## ABSTRACT

The University of Hawaii's (UH) three university and seven community college campuses are compared with benchmark and peer group institutions with regard to selected financial measures. The primary data sources for this report were the Integrated Postsecondary Education Data System (IPEDS) Finance Survey, Fiscal Year 1994-95. Tables show data on enrollment, revenues, and expenditures. Highlights include: (1) uH had a full-time equivalent (FTE) enrollment in Fall 1994 of 35,751; (2) total revenues per FTE student for the UH system in fiscal year 1994-95 were $\$ 11,804$, and expenditures were $\$ 15,680$; (3) total revenues per FTE student exceeded the benchmark or peer group averages for UH Manoa and UH Hilo, and expenditures at UH Manoa and Hilo were also higher; and (4) revenues per FTE student from state appropriations were much higher for the UH campuses than for their peer and benchmark averages. It is anticipated that recent tuition increases for the UH system, as well as policy changes on the distribution and control of tuition and fees revenues, may align the UH figures more closely with those of its benchmark and peer group averages in the near future. Appendices include enrollment numbers in comparison to peer and benchmark groups as well as a list of terms and definitions. (JJL)

# REVENUES \& EXPENDITURES: PEER AND BENCHMARK COMPARISONS UNIVERSITY OF HAWAI'I <br> FISCAL YEAR 1994-95 

## Introduction and Sources

This report presents information comparing UH campuses to benchmark and peer group institutions on selected financial measures. Included are data on enrollment, revenues and expenditures. The raw numbers have been converted to a full-time equivalent (FTE) basis to facilitate comparison between institutions with varying enrollment.

The primary data sources for this report were the Integrated Postsecondary Education Data System (IPEDS) Finance Survey, Fiscal Year 1994-95 and the IPEDS Fall Enrollment Survey, Fall 1994. The immediate source is the publication entitled Higher Education Revenues \& Expenditures, Fiscal Year 1994-95 (institutional data, text and data disk) published by Research Associates of Washington. The database provided contains the financial data per FTE student already calculated. (The method used to calculate FTE used by Research Associates may differ from that used to calculate the FTE reported elsewhere.) The total revenue and total expenditure figures shown in the tables were computed as simple sums and appended to the database by the UH Institutional Research Office. Definitions of the benchmark and peer groups, as well as descriptions of the various financial measures presented in the tables, may be found in Appendix 2.

## Description of the Tables

Table 1 shows data on enrollment, revenues and expenditures per FTE student for each campus in the UH system, along with benchmark and/or peer group averages. (Details of the per FTE calculations by campus for the comparison groups can be found in the Management and Planning Support Revenues and Expenditures: Peer and Benchmark Comparisons reports by unit). Figures establishing the range of values for each item (high and low) as well as a mean value for the UH campuses are shown at the bottom of each column. Table 2 shows the percent distribution of the data presented in Table 1. Revenue items and expenditure items for each institution sum independently to $100 \%$.

Table 3 presents the same data as shown in Table 1, except that the UH figures include the UH systemwide revenues and expenditures, apportioned across UH units (see Appendix 2, Systemwide Revenues \& Expenditures, for more discussion). Table 4 provides the percent distribution of the data in Table 3. Table 5 shows data for the UH campuses and their comparison groups from fiscal year 1992-93 to 1994-95 (three years). (There are no benchmark or peer groups for the UH system or for UH-West O'ahu.) The higher education institutions in the comparison groups (benchmark and/or peer) for each UH campus are listed in Appendix 1.

The tuition and fees revenues shown in the tables for the UH campuses were returned to the State of Hawai'i General Fund for fiscal year 1994-95. However, they are listed here for comparative purposes under tuition and fees instead of under appropriations.

## Highlights

## Enrollment

- $\quad$ The University of Hawai'i had FTE enrollment in Fall 1994 of 35,751 (Table 1). Graduate enrollment was $13 \%$ of the total, though UH Mānoa was the only campus with a high proportion of graduate enrollment (27\%). UH Mānoa accounted for 45\% of the total FTE enrollment, the UH Community Colleges $47 \%$, UH Hilo $7 \%$ and UHWest O'ahu 1\%. (The FTE figures reported here differ from those reported elsewhere by the UH Institutional Research Office due to differences in the calculation method.)

