 DESCRIPTORS Administrative Organization; Adult Education; Articulation (Program); College Faculty; *Educational Finance; *Educational History; Educational Objectives; Enrollment Trends; *Junior Colleges; State Aid; *State School District Relationship; *State Surveys; Statewide Planning; Statistical Data; Teacher Salaries; Vocational Education
 IDENTIFIERS *Florida

ABSTRACT

Florida statutes provide that the community colleges shall serve the post-high school educational needs of local communities by providing education in three major areas: (1) adult continuing education, including community services; (2) occupational education; and (3) general and academic education parallel to that of first and second years of the State University System. This report is intended to provide information with which to answer those questions most frequently asked by members of the legislature, state agencies, external agencies, citizens, administrators, faculty members, and students. Introductory materials describe the history, goals and philosophy, and organization of the Florida public community college system. In addition, material on financial support, articulation, and legislative regulations on the establishment of occupational, vocational, and general adult education programs is presented. The latter half of this report is comprised of 16 tables of data on enrollment, personnel, academic programs, physical facilities, and finances. Because of its unusual balance of local control with state coordination and support, the Florida community college master plan has been a national model for long-range planning and the orderly development of a statewide system of community colleges.

REPORT FOR FLORIDA'S PUBLIC COMMUNITY COLLEGES

1971 - 1972

DEPARTMENT OF EDUCATION
DIVISION OF COMMUNITY COLLEGES
TALLAHASSEE, FLORIDA

This reprint of a public document was promulgated at an annual cost of \$127.50 or \$.43 per copy to provide information to those questions most frequently asked concerning the history, organization, goals and philosophy of the community college system; and statistics for enrollments, personnel, academic programs, physical facilities and finance.

FOREWORD

The Report for Florida's Public Community Colleges is intended to provide information with which to answer those questions most frequently asked by members of the legislature, state agencies, external agencies, citizens, administration, faculty and students. The data presented herein are of two categories: that describing the history, organization, goals and philosophy of the community college system; and, that consisting of descriptive statistics for enrollments, personnel, academic programs, physical facilities and finances.

Information in this report is compiled from a series of reports submitted to the Division by the colleges.

16. Florida Community Colleges: Unexpended Plant Fund Expenditures: 1971-72	70

INTRODUCTION

In 1957 the State Board of Education adopted the Community College Council's long-range plan to provide post-high school educational opportunities within commuting distance of 99 percent of the State's population. With the opening of the 28th community college in September, 1972, this long-range plan is essentially complete. In the development and implementation of this plan, Florida became a national model for long-range planning and for the orderly development of a statewide system of community colleges.

The Florida system has also received national recognition because of its unusual balance of local control with state coordination and support. Florida's community colleges are locally controlled institutions operating within a broad framework of State Board of Education Regulations that provide minimum standards and essential system-wide coordination. Originally, the colleges were developed as components of local school systems and were operated by Boards of Public Instruction. In 1968, the Legislature established independent local Boards of Trustees and gave those boards corporate authority for operating community colleges within the framework of law and state regulations. In 1971, the local school boards were relieved of financial responsibility for community colleges, and the cost is provided largely by the State, with additional funding coming from minimal student fees and limited Federal grants.

State level administration and coordination is provided by the Department of Education through the Division of Community Colleges with the advice and support of a lay State Community College Council. The Council is composed of seven prominent citizens appointed to overlapping terms by the State Board of Education.

From the outset, Florida's community colleges have been designed as comprehensive institutions and are so described in both law and regulation. The Florida Statutes provide that the community colleges shall serve the post-high school educational needs of local communities by providing education in three major areas:

1. adult continuing education, including community services;
2. occupational education; and
3. general and academic education parallel to that of first and second years of the State University System.

HISTORY

The Florida Community Colleges had their beginning in 1933 at which time Palm Beach Junior College in West Palm Beach was established as a public two-year college. From that date until 1947 when St. Petersburg Junior College changed from private to public, Palm Beach Junior College remained the only public community college in Florida. During the year 1947, the Florida Minimum Foundation Program was enacted allowing for combined state and local support for community colleges. With this incentive two more public junior colleges were established in 1948, Chipola Junior College and Pensacola Junior College.

The initial report of the Council for the Study of Higher Education in Florida, issued in January 1955, included the following statement:

That the development of a system of public community colleges be undertaken on a sound basis as a way to which collegiate enrollment at the lower level can be dispersed and to provide for programs appropriate to a broader range of educational needs than can be met in a university program.

This and other recommendations of the Council were based upon the strong beliefs that there was a need for diversity in post-high school education and that the needs of the State for post-high school education can best be met by a partnership among the State University System, a system of locally controlled community colleges, and the private degree-granting institutions in the State.

Largely as a result of these recommendations of the Council, the Legislature in 1955 established the Community College Council, whose report was published in 1957 under the title, "The Community Junior College in Florida's Future." This report, which was approved by the State Board of Education, contained recommendations for needed legal changes and a plan for establishing a system of public community colleges in Florida which ultimately

would provide post-high school education within commuting distance for more than 99 percent of Florida's population. At the time this plan was adopted, colleges were in operation in four counties in Florida.

Also, at this time, the Legislature authorized the Division of Community Colleges in the State Department of Education and appropriated funds for six new community colleges to begin implementation of the Master Plan. The first of the new institutions, Gulf Coast Community College, was established in 1957. The other five colleges, established in 1958, were Central Florida, Daytona Beach, Manatee, North Florida, and St. Johns River. In 1960, Brevard, Indian River, Miami-Dade and Broward community colleges came into being. Following in 1962 were Lake City, Lake-Sumter, and Edison community colleges. In 1964 and 1965, Florida Keys, Okaloosa-Walton and Polk community colleges were established. In 1966, Florida Junior College at Jacksonville, Santa Fe, Seminole, South Florida and Tallahassee community colleges were added. When Hillsborough and Valencia community colleges were established, and with the 1972 opening of Pasco-Hernando Community College, the implementation of the Master Plan bringing community colleges within commuting distance of 99 percent of Florida's population has been achieved.

PHILOSOPHY AND GOALS

The rapid but orderly implementation of the state-wide plan for community junior colleges has resulted in significant changes in the patterns of attendance in post-high school education in the state. The provision of opportunities in community colleges has resulted in a substantially higher percentage of high school graduates in Florida continuing their education than had been feasible in the past. A considerable increase in opportunities for

post-high school occupational programs for the citizens of the State, especially in the technical and health-related occupations, has also resulted.

