ABSTRACT
        The purpose of the American Samoa program, Upgrading
Language Abilities (ULA) funded under Title I Elementary Secondary
Education Act, is to raise the English language proficiency of
educationally deprived high school students to the point where they
can successfully compete with native speakers in an English medium
educational system unhindered by inadequate abilities in English.
This report covers 1973-74 operations. All four high schools in
American Samoa are involved in ULA. The program is administered by
the Title I staff through the Secondary Division and the Division of
Instruction. There are about 1700 students in the program, 36
teachers and 34 classrooms. Each high school has a teacher resource
center for the ULA program. ULA students receive 90 minutes of
instruction daily in addition to their other classes. The scope of
ULA encompasses several broad areas: classroom instruction for second
language speakers, curriculum development peculiar to Samoan
students, special instructional materials for Samoa, and teacher
training. Teachers are involved in continuous inservice training to
increase their competencies to teach students who speaks English as a
second language. Considerable progress was made during fiscal years
1973 and 1974 in designing a system for continuously assessing
characteristics of the ULA program. (Author/JM)

UPGRADING LANGUAGE ABILITIES

LIST OF TABLES

PREFACE

This document is the 1973-74 evaluation report of the ESEA Title I project, Upgrading Language Ability. It has been prepared in accordance with federal government requirements and guidelines relative to ESEA Title I.

The underlying principle guiding the ULA evaluation is to provide useful information to individuals requiring it for effective decision making.

An abstract briefly summarizing the major activities and findings of the evaluation has been prepared to give the reader an overview of the report.

ABSTRACT

The purpose of the American Samoa Title I Program,
Upgrading Language Abilities, is to raise the English language
proficiency of educationally deprived high school students
to the point where they can successfully compete with native
speakers in an English medium educational system unhindered
by inadequate abilities in English. The ULA goals and objec-
tives are consistent with the philosophy and goals of the
American Samoa Department of Education.

This evaluation report covers the 1973-74 project oper-
ations. The report is addressed primarily to American Samoa
Department of Education personnel, the Title I Advisory
Council, and the funding authority.

ULA design and program objectives were based upon several
needs assessment studies conducted in American Samoa by
educational experts in language learning and development,
curriculum and instruction, learning theory, instructional
media, and teacher training. The design of ULA evolved
through meetings with parents, community representatives,
local teachers, and administrators.

All four high schools in American Samoa -- Faga'itua,
Leone, Samoana, and Manu'a -- are involved in ULA. The pro-
gram is administered by the Title I staff through the Secon-
dary Division and the Division of Instruction. There are
about 1,700 students in the program, 36 teachers, and 34
classrooms. Each high school has a teacher resource center

for the Upgrading Language Abilities program. ULA students receive 90 minutes of instruction daily in addition to their other classes.

The scope of ULA encompasses several broad areas: classroom instruction for second language speakers, curriculum development peculiar to Samoan students, special instructional materials for Samoa, and teacher training.

Except for the physical facilities, some classroom supplies, and counseling and administrative services in the high schools, the Upgrading Language Abilities program is funded entirely out of ESEA Title I funds.

ULA materials are still in various developmental stages and undergoing constant revision based upon formative feedback from teachers and students. Not all teachers use the program materials; some report problems in using them; some use commercially available materials and produce their own supplementary materials. Teachers are involved in continuous inservice training to increase their competencies to teach students who speak English as a second language.

Considerable progress was made during FY 73 and FY 74 in designing a system for continuously assessing characteristics of the Upgrading Language Abilities program. The Government of American Samoa Computer Center increased its capacity and capability to the point that instruments can be machine scored and analyzed, and data storage and retrieval is now available. Several computer programs are on hand to facilitate data processing, analysis, storage, and retrieval.

3

Descriptive data about ULA students and staff have been gathered.

The product evaluation examined the effects of seven predictor variables on one criterion variable, the English Structure Test (EST). The predictor variables included in the evaluation were: grade level, language level, use of project materials, teacher's degree, teacher's sex, teacher's level of certification, and teacher's experience as a ULA teacher. Data were analyzed using double and triple analysis of variance. It was found that mid level language student; who used project materials scored significantly higher (p. < .01) than students who did not use the materials. Further, it was found that 10th and 12th grade classes in 1974 scored significantly higher than the same grade levels for 1973, indicating a growth in language proficiency in those two classes. This seems to suggest that a positive influence of the ULA instructional variable exists.