## Revenues

- Total revenues per FTE student for the UH system in Fiscal Year 1994-95 were $\$ 11,804$ (Table 1 \& Figure 1). State appropriations accounted for $84 \%$ of total revenues for the UH system (Table 2), while tuition and fees accounted for $12 \%$, and private grants, gifts \& contracts and endowment income made up 4\%.
- Total revenues per FTE student exceeded the benchmark or peer group averages for UH Mānoa and UH Hilo (Figure 1). For the UH Community College campuses the results were mixed: total revenues per FTE student for some campuses were higher, while for others lower, than their peer group averages. The figures shown for UH Hilo may be somewhat overstated, and those for Hawai'i CC somewhat understated, due to fiscal interconnections between the two campuses.
- Revenues per FTE student from state appropriations were much higher for the UH campuses than for their peer and benchmark averages. State appropriations per FTE student were $83 \%$ of total revenues at UH Mānoa, $87 \%$ at UH Hilo, and $85 \%$ at the UH Community Colleges. In contrast, the benchmark and peer group averages ranged from $53 \%$ to $60 \%$ for the four-year campuses and from $64 \%$ to $80 \%$ for the two-year campuses (Table 2).
- The addition of systemwide revenues to the calculations increases total revenues per FTE student for the UH system $7.3 \%$ to $\$ 12,669$ (Table $3 \&$ Figure 3). The proportion of state appropriations as a percentage of total revenues per FTE student increases very slightly, from $84 \%$ to $85 \%$ (Table 4).
- From Fiscal Year 1992-93 to Fiscal Year 1994-95, total revenues per FTE student increased $0.8 \%$ for the UH system (Table 5). Over this same period, FTE enrollment increased 5.2\%. Total revenues for UH-West O'ahu increased 11.4\%, UH Mānoa $2.6 \%$ and the UH Community Colleges $2.1 \%$. Total revenues per FTE student for UH Hilo declined 10.3\%. Again, fiscal interconnectedness between UH Hilo and Hawai'i CC may distort the figures somewhat. (Additional historical information for the UH campuses can be found in the Revenue and Expenditure: Peer and Benchmark Comparisons reports by UH unit for Fiscal Year 1994-95.)

## Expenditures

- Total expenditures per FTE student for the UH system for Fiscal Year 1994-95 were $\$ 15,680$ (Table 1). Instruction costs accounted for $42 \%$ of total expenditures, while funded research accounted for $23 \%$ and academic support $9 \%$ (Table 2).
- Total expenditures per FTE student at UH Mānoa were higher, and at UH Hilo much higher, than either the benchmark or peer group averages (Figure 5). The comparisons were mixed for the UH Community College campuses (Figure 6).
- When addition of systemwide expenditures to the calculations per FTE student increases total expenditures for the UH system by $6.4 \%$ to $\$ 16,680$ (Table 3 \& Figure 7). Expenditures per FTE student for institutional support rise considerably, and increase as a percentage of total revenues from $3 \%$ to $8 \%$ (Table 4).
- From Fiscal Year 1992-93 to fiscal year 1994-95, total expenditures per FTE student for the UH system increased $2.6 \%$ (Table 5 \& Figure 10). Expenditures for UH-West O'ahu increased 7.1\%, UH Mānoa 5.0\% and the UH Community Colleges $1.0 \%$. Total expenditures per FTE student at UH Hilo declined $3.6 \%$. (Additional historical information for the UH campuses can be found in the Revenue and Expenditure: Peer and Benchmark Comparisons reports by UH unit for Fiscal Year 1994-95.)

## Summary

FTE enrollment for the UH system increased $5.2 \%$ from fiscal year 1992-93 to fiscal year 1994-95. Over the same period, total revenues per FTE were flat while total expenditures per FTE student rose by $2.6 \%$. Results varied by UH unit, but in general revenues and expenditures increased more slowly than did FTE enrollment. For the peer and benchmark group averages, however, the situation was the opposite: FTE enrollment declined, while revenues and expenditures per FTE student increased substantially (Table 5).

For fiscal year 1994-95, total revenues and expenditures per FTE student across UH units were generally higher than the benchmark or peer group averages. UH campuses received more state appropriations per FTE student and less tuition and fees revenues than did their comparison groups on average. Recent tuition increases for the UH system, as well as policy changes on the distribution and control of tuition and fees revenues, may align the UH figures more closely to those of its benchmark and peer group averages in the near future.