Another significant development affecting all higher education in the State is that the community colleges have become a major source of students for the upper divisions of Florida's universities. Currently, public community colleges are providing approximately two-thirds of the first-time-in-college enrollment in the State. The availability of opportunity for post-high school education at the freshman-sophomore level in the community colleges has enabled the University System to direct more of its energies toward responsibilities in upper division and graduate education. This sharing of responsibility for offerings which lead to the baccalaureate degree has proved to be a very valuable asset to the citizens of Florida.

The Southern Regional Education Board Commission on Goals for Higher Education in the South recommends that "each state should develop a strong system of two-year community colleges." The Commission amplifies this recommendation as follows:

These non-residential institutions, generally located in urban areas, can serve a variety of functions for which four-year institutions are not required. Among these are freshmen and sophomore college courses, vocational and technical programs, guidance and counseling services, specific programs to meet community needs and adult education.

The community college is economical for both student and taxpayer. It can be responsive to local needs and a vital force in the community.

These colleges, as now organized, are parts of the local public school programs, separate two-year state colleges, or affiliates of the state university system. Whatever the basis of the organization, however, three things are essential:

1. They must be integral parts of the state system of higher education and fully coordinated with the other parts of the system.
2. They must resist pressure to expand into four-year institutions, concentrating rather on achieving excellence in their two-year programs.
3. Their distinctive function must be recognized and respected. They are neither mere extensions of the high school nor decapitated versions of the four-year college.

When describing community colleges a term often used in recent years with increasing acceptance is the word "comprehensive." Previously, the transfer function of community colleges was stressed, thereby restricting post-high school educational opportunities to those who wished to pursue the baccalaureate degree. However, as more colleges accept the idea of comprehensiveness, they will necessarily stress programs and curricula designed to meet the post-high school educational needs of all persons in the community.

In adopting the philosophy of comprehensiveness and following the recommendations of the Council for the Study of Higher Education and the Community College Council, the Florida Legislature assigned three major functions to the community college. Florida Statutes provide that community colleges shall offer:

1. freshmen and sophomore level education parallel to that commonly offered in the state universities;
2. occupational education often referred to as vocational-technical education; and
3. courses and programs of adult continuing education.

In addition to these functions, the community colleges have become centers for community educational activities, including guidance, counseling, and cultural activities.

Although the great majority of students enrolled in community colleges today express as their goal completion of baccalaureate degree programs, less than one-third of the entering freshmen actually do. In recognition of this fact, community colleges are placing increasing emphasis on providing occupational programs to meet the needs of individual students and to serve the ever increasing needs of business and industry in the State. Special emphasis in the occupational programs has been placed in the industrial

technician areas, in the health occupations, and in those occupations relating to service and distribution which are so important to tourism and to the economy of Florida.

As Florida expands industrially, the occupational programs in community colleges assume increasing importance among the offerings in higher education. New emphasis on career education at all levels as expressed in federal legislation and by various studies conducted nationally will thrust the community colleges into assuming an ever increasing responsibility in this area.

The following statements summarize most of the policies which are required to enable community colleges to continue to fulfill their assigned roles in providing post-high school education for the citizens of Florida.

1. The major purpose of the community college is to extend educational opportunity at less than the baccalaureate degree level to persons in the community.
2. Programs of occupational education should be provided in the community colleges to the extent needed in each area of the state. Insofar as possible, all post-high school occupational education should be centered in the community colleges.
3. Community colleges should be recognized as the institutions where the majority of the freshmen and sophomore level students will attend college.
4. Community colleges should provide continuing educational opportunities for adults. Adult education activities in a community should be coordinated and duplication should be avoided.
5. Local control of the community college is essential.
6. Adequate sources of funding must be provided in order to support existing programs.
7. Since opportunity for post-high school education is of benefit not only to the individual but also to the economy of the state, students should be encouraged to attend by holding costs as low as practicable and by making loans and/or scholarships available to defray such expenses as are necessary.
8. Educational opportunities should be available within commuting distance of all citizens of Florida.

9. The Community College Council and the State Board of Education should continue their coordination at this level of education. Provisions for scholarships should be made where necessary to make community college education available to all citizens, and to make available to all citizens of the State special occupational programs not provided in all community colleges.
10. Development of programs of study for each college requires careful attention to the needs of individuals as well as those of business and industry. Each community college should give careful consideration to all these factors and should develop programs particularly needed in its area of the State.
11. Community colleges should maintain on-going programs of institutional research to determine ways of maintaining and improving quality of programs and of increasing efficiency and economy of operation. Year-round operation, educational television, cooperative work-study programs, independent study programs, and extended day programs are examples of successful developments that should be considered.
12. Since the diversity of educational offerings provided by a community college is specifically designated by law, community colleges should be maintained as community colleges and cannot be considered as a base for developing baccalaureate institutions.
13. Since the community colleges are required to maintain programs of study below the junior level of the university programs, they should assume principal responsibility for publicly supported lower division programs.
14. Admission to the post-high school programs of a community college should be based upon high-school graduation or its equivalent except:
 - a. when the specific program requires definable skills, abilities, or background in addition to high-school grades, or
 - b. when special permission is granted to students who demonstrate that they will profit from the course.Admission to non-credit courses should be based upon factors relative to the course itself.
15. Adequate physical facilities must be provided to house the varied programs of the community college.
16. Continued emphasis should be placed upon activities and agreements which will facilitate the smooth transfer of students from high school to community college to university. These activities should give particular emphasis to articulation of high-school and post-high school programs in the area of curriculum and counseling.

COMMUNITY COLLEGE ORGANIZATION

Community colleges are part of the state system of public education in Florida. Chapter 288.041(1)(b), Florida Statutes, defines community colleges as "educational institutions operated by local community college district boards of trustees under specific authority and regulations of the state board and offering courses and programs of general and academic education parallel to that of the first and second years of work in institutions in the state university system, of occupational education and of adult continuing education."

Since community colleges are local institutions operated by local Boards of Trustees and at the same time part of the state system of public education in Florida, their organization necessarily involves several different entities. Following is a brief description of each of the various organizational entities to which each community college is related:

A. The State Board of Education is the state agency designated to provide and establish the framework within which the community colleges may operate in Florida. Chapter 299.012, Florida Statutes, states that the State Board of Education shall consist of the governor, secretary of state, attorney general, comptroller, treasurer, commissioner of agriculture, and the commissioner of education. It further states that the governor shall be the chairman of the board and the commissioner of education shall be its secretary and executive officer. The state board is given responsibilities for community colleges in Chapter 230.75 -- 230.770, Florida Statutes, which includes the following specific responsibilities:

1. appoint state community college council;
2. prescribe minimum standards for community colleges;
3. approve planning and construction of facilities;
4. authorize the matriculation or tuition fees to be charged to students;
5. adopt regulations relating to preparation and approval of community college budgets;
6. adopt regulations for community college teachers relating to certification, tenure, leaves of absence of all types, including sabbaticals, etc.