Data analysis also suggests that teacher predictor variables of educational level, certification, sex, or experience as a ULA teacher are not significantly related to pupil performance.

INTRODUCTION

A Title I Program was initiated in 1970 to upgrade
language abilities (ULA) of secondary students in American
Samoa. This report discusses the program's background,
contains a description of its many components, summarizes
activities and accomplishments for FY 74, displays feedback
and evaluation data relative to program impact, and lists
recommendations for improving the program.

Purpose

The American Samoa Title I program, Upgrading Language
Abilities (ULA), was initiated in 1970 to improve the lan-
guage abilities of educationally deprived high school stu-
dents. Specifically, the goal of ULA is to raise the English
language proficiency of target students to the point where
they can compete successfully with native speakers in an
English medium educational system unhindered by inadequate
abilities in English. The students should achieve these
English language skills without diminishing respect for
Samoan traditions, culture, and language. The ULA goal and
objectives are consistent with the philosophy and goals of
the American Samoa Department of Education.[1]

---

Territory of American Samoa. 1973-74

Background.

The single most difficult problem facing educators in American Samoa has been that of language development. Students grow up in a society that employs two languages -- Samoan and English. Samoan tends to be the predominant tongue used in the home while English is the language used in the classroom. As in any similar situation, academic progress suffers from this dual language system.

Teacher skills at both the elementary and secondary levels have been generally limited. Because the elementary staff is almost totally indigenous, students learn much of their English from non-native speakers. These teachers often lack sufficient training in English to recognize their own errors. As a consequence, students entering high schools in American Samoa often have been confused by conflicting language samples. Although there are many stateside teachers in the secondary schools, the shortage of proficient, fluent, indigenous teachers persists in that setting also.

Test scores obtained between 1964 and 1970 indicated that impressive gains were made by elementary children in their abilities to speak and understand English. The results of secondary language instruction were less impressive, however. The Science Research Association (SRA) tests showed ninth grade students in 1969-70 to be about three academic years below the ability of their mainland counterparts. Twelfth grade students in 1969-70 had slipped to about six years behind. While scores based on stateside

norms probably underestimate the true ability of Samoan
pupils, the data generally indicated that students were
making little progress in language ability during their four
years of high school.

Three task forces of educational experts in language
learning and development, curriculum and instruction, in-
structional media, and teacher training conducted needs
assessment studies in American Samoa in 1970 and 1971.[2]
The design and program objectives of ULA are based on these
studies and evolved through meetings with parents, community
representatives, local teachers, and administrators.

Overview of the Project

The scope of ULA encompasses several broad areas:
classroom instruction for second language speakers, curricu-
lum development peculiar to Samoan students, special instruc-
tional materials for Samoa, and teacher training.

All four high schools in American Samoa are involved in
ULA. The program is administered by the Title I staff
through the Secondary Division and the Division of Instruc-
tion. There are about 1,700 students in the program, 36

ment of Education, Territory of American Samoa. July 1970.

Samoa Supplementary Report. University of Hawaii-Samoa
Contract. Department of Education, Territory of American
Samoa. 1971.

teachers, and 34 classrooms. Each high school has a teacher
resource center for the ULA program. In addition to their
other classes, ULA students receive 90 minutes of instruction
daily in English-as-a-Second-Language (ESL) and Language
Arts. Teachers are involved in continuous inservice training
to improve their competencies to teach students who speak
English as a second language.

Some instructional materials for the ULA program were
purchased stateside. Locally develop _ and published
materials include a complete handbook for Language Arts
classes, an extensive series of student exercises cross-
referenced to the handbook, a series of special texts, This
Way Up, for the ESL classes, and supplementary exercises for
this series. In 1973 not all ULA teachers used the program
materials. Some reported problems using them. The materials
are still in various developmental stages and undergoing
constant revision based upon formative feedback from teachers
and students.

Except for the physical facilities, some classroom
supplies, and counseling and administrative services in the
high schools, the ULA program is funded entirely out of ESEA
Title I funds.

Development of instructional materials and inservice
training continued in 1973-74. During FY 73, the Title I
staff developed instruments that were used for product
evaluation. However, the instruments were available during
FY 73 to administer as single-group post tests only and,

therefore, change in student performance could not be
measured. Considerable progress was made during FY 74 to
design a system for continuously assessing characteristics
of the ULA program utilizing the increased capacity and
capability of the Government of American Samoa Computer
Center. This effort was continued through FY 74.