For fiscal year 1994-95, UH campuses in devoted a greater proportion of total expenditures per FTE student to instruction and public service than did their corresponding comparison groups (Table 2). UH campuses devoted considerably less resources to library and student aid.

1/ Comparable system costs are unavailable for peer or benchmark institutions.
2/ Tuition revenues in FY 1994-95 were returned to the State of Hawai'i general fund, but for comparative purposes are included here in "Tuition Revenue" instead of "Appropriations".
3/Library is included in Academic Support.
4/ The peer groups for Hawaii CC and Honotulu CC contain other UH community College campuses. Therefore, the FTE calculations shown here will differ from those in Table 1. Note: There are no peer or benchmark groups for the UH system or UH-West O'ahu.

1/ Tuition revenues for the UH campuses from FY 1992-93 to FY 1994-95 were returned to the State of Hawai'i general fund, but for comparative purposes are included here in "Tuition Revenue" instead of "Appropriations."
2 Library is included in Academic Support.
Note: Historical information for the UH Community College campuses may be found in the "Revenues and Expenditures: Benchmark and Peer Group Comparisons" report for the

Note: There are no peer or benchmark groups for the UH system or UH-West O'ahu.

## APPENDIX 2 TERMS AND DEFINITIONS

Benchmark, Peer Groups: The terms "benchmark" and "peer" are used to differentiate between the comparative groups developed internally at the University of Hawai'i and by the National Center for Higher Education Management Systems (NCHEMS). The benchmark group reflects input from UH campus executives in their quest to understand where each UH campus stands relative to some well-known U.S. mainland institutions. Benchmark comparison data are included in this report for UH Mānoa, UH Hilo and the UH Community College system in Tables 1 to 5 . The institutions included in the peer groups for the individual UH Community College campuses were selected by NCHEMS Information Services via their Comparison Group Selection service. Peer groups were developed using an indicator database containing variables on institutional characteristics, faculty, finance, degrees awarded, enrollment and other pertinent data. Professional judgment was also involved in this selection process. Peer comparison data are included in this report for UH Mānoa, UH Hilo and the UH Community College campuses. Neither benchmark nor peer groups have been developed for the UH system or UH-West O'ahu.

Systemwide Revenues \& Expenditures: Systemwide revenues and expenditures refer to revenues and expenditures of University of Hawai'i system offices. Comparison data which include systemwide figures are found in Tables 3 and 4. Systemwide revenues were apportioned by Level IV program according to each campus' share of the total revenues for each program. Systemwide expenditures were apportioned by Level IV program according to each campus' share of the total expenditures for each program.

Total Revenues: Total revenues are calculated by summing revenues for three items: tuition and fees, state appropriations, and private gifts, contracts and endowment income. Although tuition revenues in FY 1994-95 were returned to the State of Hawai'i general fund for all the University of Hawai'i campuses, they are included in this report under tuition and fee revenues for comparative purposes

Total Expenditures: Total expenditures are calculated by summing expenditures for instruction, student services, academic support, institutional support, operations and maintenance, funded research, public services and student aid.

The following definitions are from the publication entitled: Higher Education Revenues \& Expenditures, FY 1994-95.

FTE Fall Enrollment: Full-time-equivalent (FTE) enrollment is the sum of the fall count of full-time students (those whose academic load of course work or other required activity is at least 75 percent of the institution's normal full-time load) plus one-third of the fall parttime student count. Students reported in this fall count include those taking work creditable toward an associate or bachelor's degree and those students enrolled in a vocational or technical program that is normally terminal and results in some other formal recognition below the baccalaureate degree. Students taking these types of courses
through correspondence study are included. Students not reported include those enrolled in non-credit adult education courses and non-credit extension courses, auditors, students studying abroad if their enrollment is only an administrative record and the fee is nominal, students in any branch campus or extension center in a foreign country, high school students taking college courses, and students known to be enrolled concurrently at another college or university reporting their enrollment.

