assigned objectives. This report is generated by the codes entered on the optical scan progress reporting form and depicts the progression of grades through- out the school year.	San Juan Unified School District
Computer Assisted IEP	Paula K. McCormick Fairfax County Public Schools 10310 Layton Hall Drive Fairfax, VA 22030	Hewlett-Packard 3000 mini computer	IEP Procedure Manual and Objective Bank \$10.00	Use: IEP process documents as input into a computer data base. A computerized data bank of instructional objectives is available to teachers.	San Juan Unified School District

TITLE	PUBLISHER	COMPUTER SYSTEM	COST	UTILITY	SOURCE OF INFO
Computerized Educational Plans	Vincent Silluzio Newton Public Schools 100 Walnut Street Newtonville, MA 02160			Produces printed goals and objectives to be used with IEPs. The teacher marks the appropriate goals and objectives on special coding sheets for the types of goal areas (general learning, language arts, mathematics, motor development and speech, language and hearing).	San Juan Unified School District
Computerized IEP System	James M. Caccamo CK Associates 6700 Linden Road Kansas City, MO 64113	Apple II or Iie (with 80 column card) 64k 2 disk drives Printer	10 Disks Operating manual (\$25 if purchased separately) 90 day warranty against defects System \$800	The system has a bank of 4200 instructional objectives or you can build your own objectives to suit your needs. The Midwest Regional Resource Center and the Missouri Facilitator Center have identified the system as an effective practice in special education. The IEP system is MENU driven and very user friendly. The system: holds 400 students per disk; holds 1600 objectives per disk (com's with over 4200 objectives); has evaluation criteria for each objective; can de-activate students who move without taking them off the system (you can re-activate them when they return; a de-activated student will not show up on your report); will generate a report card (or working document for teachers), which shows the objectives, their criteria, and their status.	San Juan Unified School District
Curriculum Management System (CMS) - 1985	Learning Tools, Inc. 686 Massachusetts Avenue Cambridge, MA 02139 (617) 854-8086	Apples, IBM PC, PCXT	CMS Manager \$295.00 CMS Network Option \$495.00	-Developing, organizing, storing, editing and retrieving a data bank of goals, objectives and resources. -Applications include developing treatment plans, service plans, lesson plans and curricula. -CMS interfaces with learning tool's IEPs so that goals and objectives can be electronically transferred into a students IEP.	LINC

TITLE	PUBLISHER	COMPUTER SYSTEM	COST	UTILITY	SOURCE OF INFO
Data Storage and Computer Assisted Individualized Education Program System	Glen Warbacher or Wil Gore Edu Software Route 3, Box 353 Salisbury, MD 21801 (301) 632-2582	IBM 5200 series minicomputer and printer. TRS II, 12 & 16	Sample IEP, table of contents for "menu", file layout, sample reports, transmittal data sheets. IBM program developed through federal project grant. TRS computer programs available for \$500	The basic purposes of the system are to reduce the amount of time professionals must spend developing and writing IEPs, to create precise goals and objectives which provide consistency throughout all the schools, and to provide a data base from which reports can be generated to aid special education and related services personnel, and administrators in making important decisions. This currently-operating system has generated over 1200 complete and tailored IEPs, and other reports useful to the target population.	San Juan Unified School District
DPS:BCP (Behavioral Characteristics Program) - 1985	VORT CORP P.O. Box 60132 Palo Alto, CA 94306 (415) 965-4000	Apples, IBM PC	\$299.00	-Uses branching techniques to access goals and objectives - entry of master leads and dates -Files, records, prints progress reports and IEP's. -Quick access to 32 goal areas containing over 3500 objectives and methods. -IEP Database.	LINC
Exceptional Services	Steve Dupis Eastern Research Box 555 South Ashburnham, MA 01466 (617) 827-6298		Service bureau produces printed IEPs plus management reports for \$12.50 per student.	Teacher completes an IEP draft with all necessary information, including proposed objective codes from a library of objectives. The service provides 24 hour turnaround time, first class return mail, a 4-page IEP with 4 copies each (all originals on bond paper). Management reports include monthly class lists for teachers/specialists alpha student lists, student phone lists, reports for Oct., Jan., and June.	San Juan Unified School District