14a

PROJECT DESCRIPTION

This section presents descriptive information about
each component of the Title I ULA program. The following
components are described: rationale, community, student
population, organizational structure, project goals and
objectives, instruction, instructional materials, physical
facilities and equipment, instructional and administrative
staff, staff development, and project costs.

Rationale and Theory

The learning principle that provides the basis for the
ULA program is that students can become proficient in a
second language if they are provided interesting materials,
motivating classroom activities, and opportunities to
reinforce what they learn through imaginative and creative
assignments.

ULA Student Target Group

The ULA target group is defined as Samoan students in
grades 9-12 attending high school in American Samoa, whose
education is hindered by a lack of proficiency in English.
A student is considered to be "hindered by a lack of pro-
ficiency in English" if he fails to meet the standards for
exemption from ESL defined in the English Language Curricu-
lum Guide (The Secondary English Program) Department of
Education, American Samoa.

15

These standards require a score on a standardized test of English Language Proficiency comparable to the scores required by United States colleges and trade schools for exemption from ESL, reading knowledge of 70 percent of the 5,000 most frequently occurring English words, and oral/aural proficiency approximately equivalent to United States Foreign Service Scales 5-3. Table 1 presents information about the students.

TABLE 1

Estimated Distribution ESL Students

	School							
	Faga'itua N=311		Leone N=441		Samoana N=672		Total N=1424	
Characteristic	f	P	f	P	f	P	f	P
Grade Level								
9th	85		119		198		402	
10th	62		136		119		317	
11th	71		68		113		252	
12th	-.8		68		107		223	
ESL Level								
High	92		64		130		286	
Middle	132		229		293		654	
Low	42		98		114		254	
No response or ESL exempt	45		50		135		230	

16

Most students use English only sometimes during out-of-class conversations while only 2 percent reported using English often. Twenty-three percent of the students reported they seldom used English. Most students are assigned to middle level ESL classes.

Organizational Structure

The American Samoa Department of Education is responsible for the free public education of all residents from early childhood through post-secondary, adult programs. This responsibility is not delegated to villages, counties, or local government districts. There are no "school districts" other than the one whole territory.

The Department is administered by the Director of Education and the Territorial Board of Regents, an advisory board appointed by the Governor of American Samoa.

Budgeting and accounting for the Department is done primarily by division, including Early Childhood Education, Elementary Instruction, Secondary Instruction, Instructional Television, and the Community College. The various schools are not separately budgeted.

All recruitment and hiring for the Department is done by the central administrative staff, and the divisions assign personnel to the various schools on the basis of need.

Curriculum in the elementary and secondary schools is determined by interdivisional curriculum standing committees and published in the form of curriculum guides. Principals

are responsible for ensuring that teachers follow the pre-
scribed curriculum. Further uniformity of educational
opportunity is provided for through regularly scheduled
meetings of all principals within each division.

The administration of ESEA Title I Grant Awards is
greatly simplified because of the above "single district"
structure of the Department. It is further simplified be-
cause to date only one project has been funded. That one
project has dealt with the single most critical need as
determined in 1970 and confirmed by the Parent Advisory
Council in 1972. The identified need is for students to
manifest greater English language proficiency at the secon-
dary level.

The position of the ESEA Title I staff in the organiza-
tional structure of the Department of Education has not been
clearly defined. The most appropriate and effective position
is still a matter of some discussion. Table 2 shows an
approximation of the roles exercised during FY 74.

Title I Advisory Council. The basis for involving
parents and other American Samoans in planning, implementing,
and assessing the program in 1973-74 was the Title I Advisory
Council. In turn, members of this Council have a responsi-
bility to encourage the involvement of others and to present
their views and comments.

The role of the Title I Advisory Council is to provide
for active and significant community involvement in program
planning, implementation, and assessment. The Council is

_____ Direct Supervision

-------------- Cooperation, advice, limited supervision

19

scheduled to meet at least four times a year to carry out
these roles:

1. Provide information concerning educational
    needs. This function was carried out informally
    in the original planning of the program.
    Organization of the Advisory Council provides
    the Department of Education with a method to
    monitor this input continuously and systematically.

2. Participate in proposal development. The Title I
    plan was reviewed by the Advisory Council.

3. Act as a hearing group to receive suggestions.
    The agenda of Council meetings regularly pro-
    vides the opportunity for interested citizens
    to express their views and suggestions. The
    Council chairman is responsible for recording
    these comments and submitting them to the
    program staff.