- B. The State Community College Council is made up of seven members appointed in accordance with Chapter 230.751, Florida Statutes. The Council consists of seven prominent and representative citizens of the State appointed by the State Board of Education for four-year overlapping terms. Not more than one member shall reside in any community college district. The Council annually elects a chairman.

The Council has the responsibility for recommending statewide policy regarding the operation of the community colleges and determining ways and means to effect articulation and coordination of community colleges with other institutions subject to the approval of the State Board of Education. Specific duties of the State Community College Council are enumerated in Section 6A-8.041, State Board of Education Regulations.

- C. Department of Education. Chapter 229.75, Florida Statutes, provides that the Department of Education shall act as an administrative and supervisory agency under the direction of the State Board of Education. The law specifically details the functions of the Department as providing professional leadership and guidance, and in carrying out policies, procedures, and duties authorized by law or by the State Board of Education as necessary to attain the purpose and objectives of the school code.
- D. State Commissioner of Education. The Commissioner of Education, as Secretary of the State Board of Education, has both general and specific responsibilities relating to community colleges. The laws of the State, as well as State Board Regulations, specify that in addition to these general responsibilities for the community colleges, he shall approve budgets and act as executive officer of the State Board of Education relating to community college recommendations.
- E. District Board of Trustees is the corporate body created under statutes to govern and operate the community college. Specific duties and powers of boards of trustees are enumerated in Chapter 230.754, Florida Statutes.
- F. The Division of Community Colleges was organized in the Department in July, 1957, pursuant to a recommendation of the Community College Council. It operates on the same legal basis as do other divisions of the Department, (Chapter 229.77, Florida Statutes) and is responsible for the coordination of community college programs and the implementation of recommendations concerning the development of community colleges in Florida.
1. The authority and responsibility of the Division of Community Colleges and the State Community College Council are contained in the following Laws of Florida: Sections 20.15, 228.041, 229.031, 229.75 -- 229.78, 230.751 -- 230.774, Florida Statutes.

2. In accordance with Section 20.15, Florida Statutes, the State Board of Education has assigned to the Division of Community Colleges the powers, duties, responsibilities and functions necessary to insure the greatest possible coordination, efficiency and effectiveness of the Community College System of Florida.
3. Section 230.751, Florida Statutes, created the State Community College Council to advise the Division of Community Colleges. Section 6A-8.042, State Board of Education Regulations, provides that the activities of the Council shall be financed within the budget of the Division of Community Colleges.

In carrying out the assignment and responsibilities, the Division of Community Colleges finds its work distributed among three major avenues of effort:

1. The Division is charged with implementing the laws and regulations provided by the Legislature and the State Board of Education while serving these agencies of government in an advisory and informative capacity.
2. The Division also constantly maintains an effective dialogue with other divisions in the Department of Education in order to assure cooperation and insure the success of education at all levels throughout the state.
3. In its relationship to the community colleges, the Division places a major emphasis on its leadership role, rather than the regulatory aspect of this responsibility because such emphasis is necessary if the Division is to be a major contributor to the Federal-State-Local partnership in education at the community college level.

The Division stresses coordination and support, mainly as these are related to intermediate and long-range planning and implementation of educationally related programs. Essential to this philosophy are the following components:

1. recommendation to the State Board of Education of basic policies, directives, priorities, and targets, including recommendations on resource allocation, in coordination with other divisions of the Department of Education as needed to integrate educational development with the economic, cultural, and social development of the State;

2. planning, cooperation, and coordination with other divisions and state agencies in an attempt to smoothly implement budgets, to insure successful articulation of students, to maintain a unilateral and unduplicated effort in the area of vocational education, and to cooperate with other agencies in all matters relating to community colleges;
3. coordinated diagnosis and evaluation of the performance, problems, and the needs of the existing community college system;
4. translation of overall objectives and specific educational programs, projects, development plans, and the revision of plans in light of achievements and new developments; and,
5. implementation of plans, programs, and projects at the state, regional, and institutional levels, supported at all levels by financial and consultative assistance.

In carrying out its legal responsibilities under this philosophy, the Division exercises its leadership responsibilities and operates cooperatively with all of Florida's public community colleges as part of a total community college system. In so doing, emphasis is on the development of competency and expertise in the personnel of each community college, thereby supplementing the Division staff in carrying out its functions. This is the basis behind the development of a resource bank of other personnel in the individual colleges and in other divisions of the Department of Education who can provide consulting help in specific areas of education and management. Such consultants serve in an advisory capacity to those who are charged with specific responsibility for implementing programs at the institutional level, and consult in activities and areas such as planning, research, curriculum, accounting, management, public information, innovative practices, and staff and program development.

In order to carry out this philosophy, it is necessary that the Division have an adequate staff of highly qualified personnel to properly fulfill the requirement of the three-dimensional effort required of the Division. The objective of such a team approach is to provide a working relationship among the individuals within the Division so that improved leadership services can be provided to the individual community colleges.

The functions under which the Division activities can be grouped are: division administration; program planning, coordination, and evaluation; research and development; and administrative planning, coordination and operation.

- G. Council of Presidents. The president of each community college serves as a member of the Council of Presidents. He serves on the Council as long as he continues in his capacity as president of a college, or until the Board approves his successor. The Director of the Division of Community Colleges serves as permanent Chairman of the Council. The Council develops recommendations on matters which affect community colleges, and the Chairman of the Council transmits these recommendations to the State Community College Council and others as appropriate.
- H. Council of Academic Affairs. The Council of Academic Affairs consists of the chief academic officer(s), as appointed by the president, of each of the community colleges and the Administrator, Academic Affairs of the Division of Community Colleges, who is Chairman of the Council. The Council serves in an advisory capacity to the Council of Presidents. It develops recommendations of statewide concern relating to all academic matters, and the Chairman of the Council transmits these recommendations to the Council of Presidents for appropriate action.
- I. Council of Business Affairs. The Council of Business Affairs consists of the chief business officer, as appointed by the president, of each community college and the Administrator, Financial Affairs of the Division of Community Colleges, who is the Chairman of the Council. The Council serves in an advisory capacity to the Council of Presidents and develops recommendations relating to financial and business matters and submits them to the Council of Presidents for appropriate action.
- J. Council of Student Affairs. The Council of Student Affairs consists of the chief student personnel officer(s), as appointed by the president, of each of the community colleges and the Coordinator, Student Personnel Services of the Division of Community Colleges, who is the Chairman of the Council. The Council serves in an advisory capacity to the Council of Presidents. It develops recommendations of statewide concern relating to all student affairs matters and the Chairman of the Council transmits these recommendations to the Council of Presidents for appropriate action.
- K. The Florida Community College Conference. The conference was organized in 1964 by action of the Council of Presidents to promote and regulate intercollegiate activities as an integral part of the education program of the member institutions. Membership is institutional and is open to any Florida community college, public or private, which is accredited by the State Department of Education and/or the Southern Association of Colleges and Schools.