IEP Clerk	David McCheaney Braxton County Schools 400 Fourth Street Sutton, WV 26601 (304) 765-7101	Microcomputer	Disk Data Management System - Cost not specified	IEP Clerk is designed to assist Special Education personnel in the development and presentation of IEPs. The quality of IEPs prepared using IEP Clerk will depend upon the quality of the goals and objectives entered into the program. The purpose of the system is to reduce clerical effort and is not intended to be a "black box" that will prescribe learning objectives. Neither the system designed to maintain historical records of student progress. The functions of decision making and evaluation student learning are assigned to the persons comprising the placement advisory committee. As an aid to developing IEPs, the system provides a method of storing educational objectives within numbered categories. After these objectives have been stored, Special Education personnel may select any group of objectives, mean of evaluation, and schedule of evaluation for a given student. After all Learning Objectives have been selected for an individual student the IEP is printed.	San Juan Unified School District
IEP Management System	Creative Educational Services 36 River Avenue Monmouth Beach, NJ 07750 (201) 870-643	Apple II, TRS-80, One disc drive, 48K		-Prepares and modifies IEP documents, issues progress reports, prints IEPs in several languages. -IEP Planning document includes evaluation criteria, instructional strategies and materials staff assignments. -Files can be modified by user. -Optional features include prepared data files, multiple language capability, progress reporting system.	CEC

Project PERFORM	Audrey Gomon, Ph.D. Disseminator/Trainer Ingham Intermediate School District 2630 W. Howell Road Mason, MI 48854	IBM 4341 computer with 2 megabytes of internal mem- ory & additional disk storage; systems software; & modem for remote data entry.	PERFORM objec- tives catalog (a guide of 8000 objec- tives with assessment procedures & performance criteria) is divided into 9 volumes: Physical, Perceptual, Language, Conceptual, Personal, Recreational, Vocational, Social & an index @ \$118 Assessment materials @58 Priority Cluster Curri- cula for TMI, SMI, SMI, Autism @ \$10 & Data pro- cessing is contracted by districts w/ the project district at an average rate of \$30 student/year.	Project REFORM's 8000 criterion referenced performance objec- tives printer in a 9-section catalog provide a resource from which parents and professionals select goals which are process- ed as INDIVIDUAL EDUCATIONAL PLANS. Achievement is later processed as PROGRESS REPORTS. The teacher selects 20-60 possible objectives for the student; a 6 digit # for each objective is entered on the "Possible IEP" input sheet. After a data entry procedure, the computer prints a readable 5-15 page report listing the optional objectives for the student. The "Possible IEP Report" is mailed to parents for their study one week before the yearly Individualized Educational Planning conference The proposed plan is reviewed & revised by the team & a 3 copy IEP is produced at the meeting. Items from the proposed plan are accepted at the meeting. Items from the proposed plan are accepted or rejected by circling yes/no on the report. Objectives are targeted for Trainably, Severely & Profound- ly and Multiply Mentally Im- paired and Autism students. Reports give Annual Goals, Short Term Instructional Objec- tives, Present Level of Perfor- mance and Assessment schedules & Procedures in compliance w/ federal regulations.	San Juan Unified School District

SEIMS (Special Education Information Management System)	Betsy Weaver School Committee, City of Boston 26 Court Street Boston, MA 02108 (617) 726-6200, ext. 5933	Mainframe (type not specified)	Manual for objectives (350 pages) & for forms completion (150 pages). Cost not specified.	The SEIMS is a process of gathering, storing, sorting & reporting the ongoing status of a referred, placed or served Special Needs student. SEIMS has the capability to print IEPs and numerous other types of student status reports. Student and IEP information are gathered through data forms which follow the procedural & planning steps leading to the IEP. The Directory of Goals & Objectives contains 3760 specific student objectives which are written in a manner to insure that each objective has conditions, behavior, results and criteria. Each objective may be written over 100 different ways by using a simple coding system. Each objective statement may be printed either as a Current Performance Level or a Future Goal & Objective. The Objectives are categorized in 8 Goal Areas - Cognitive, Social-Emotional, Self-Help, Language, Motor, Perceptual/Sensory, Speech, & Vocational. There are 165 Sub-Goals within the 8 Goal Areas which help further categorize the objectives.	San Juan Unified School District