Percent Graduate Students: Ratio of graduate enrollment to total headcount enrollment.
Tuition and Fees: All tuition and fees (including student activity fees) assessed against students for education purposes. Included here are tuition and fee remissions or exemptions even though there is no intention of collecting them from the student. (An amount equal to such remissions or exemptions should be reflected as expenditure and classified in the category Scholarships and Fellowships or preferably as staff benefits.) Tuition and fees that are remitted to the state as an offset to the state appropriation are included. If the assignment of student fees to any capital or plant account is an administrative action only, or is subject to change by the governing board, then such fees should be reported here as current funds tuition revenues. Pledged tuition revenues under bond indenture agreements should also be reported here (a mandatory transfer of these amounts to the Plant Fund can then be reported). An exception are monies from tuition and fees assessed by binding external restrictions specifically for debt service on institutional plant or for plant renewals, replacement, or expansion, which should be reported as direct additions to Plant Funds. Tuition collected from Basic Educational Opportunity Grants (BEOG) recipients should be reported here. Charges for room and board, and other services rendered by auxiliary enterprises are not reported here. Fees assessed for student health services that are operated as a service to the student body rather than as an auxiliary enterprise should be included.

This category reports gross tuition revenues including any portion paid through receipt of student aid from all sources including institutionally administered financial aid. To avoid double counting of state revenues, appropriated student financial aid administered by the institution should be reported only once as an appropriation and not as a component of tuition revenue. Similarly, revenues from endowment income and gifts used for student financial aid should be reported as income from these sources and not as tuition revenue.

State Appropriations: Unrestricted and restricted current funds revenues from state and local government appropriations. Appropriations include all monies received by the institution for current operating expenses including student financial aid (not for specific projects, programs, or organizational units) through acts of the state legislature and local governments, except grants and contracts. Appropriations for hospitals are excluded. Federal monies stipulated for higher education and only administered by the state (e.g., federal Morrill Act land grant appropriations and Bankhead-Nelson Appropriations) are excluded. Federal government funds distributed to the state for unspecified general purposes (e.g., federal revenue sharing funds) which the state then elects to appropriate
to the institution are included. Funds disbursed by a government agency to an institutional account, such as payments into a state or local government retirement system on behalf on the institution, should be included. Tuition and fees revenues collected by the institution, remitted to the state, and then returned to the institution in the form of appropriations, must be subtracted from the gross appropriations figure and separately reported as tuition. When appropriations are reverted or lapsed to the appropriating agency, only the net appropriations should be reported.

Private Gifts, Contracts and Endowment Income: Gifts and contracts include unrestricted and restricted current funds revenues (for student financial aid, for example) from private donors for which no legal consideration is involved, and revenues from private contracts for which specific goods and services are provided. Such income includes only those gifts, grants, and contracts that are directly related to instruction, research, public service, or other primary institutional missions (as opposed to land rental or utility services, for example). Excludes gifts and grants and contracts for hospitals. Includes monies received as a result of gifts, grants, or contracts from a foreign government, and estimated dollar amounts of contributed services. Excludes revenues derived from the sale of goods and services incidental to the conduct of instruction, research, or public service, even if the institution has a contract with the recipient of the goods and services. Income from funds held in revocable trusts or distributable by direction of the trustees of such trusts should be reported under this classification. Related indirect costs recovered should also be reported in this category.

Endowment income includes unrestricted and restricted current funds revenues from endowment and income from funds held in trust by others under irrevocable trusts to the extent expended for current operating purposes. Expenditure of capital gains from such funds should be treated as transfers and not included. Endowment income used for hospitals is excluded. Institutions that have adopted a spending formula by which they expend not only the yield but also a prudent portion of the appreciation of the principal, should report the amount calculated by the "total return" concept. The amount so calculated should be adjusted for protection of the endowment principal from its loss of purchasing power if that provision is part of the spending formula.

Instruction: The instruction category includes expenditures of the institution's colleges, schools, departments, and other instructional divisions for credit and non-credit general academic instruction, occupational and vocational instruction, continuing and community education, special session instruction, preparatory and adult basic education, and remedial and tutorial instruction conducted by the teaching faculty. Expenditures for departmental research and public service that are not separately budgeted should be included in this classification. Expenditures for academic administration where the primary function is administration (e.g., academic deans) should be reported as part of Academic Support.