The Conference functions as a parent organization to such bodies as the Florida Community College Student Government Association; absorbs the activities of the former Florida Community College Athletic Association; and concerns itself with forensics competitions, informal sports and other matters common to community colleges.

At least one meeting of the Conference must be held each year and each member institution has one vote which is cast by its president or his designated proxy. Each institution is allowed two representatives who are appointed and certified in advance by the president of the member college and one of whom must be from a non-athletic area.

The state is divided into divisions (currently four) for the purpose of encouraging and coordinating all regional activities. There are approximately the same number of member colleges in each division and each is headed by a division secretary. In addition, there is a standing committee for each activity.

The work of the Conference is carried on throughout the year by an executive committee consisting of the four officers of the Conference, the four division secretaries, the executive secretary, ex officio, and the NJCAA Region VIII at least four times a year to receive reports and recommendations from the standing committees and the Division Committees and reports to the conference at its annual meeting in the spring of each year. Financial support is based on an annual assessment of each member college and depends on the size of FTE enrollments.

New Legislation.

The 1972 Session of the Florida Legislature enacted several laws pertinent to community colleges. Among the more significant are the following:

- A. A revisors law relating to the Florida School Code (72-221, Laws of Florida) granting greater flexibility to community colleges.
- B. A law deleting community colleges from certain personnel references applicable to kindergarten through grade 12. (72-221, Laws of Florida).
- C. A law requiring the Division of Community Colleges to work with the Division of Universities and the Division of Elementary and Secondary Education to study and recommend methods which would permit students to earn baccalaureate degrees in not more than nine quarters of academic work at the collegiate level. (72-313, Laws of Florida).

- D. A law requiring the Division of Community Colleges to work with other educational agencies to determine the feasibility of undertaking instructional television for credit at state supported community colleges and universities. (72-354, Laws of Florida).
- E. Chapter 72-169 and Chapter 72-199, Laws of Florida, provide for additional student assistance grants or loans for students attending community colleges as well as other public and private post secondary or vocational training centers including professional nursing diploma schools.

FINANCIAL SUPPORT

Florida has a state system of local, largely autonomous community colleges. Their financial resources are organized into eight different funds for management and accounting purposes. These funds, their purposes and the sources of their support are as follows:

FUND NAME	PURPOSE	SOURCE OF SUPPORT
General Current Fund	To account for the educational and general support activities of the college.	State-General appropriation; Other unrestricted local; Student Fees;
Restricted Current Fund	To account for specific educational and general support activities when "project" accounting is required by the one providing the financial support.	Federal Government; Philanthropic Grants
Unexpended Plant Fund	To account for site acquisition and improvement, building construction and renovation, and equipment and library books for new buildings.	State-License Tag Fees; State-Utility Tax Receipts; State-Bonding Program; General Current Fund Transfers; Federal Government
Debt Service Fund	To account for Long Term Indebtedness and its retirement.	State-License Tag Fees (CO & DS); State-Utility Tax Receipts.
Auxiliary Current Fund	To account for the activities of self-supporting auxiliary activities such as bookstore, food service, and student activity programs.	Sales and Services of Auxiliary Activities; Student Activity Fees.
Loan Fund	To account for the resources made available for loans to students.	Federal Government; Private Gifts; Local incidental funds
Scholarship Fund	To account for the resources made available for scholarships to students - not to be repaid to college.	Federal Government; State; Private Gifts
Agency Fund	To account for the resources of others which the college is holding in trust as an agent such as students' clubs and organizations.	None

Only the budgets for the first four funds listed above are submitted to the State Department of Education for approval. The Auxiliary Fund including the Student Activity Program must have budgets approved by the Local board of trustees. The Loan Fund and Scholarship Fund do not require budgets.

Funding the community colleges' operations is primarily a joint effort of state and student fees while construction and other capital improvements are the primary responsibility of the state. Following is an explanation of the various funding programs.

MINIMUM FOUNDATION PROGRAM

The basic state support for current operations of the community college is provided by the Minimum Foundation Program. This program was enacted by the 1947 Legislature and was based on the premise that every person deserves a minimum opportunity for an adequate education. When the program was initially enacted in 1947, the community colleges were included in the K-12 Minimum Foundation Program. Since then, it has been recognized that community colleges are functionally different institutions, thus the 1963 Florida Legislature established a separate Minimum Foundation Program for community colleges. The Minimum Foundation Program is contained in Sections 230.762 -- 230.767, Florida Statutes.

The cost of the Minimum Foundation Program is based upon a formula which takes into consideration the number of full-time equivalent students in average daily attendance (ADA), and the rank and experience of instructors. Full-time equivalent (FTE) enrollment is determined by the number of semester or quarter hours registrations in the fall and summer terms, plus the student attendance hours accomplished throughout the year.

The funding formula is:

1. Determine FTE (ADA). Divide fall student credit hour registrations for the previous year by 15. Divide attendance hours (non-credit adult and occupational) by 810. Add third term credit hours divided by 30 (semester) or 45 (quarter), and student attendance hours divided by 810.
2. Determine Basic Units. One unit for each 12 full-time equivalent student for the first 420 students, and one unit for each 15 full-time equivalent student over 420 students in other than occupational programs. One unit for each ten students in average daily attendance in occupational programs and compensatory education programs as defined by rules of the State Board of Education.
3. Determine Special Units. Add one Administrative and Special Instructional Service Unit (ASIS) for eight basic units and one Student Personnel Unit (SPS) for each 20 basic units.
4. Determine Total Instructional Units. Add Basic Units and Special Units.
5. Determine Regular Term Salaries. Distribute units according to number of positions within rank and contract status of instructors, and multiply units assigned to each rank times statutory value.