Student Services: This category includes funds expended for recruitment, admissions, registrar activities, and activities whose primary purpose is to contribute to the emotional
and physical well-being of students, and to their intellectual, cultural, and social development outside the context of the formal instructional program. Examples are student activities, cultural events, student newspapers, student organizations, intramural athletics, intercollegiate athletics (if the program is operated as an integral part of the department of physical education and not as an essentially self-supporting activity), counseling and career guidance (excluding informal academic counseling by the faculty), student financial aid administration, and student health services (except where operated as a self supporting auxiliary enterprise). Student services includes the administrative allowance for Pell Grants.

Academic Support: This category includes expenditures for support services that are an integral part of the institution's primary mission of instruction, research, and public service. It includes expenditures for libraries (also reported separately), demonstration schools, museums, galleries, audio/visual services, academic computing support, ancillary support, academic administration (including academic deans, but not department chairpersons), personnel development, and course and curriculum development. Expenditures for veterinary and dental clinics are included if their primary purpose is to support the institutional program.

Libraries: Libraries, a subset of Academic Support, includes expenditures for organized activities that directly support the operation of a cataloged or otherwise classified collection of published material. The Libraries entry includes expenses for the purchase of books and all forms of collected communications.

Institutional Support: Institutional support includes expenditures for the day-to-day operational support of the entire institution, excluding expenditures for physical plant operations. Included are expenditures for general administrative services, executive direction and planning, legal and fiscal operations, administrative data processing, space management, employee personnel and records, logistical activities, public relations/development, and campus security. Allocations of institutional support should be made to auxiliary enterprises, hospitals, etc., and not reported here. Staff benefits and college work-study funds should not be reported in a lump sum in this category, but are distributed to all functions. Prorated shares of state-level coordinating board and other types of state system expenses assigned member institutions should be included in this category.

Operation and Maintenance of Plant: Included here are all expenditures for operations established to provide service and maintenance related to grounds and facilities used for educational and general purposes. This includes expenditures for utilities, custodial services, fire protection, property insurance, landscape and grounds maintenance, major repairs and renovations, and similar items. In all cases, expenditures are net amounts charged to auxiliary enterprises, hospitals, and independent operations. Campus security is not included here. This category also does not include capital expenditures made from the Plant Funds accounts.

Estimated Full Instructional Expenditures: Defined by Research Associates as the sum of direct expenditures for instruction and student services plus prorated indirect costs. The indirect instructional costs equal total academic and institutional support and operation and maintenance of plant less overhead for funded research and public services, estimated as 30 percent of the expenditures for these two functions.

Funded Research: The Research category includes all funds expended for activities specifically organized to produce research outcomes and commissioned by an agency either external to the institution or separately budgeted by an organizational unit within the institution. Subject to these conditions, it includes expenditures for individual and/or project research as well as for research institutes and centers. Excluded are discretionary (not separately budgeted) expenditures for departmental research and funds used for nonresearch sponsored activities such as training programs.

Public Service: Funds expended for activities that are primarily to provide noninstructional services that are beneficial to individuals and groups external to the institution. These activities include community service programs (excluding instructional activities) and cooperative extension services. Extension services are generally located off-campus in non-institutionally owned facilities. Included in this category are conferences, institutes, general advisory services, reference bureaus, radio and television, consulting, and similar non-instructional services to particular sectors of the community.

Student Aid (Scholarships and Fellowships): This category includes expenditures given in the form of outright grants (recipients are not required to perform any service as consideration) and trainee stipends, prizes, and awards to individuals enrolled in formal course work, either for credit or non-credit. Both merit (including athletic and music scholarships) and need-based awards are included. Awards given to individuals who are not enrolled in formal course work are excluded. If the institution is given custody of the funds, but is not allowed to select the recipient of the grant - for example, Federal Basic Educational Opportunity Grants program or ROTC scholarships - the funds should not be reported. When services are required in exchange for financial assistance, as in the Federal College Work-Study Program or an institution-sponsored work-study program, the charges should be classified as expenditures of the department or organizational unit to which the service is rendered and not reported here. Aid to students in the form of tuition or fees remissions should be included. (Remissions that are granted because of faculty or staff status are charged to staff benefits and not included here.) Pell Grants are reported as a federal allotment and not in this category. Note: institutional expenditures for student aid are not part of the costs of instruction, but rather a redistribution of income function.