Rank I	(units x \$6700 - 7300)
Rank II	(units x \$6100 - 6700)
Rank III	(units x \$5700 - 6300)
Rank IV	(units x \$3900)
6. Determine Salaries Beyond Term. For special units multiply regular term salaries by 3.5%.
7. Determine Total Instructional Salaries. Add regular salaries and salaries beyond regular term.
8. Determine Staff and Program Development Funds. Multiply total instructional salaries (in step 7) by 5%.
9. Determine Amounts for other Current Expenses. Multiply total units (in step 4) by 1900. Add \$17,500 for first approved junior college in district and \$10,000 for each additional center approved by the State Board of Education.
10. Determine Amount for Transported Students. Multiply total number of transported students (FTE) by 30 x \$1250.
11. Determine state's portion of foundation program. Add amounts in steps 7, 8, 9 and 10.

	\$ AMOUNT FOR STATE SHARE MFP
	=

12. Plus recalculation. Determine present increase in FTE this fall over last fall. Apply percent increase to amount provided in step 11.

TOTAL STATE
SHARE MFP

Note: The 1972 Legislature amended the Foundation Program for the year 1972-73 by providing that FTE be determined by registrations in the current year and deleted the provision for recalculation (Items 1 and 12 above); deleting 3.5% for salaries beyond the regular term and adding 5% to the salaries for cost of living (Item 6 above); decreasing the amount for Staff and Program Development to 3% (Item 8 above); and, increasing Other Current Expense by \$363 per unit (Item 9 above).

Social Security and Retirement Matching Funds

Prior to 1967, the state paid the employer's matching share of retirement into the Employees' Retirement Funds. The 1967 Legislature appropriated funds to each agency to be used to pay the employer's share of retirement funds. For community colleges this amounted to \$500 per instructional unit. The 1972 Legislature included these funds in the MFP with other Current Expenses for the year 1972-73, (Step 9 above).

State Community College Program Fund

Effective July 1, 1973, state support for current operations of the community colleges will be provided by the Community College Program Fund in lieu of the Minimum Foundation Program. The determination of need to support the state program fund will be by analysis of actual course cost by field of study. The costs thus determined will be incorporated into a formula embracing the following concepts: (1) the proportion of funds from all sources -- state, matriculation and tuition fees, federal, etc.; (2) the cost factors between various categories of course offerings; and (3) higher costs per student in smaller institutions.

License Tag Fees (CO & DS) Article XII, Section 18, State Constitution

In 1952, a constitutional amendment set aside a portion of license tag fees to be used for distribution to county schools. This amendment was effective for 30 years and set aside \$400 for each instructional unit to be used for capital outlay projects and debt service in the public schools in Florida. In 1963, another constitutional amendment was approved by the people which extended this support until the year 200. An amount of \$400

for each instructional unit is earned from the first receipt of the automobile license tag fees. This amount is allocated to the counties for the community colleges in the amount related to the number of instructional units earned by the college. An administrative expense of 1.25 percent is deducted from the CO & DS funds earned by the college each year to be used for the payment of salaries and expenses of persons administering this section of the law. CO & DS funds are used for capital outlay or for debt service and must be spent on projects in order of priority as approved by the State Board of Education.

Higher Education Bonds (JCC) Article XII, Section 19, State Constitution

Higher Education Bonds were approved by constitutional amendment in December, 1963, and earmarked for capital construction at state universities, community colleges and vocational schools. These bonds are to be retired from the proceeds of revenues derived from a one and one half percent (1½%) gross utility receipt tax.

The Division of Community Colleges uses a formula in which size and utilization standards are applied to the projected enrollment of each institution to determine the amount of space needed. Current inventories are deducted and the net space needed is multiplied by an estimated construction cost to determine the funds needed for construction. Size and utilization standards have been established for each type of space needed, i.e., classrooms, laboratories, libraries, etc. Provision for variation in size of institutions is made by using different factors for colleges with projected enrollment of 0-1000, 1000-2000 and over 2000. As funds become available in the Junior College Construction Fund, they are allocated to the various community colleges on the basis of priorities established to meet the most pressing needs as determined by the formula.

These bonds are administered by the State Board of Administration.

Before these funds are available for community college construction, certain requirements must be met. A survey must be made under the supervision of the State Department of Education to establish the needs for community college facilities. A description of the proposed projects based upon the survey must be submitted to the Commissioner of Education for review. The proposed building program along with the recommendations of the Commissioner must then be submitted to the State Board of Education for approval. After projects have been properly budgeted and plans and specifications approved, disbursements are made to the colleges upon their request to meet construction requirements.

Accounting Procedures

Section 6A-8.11, State Board of Education Regulations states that: Financial records and accounts for each community college shall be kept in accordance with the "Accounting Manual for Florida's Public Junior Colleges, 1968" and subsequent published revisions as approved by the Director of the Division of Community Colleges.

Year-Round Operation

Sections 6A-8.78, 6A-8.172 (2) and (3), State Board of Education Regulations, contain sections of regulations relating to community colleges authorized by the State Board to operate on a year-round basis. These sections provide that upon recommendation by the Junior College Council and approval of the Director of the Division of Community Colleges, community colleges may operate throughout the year and be authorized to receive state funds for instruction beyond the 180 days otherwise required. They also may contract for instructional staff members for whatever length of time is approved by the State Board as necessary to operate on a year round basis. Such contracts may be for as little as nine months or for as much as twelve months, depending upon the plan submitted to and approved by the State Board of Education. The State Board has adopted the following

three criteria as basis for evaluation and approval of plans of year-round operation for community colleges:

1. The calendar must provide for at least 45 weeks of instruction. Two hundred twenty (220) days of instruction, exclusive of registration and orientation, or two hundred ten (210) days of actual classroom instruction, exclusive of registration, orientation, and examinations, has been interpreted as providing 45 weeks of instruction time.
2. The calendar must provide a reasonable amount of coordination with the calendars of the state university system.
3. Course sequences must be provided on a year-round basis insofar as possible. This is necessary so that students may enter at varied times throughout the year.

ARTICULATION

During the six-year period from 1963 to 1969, the number of community college students transferring to upper-division study in the State University System increased from 1,933 to 6,694. In the near future it is likely that more than half the students enrolled in the upper division of the state universities will have a community college origin. This changing student mix at the upper-division level of the state universities has intensified problems of articulation that remain unsolved.

The Division of Universities and the Division of Community Colleges have jointly adopted an Articulation Agreement requiring the two divisions jointly to (1) recommend specific areas of agreement between community colleges and state universities; (2) set forth criteria for the awarding of the Associate in Arts degree; (3) define the Associate in Arts degree as a component of a baccalaureate degree; (4) provide for a continuous evaluation and review of programs, policies, procedures, and relationships affecting transfer of students; and (5) recommend such revisions as are needed to promote the success and general well-being of the transfer student.

1. The provisions of the General Education Agreement of 1959 are reaffirmed. This Agreement provides that:

Each public institution of higher education in Florida, i.e., each state university and each community junior college, is encouraged to foster and promulgate a program of general education. This basic program for students working toward a baccalaureate degree should involve not fewer than 36 semester hours of academic credit.

The institutions are encouraged to exchange ideas in the development and improvement of programs of general education. The experience already gained in the established state universities and community junior colleges will be of value. While the institutions are to work cooperatively in the development and improvement of general education programs, each institution has the continuing responsibility for determining the character of its own program.

After a public institution of higher learning in Florida has developed and published its program of general education, the integrity of the program will be recognized by the other public institutions in Florida. Once a student has been certified by such an institution as having completed satisfactorily its prescribed general education program, no other public institution of higher learning in Florida to which he may be qualified to transfer will require any further lower division general education courses in his program.

2. At the core of any agreement between the community colleges and the State University System designed to establish an efficient orderly transfer process for community college students is the mutual acceptance of the nature and purpose of the Associate in Arts degree. This degree, which is the basic transfer degree of Florida community colleges, and which is the primary basis for admission of transfer students to upper division study in a state university, shall be awarded upon:
 - a. completion of 60 semester hours (90 quarter hours) of academic work exclusive of occupational courses and basic required physical education courses,
 - b. completion of an approved general education program of not fewer than 36 semester hours (54 quarter hours), and
 - c. achievement of a grade point average of not less than 2.0 in all courses attempted, and in all courses taken at the community college awarding the degree, provided that only the final grade received in courses repeated by the student shall be used in computing this average. The grade of "D" will be accepted for transfer (provided the overall grade average does not drop below the prescribed 2.0 level), and will count towards the baccalaureate in the same way as "D" grades obtained by students enrolled in the lower division of state universities, i.e., credits in courses transferred with "D" grades will count towards the credits required for the baccalaureate; however, it is at the discretion of the department or college of the university offering the major as to whether courses with "D" grades in the major may satisfy requirements in the major field.

3. The baccalaureate degree in all state universities shall be awarded in recognition of lower division (freshmen-sophomore) combined with upper division (junior-senior) work. The general education requirement of the baccalaureate degree shall be the sole responsibility of the institution awarding the Associate in Arts degree in accordance with the General Education Agreement of 1959. If, for any reason, a student has not completed an approved general education program in a community college prior to his transfer to a state university, the general education requirement shall become the responsibility of the university.

4. Lower division programs in all state institutions enrolling freshmen and sophomores may offer introductory courses which permit the student to explore the principal professional specializations that can be pursued at the baccalaureate level. These introductory courses shall be adequate in content to be fully counted toward the baccalaureate degree for students continuing in such a professional field of specialization. However, the determination of the major course requirements for a baccalaureate degree, including courses in the major taken in the lower division, shall be the responsibility of the state university awarding the degrees.

5. Students receiving the Associate in Arts degree will be admitted to junior standing within the University System. The specific university that accepts the student will be determined by the preference of the student, by the program of major concentration and by the space available within the specific institution. If, because of space or fiscal limitations, any state university must select from among qualified community college graduates, its criteria for selection shall be reported to the coordinating committee described in item 11.

6. Other associate degrees and certificates may be awarded by a community college for programs which have requirements different from the Associate in Arts, or a primary objective other than transfer. Acceptance of course credits for transfers from such degree or certificate programs will be evaluated by the senior level institution on the basis of applicability of the courses to the baccalaureate program in the major field of the student. Each state university is encouraged to develop admission policies that will consider all factors indicating the possibility of success in its upper division of transfer students who have not earned the Associate of Arts degree.

7. Each university department shall list and update the requirements for each program leading to the baccalaureate degree and shall publicize these requirements for use by all other institutions in the state.

8. Each state university shall include in its official catalog of undergraduate courses a section stating all lower division prerequisite requirements for each upper division specialization or major program. The sections of the catalog may also list additional recommended courses but there shall be no ambiguity between statement of requirements for all students for admission to upper division work on the one hand, and prerequisites and other requirements for admission to a major program on the other. All requirements for admission to a university, college, or program should be set forth with precision and clarity. The catalog in effect at the time of the student's initial enrollment in a community college shall govern lower division prerequisites, provided that he has had continuous enrollment as defined in the university catalog.
9. Each institution shall keep a complete academic record for each student. The coordinating committee shall develop a standard form for recording the academic performance and credits of students. Each transcript shall include all academic work for which a student is enrolled during each term; the status in each course at the end of each term, such as superior, average, incomplete, or unsatisfactory; all grades and credits awarded; and a statement explaining the grading policy of the institution.
10. Experimental programs in all institutions are encouraged. A community college and a university wishing to engage in a joint specific experimental program which varies from the existing transfer policy shall report such a program to the coordinating committee prior to implementation and shall keep the committee informed of the progress and outcome of such experimentation. Proposed experimental programs which would have systemwide implication or would affect transfer to more than one institution must be approved by the coordinating committee prior to implementation. All experimental programs shall be reported in writing to the coordinating committee including the purpose, design, the participants, the duration, and the results of the experiment. The final report shall be submitted not later than six months following the termination date of the experiment.
11. A community college-university coordinating committee will be established to review and evaluate current articulation policies and formulate additional policies as needed. The coordinating committee shall be composed of seven members, three of whom shall be appointed by the Director of the Division of Community Colleges, three by the Chancellor of the State University System, and one by the Commissioner of Education. This committee shall have a continuous responsibility for community college-university relationships and shall:
 - a. authorize professional committees or task forces consisting of representatives from both levels of higher education to facilitate articulation in subject areas.

- b. conduct a continuing review of the provisions of this agreement,
- c. review individual cases or appeals from students who have encountered difficulties in transferring from a community college to a university. Decisions reached by the coordinating committee will be advisory to the institutions concerned,
- d. make recommendations for the resolution of individual issues and for policy or procedural changes which would improve community college-university articulation system-wide,
- e. establish the priority to be given research conducted cooperatively by the Division of Community Colleges and the Division of Universities in conjunction with individual institutions. Such cooperative research will be encouraged and will be conducted in areas such as admissions, grading practices, curriculum design, and follow-up of transfer students. Systemwide follow-up studies should be conducted and results of these studies will be made available to all institutions at both levels for use in evaluating current policies, programs, and procedures,
- f. review and approve experimental programs as provided in item 10 of this agreement, and
- g. develop procedures to improve community college-state university articulation by exploring fully specific issues such as academic record form, general education requirement, unit of credit, course numbering systems, grading systems, calendars, and credit by examination.

On June 26, 1972, the Articulation Coordinating Committee adopted a new agreement relative to CLEP, a credit by examination program. The addition to the Articulation Agreement is stated as follows:

RECOMMENDATIONS

The Committee makes the following recommendations:

I. As to the CLEP General Examinations

a. Transferability of credit under terms of the Articulation Agreement is mandatory provided that the institution awarded the credit at the 50th percentile level of the combined men-women sophomore norms, with no letter grade or quality points assigned.

b. Not more than 6 semester (or 9 quarter) credits are to be transferred in each of the five areas of the General Examinations (English, Humanities, Mathematics, Natural Sciences, Social Sciences - History).

II. CLEP Subject Examinations: Transferability of credit under the terms of the Articulation Agreement is mandatory provided that the institution awarded the credit at the following scores, or higher, on the appropriate subject matter examinations, with no letter grades or quality points assigned.

<u>Examination</u>	<u>Recommended score for awarding credit</u>	<u>Length of course for which the examination was designed (number of semesters)</u>	<u>Recommended Maximum Semester Credit</u>
American Government	47	1	3
American History	50	2	6
American Literature*		2	6
Analysis & Interpretation of Literature	49	2	6
Biology	49	2	6
College Algebra	50	1	3
College Algebra-Trigonometry	49	1	3
Computers & Data Processing	46	1	3
Educational Psychology	47	1	3
Elementary Computer Programming-FORTRAN IV*		1	3
English Composition	48	2	6
English Literature	45	2	6
General Chemistry	48	2	6
General Psychology	47	1	3
Geology	49	2	6
History of American Education	46	1	3

<u>Examination</u>	<u>Recommended score for awarding credit</u>	<u>Length of course for which the examination was designed (number of semesters)</u>	<u>Recommended Maximum Semester Credit</u>
Human Growth & Development	47	1	3
Introduction to Business Management	47	1	3
Introductory Accounting	50	2	3
Introductory Business Law	51	1	3
Introductory Calculus	48	2	6
Introductory Economics	48	2	6
Introductory Marketing	48	1	3
Introductory Sociology	46	2	6
Money & Banking	48	1	3
Statistics	49	1	3
Tests & Measurements	46	1	3
Trigonometry	49	1	3
Western Civilization	50	2	6

*These examinations and the scores recommended for awarding credit will be available later.

The score levels are the mean scores achieved by "C" students in the national norm sample and they are in accord with the recommendations of the Commission on College Level Examinations of the American Council on Education. The semester credit recommendations are not those of this task force, but are derived from those of the Commission on College-level Examinations. Further, it is recommended that not more than 45 semester (67.5 quarter) credits be transferred in the area of the subject examinations.

III. Because CLEP credit is regarded in the same category as transfer credit, no matter how earned, the maximum transferability of credit under CLEP, both General and Subject examinations combined, is 45 semester (or 67.5-quarter) credits. This is in accord with common practice that 25% of the Associates in Arts degree work must be awarded by the institution granting the A.A. degree.

IV. The institution awarding CLEP credit must specify for what course it is being awarded. The standard policies of the institution prohibiting credit for overlapping courses will apply.

V. The foregoing recommendations are adopted for a three-year period and during this period studies shall be undertaken jointly by the Community College System and the State University System. These studies should include students who have transferred or may transfer credits awarded on the basis of CLEP General Examinations scored at the 25th percentile or higher, and not be limited to students who have achieved the recommended scores.

These studies should reveal the number of students taking each of the various CLEP Examinations, the scores earned by the examinees, the number of credits received and the areas and courses in which such credit was awarded, and other data indicating the academic progress of the examinees.

Although the studies should continue through the three-year period, a complete initial report of results should be reported to the Articulation Coordinating Committee by August 1, 1974. The Committee will utilize these results as a basis for future recommendations concerning CLEP credit.

VI. Any implementation of a uniform CLEP percentile restriction of the Agreement will have gone into effect September 1, 1972 and will not affect CLEP credit awarded by institutions prior to the effective date of implementation.

In addition to the CLEP agreement, and as a part of the responsibility of the Articulation Agreement Coordinating Committee, a common transcript form has been developed and recommended for use by all Florida public community colleges and universities.

OCCUPATIONAL AND GENERAL ADULT EDUCATION PROGRAMS

Section 6A-8.52 of State Board of Education Regulations provides that: "The Commissioner of Education, after consultation with the board of trustees and the district school boards of counties contributing to the support of a community college shall determine the respective responsibilities of the community college and other educational agencies for occupational and general adult education programs."

VOCATIONAL EDUCATION

Responsibilities at the district level for vocational education are delineated in Section 6A-8.56 of the State Board of Education Regulations.

Specifically these responsibilities and their assignments are as follows:

- (1) Each school board has primary responsibility for assuring that vocational education, as provided in Section 6A-8.58 of these regulations, is available to students in grades 1 through 12 and to youths under 19 years of age who left school before high-school graduation.
- (2) Each post-secondary area vocational-technical center is assigned to a school board.
- (3) Each school assigned a post-secondary area vocational-technical center established in accordance with Section 230.63, Florida Statutes, shall have primary responsibility for non-college credit courses and certificate vocational programs for youths and adults of all ages residing in the service area of that center as approved by the State Board of Vocational Education.

- (4) Each community college with a department designated as an area vocational education school by the State Board for Vocational Education under the provisions of the Vocational Education Act of 1963, Public Law 88-210 or as amended by Public Law 90-576, shall have primary responsibility for certificate and non-college credit vocational education programs and courses and also for college credit courses and associate degree vocational programs for youths and adults 19 years of age or older who reside in the service area of that area school as approved by the State Board for Vocational Education.
- (5) Each community college not having a department designated as an area vocational education school shall have primary responsibility for associate degree and certificate vocational programs based on college credit courses and for short courses, institutes, or similar activities, related to the vocational programs and responsibilities of that college.
- (6) Community colleges with departments designated as area vocational education schools may, with the approval of the board of trustees and upon the request of a school board in its vocational service area, provide on behalf of that school board vocational education programs and courses for youths under 19 years of age who left school before graduating from high school and for high school students in grades 10-12.
- (7) A board of trustees administering a community college which does not have a department designated as an area vocational school may enter into a cooperative agreement with a school board which operates an area vocational-technical center designated by the state board for vocational education to provide vocational-technical education courses which a community college will accept for college credit or for the community college to use the facilities of the area vocational-technical center for instructional services.
- (8) Any school board or any community college board of trustees may enter into contractual or cooperative agreements with any other school board or community college board of trustees to provide specific vocational-technical education services or courses to assist in meeting the vocational education need of the persons to be served.
- (9) School boards and community college boards of trustees are responsible for avoidance of unwarranted duplication of programs and services and for articulating and coordinating vocational educational programs, services and activities, including counseling for persons served by the respective boards, based upon written agreements between school boards and community college boards of trustees. Such articulation and coordination shall be accomplished in the establishment of a local coordinating council as set forth in Section 6A-8.57 of these regulations. School boards and community college boards of trustees are responsible for making comprehensive vocational programs available to all residents in

their areas and are authorized to use any appropriate means to that end, including expenditures for advertising the availability of programs and courses.

- (10) None of the above provisions shall contradict or supersede existing agreements between school boards, area centers and community colleges concerning vocational education as provided in Chapter 70-211, Laws of Florida.

GLOSSARY

Activities Related to Instruction

This function includes all organizational units organized and operated in connection with instructional departments and conducted primarily for the purpose of giving professional training to students.

Auxiliary Fund

This fund is used to account for activities which are intended primarily to provide non-instructional services for sale to students, staff and/or college departments and which are intended to be self-supporting.

Agency Fund

This fund is used to account for resources received and held by a college as custodian or fiscal agent for others, such as funds of students or staff organizations and clubs, student activities, individual students or faculty members; temporary revenue and expenditure accounts which serve as "clearing" accounts for the college such as a revenue clearing bank account or a college payroll bank account.

Below High School

Those students enrolled in literacy education courses.

College Level--AA Degree--Freshman

Any student enrolled in college level courses who has as an educational objective an AA or higher degree and who has earned less than 24 semester (36 quarter) hours of college work at time of registration.

College Level--AA Degree--Sophomore

Any student enrolled in college level courses who has as an educational objective an AA or higher degree and who has earned 24 or more semester (36 quarter) hours of college work at time of registration.

College Level--AS Degree--Freshman

Any student enrolled in a planned program of college level courses requiring at least two years but less than four years for completion which culminates in the awarding of an Associate in Science degree and who has earned less than 24 semester (36 quarter) hours of college work at time of registration.

College Level--AS Degree--Sophomore

Any student enrolled in a planned program of college level courses requiring at least two years but less than four years for completion which culminates in the awarding of an Associate in Science degree and who has earned 24 or more semester (36 quarter) hours of college work at time of registration.

College Level--Non-Degree--Certificate

Any student enrolled in a sequential program of study in college-level courses not culminating in an associate degree but in which a certificate or other formal award is made.

College Level--Non-Degree--Non-Occupational

Any student enrolled in college level courses which are normally acceptable by other colleges at full (or virtually full) value toward a baccalaureate degree. These students are not working toward a certificate or an Associate of Arts degree.

College Level--Non-Degree--Occupational

Any student enrolled in a curriculum or courses designed to prepare students for immediate employment. The courses may or may not transfer to four-year colleges. Courses would tend not to transfer more than to transfer. Students would not be working toward a certificate or AS degree.

Debt Service Fund

This fund is used to account for the long-term debt of a college and for the resources which will be used to retire the debt and pay the interest on the obligation(s).

Full-time--Non-Credit

Is defined as 25 clock hours attendance per week.

Full-time--Credit Student

Any degree credit student enrolled for 12 semester hours or more.

General Administration

Within this function will be classed the executive and supporting administrative organizational units which provide service to the college as a whole.

General Current Fund

This fund is used to account for resources that are available for the general financial requirements of the college, the only restrictions being those imposed by law and the budget.

The organizational units to be financed through this fund are those which are directly concerned with the operation and support of the educational program.

General Expense

This function will include all organizational units, exclusive of those in General Administration and Physical Plant, which benefit the institution as a whole and which cannot be logically classed in any other function.

High-School-Students

Those students taking courses that lead to high school diplomas--vocational, Carnegie Units, general equivalency.

Investment in Plant Fund

This fund is used to account for the cumulative costs of plant assets.

Instruction - Adult and Other

Within this function shall be placed organizational units designed to provide services, courses and programs which are not part of University Parallel and Occupational Instruction. This will include the extension and community service type activities.

Instruction - Occupational

Within this function shall be placed organizational units designed to provide technical, vocational and semi-professional training.

Instruction - University Parallel

Within this function shall be placed all administrative and instructional organizational units of the college providing instruction in general and liberal education which is equivalent to the first two years instruction at a 4-year institution of higher learning.

Learning Resources

Under this function are placed those organizational units which provide for storage, distribution and use of educational materials throughout the entire college.

Loan Fund

This fund is used to account for resources which are available for loan to students. Where both principal and interest are lendable, they are placed in this fund. If only the income is loanable, the principal is included in the endowment section of the Scholarship and Endowment Fund, while the cumulative income is transferred to the Loan Fund.

Part-time--Credit Student

Any degree credit student enrolled for less than 12 semester hours.

Post-High-School--General Adult Education--Non-Occupational

Any student enrolled in below-college-level, non-occupational course/s and who is not working toward a high-school diploma.

Post-High-School--Vocational--Certificate

A student enrolled in a sequential program of study in non-college-level courses in which a certificate or other formal award is made. A sequential program is normally considered to be one year of full-time attendance or its equivalent in part-time attendance in which a formal award is made, i.e., certificate, transcript noting completion, etc.

Post-High-School--Vocational--Non-Certificate

A student enrolled in non-college-level vocational courses in which no formal award or certificate is granted other than end-of-course certificate.

Operation of Physical Plant

Within this function should be included those organizational units which are responsible for the operation and maintenance of the institution's physical facilities.

Restricted Current Fund

This fund is used to account for resources that are available for the operation and support of the educational program but which are restricted as to their use by an outside agency or person.

Scholarship and Endowment Fund

This fund is used to account for two types of resources -- scholarship funds and endowment funds.

Scholarship funds can be defined as those resources available for award to students which are not in payment of services rendered to the college and will not require repayment to the college.

Endowment funds can be defined as those resources, the principal of which shall be maintained inviolate to conform with restrictions placed thereon by the donor or other outside agency. Generally, only the income from these funds may be used.

A Sequential Program is normally considered to be one year but less than two years in which a certificate is awarded, or transcript notes completion, etc.

Student Services

Within this function will be classed the organizational units which are primarily concerned with providing services for the students.

Unexpended Plant Fund

This fund is used to account for resources that are available for the acquisition or construction of physical property to be used for institutional purposes and resources designated for the major repair and/or replacement of institutional property.