4. Disseminate information on the program to
    others. Members of the Council provide liaison
    between the program staff and the community.
    To fulfill this role, they provide others
    with information by making presentations to
    groups and assisting the staff in answering
    questions about the program.

Assistant Director, Secondary Division. Administration
of the Secondary Division is assigned to an Assistant Direc-
tor of Education. Administration includes supervising all
administrators and teachers at the secondary level, reviewing
content and quality of lessons taught in the secondary
schools, and supervising curriculum planning and inservice
training. The Assistant Director, Secondary Division:

20

1. Assists in administering the Secondary Division budget

2. Helps develop TV and classroom programs that involve students through discussion and inter-disciplinary activities

3. Makes decisions that affect general and specific administration policies of the Secondary Division

4. Maintains direct supervision over the activities of the secondary television instructors and secondary language specialists

5. Makes certain that secondary principals, classroom instructors, supervisors, and all other secondary personnel are on the job

6. Sees that secondary schools have adequate facilities, materials, and classroom teachers

7. Assists in determining the scope, sequence, and relative difficulty of secondary instruction

State Coordinator of Federal Programs. It is the responsibility of the Coordinator to supervise all aspects of federal grant programs in the Department of Education. This is a 12-month position under the direct supervision of the Deputy Director, Business.

General areas of responsibility include program planning and development, operational analysis, budget control, long-range planning, and program evaluation. Specific duties include:

1. Establishing procedures and standards for implementation of federally funded programs and evaluating compliance to the standards

2. Reviewing goals, objectives, activities, and procedures of proposed federally funded programs to correlate them with overall budget requirements and the projection of Department of Education activities as required by federal law

3. Developing guidelines for continuity and consistency in the planning, operation, and evaluation of federally supported programs and providing a systematic plan for modification of existing plans when necessary

4. Serving as liaison officer in coordination of all aspects of federal grants with the Office of Administrative Services

5. Working directly with the Director of Education, the Deputy Director of Business, and the Deputy Director of Instructional Services, as well as the heads of all branches of the Department of Education, to develop programs that meet the needs and objectives of the overall educational program

6. Processing all correspondence of federal grant nature with appropriate federal agencies

7. Communicating directly with the Governor of American Samoa to receive his evaluation and approval as required by federal program regulations

8. Disseminating all information pertaining to federal grants to the appropriate personnel within the Department of Education as well as those outside the Department

9. Overseeing the expenditure of all funds allotted to the Department of Education through federal grants; acting in this capacity as advisor to program administrators, suggesting

and recommending expenditures to be authorized
and those to be rejected

10. Representing the Department of Education and
    the Government of American Samoa in conferences
    and conventions related to federal programs

11. Acting as liaison between the Government of
    American Samoa and the directors and consul-
    tants of federal agencies located in Washington
    D.C.

ESEA Title I Coordinator. Daily management and super-
vision of the ULA program is provided by the Title I
Coordinator. This is a 12-month position under direct
supervision of the Assistant Director, Secondary Division.

General duties of this position include program plan-
ning and evaluation, budget preparation, proposal development,
reviewing proposals for Title I projects, and ensuring that
the Title I program remains consistent with goals and
policies of the Department of Education. Specific respon-
sibilities of the Title I Coordinator include:

1. Preparing an annual proposal and budget for
   the ESEA Title I Program

2. Estimating federal grant expenditures for
   secondary English five years in advance

3. Requesting the purchase of supplies, materials
   and equipment

4. Requesting the hiring of personnel as budgeted
   and required by the program

5. Participating in the parent and staff advisory
   councils as required by the proposal

23

6. Planning the participation of private schools in the program with their administrators as required by ESEA Title I regulations and the program proposal.

7. Evaluating the program and disseminating information as required by the proposal

8. Reviewing the manpower requirements of the program, ensuring that the goals are met efficiently and within reasonable time limits in order that ESEA Title I financing can be phased out and the funds used for other programs

9. Supervising and assisting the planning of effective curriculum, approach, and methodology for teaching English-as-a-Second-Language and Language Arts

10. Supervising and assisting in writing ESL materials, a language arts handbook, and the preparation of diagnostic and achievement test instruments

11. Arranging for publication of validated materials through the Government Print Shop or a suitable printing and publishing house

Supervision includes assigning work, establishing performance standards, evaluating performance, recommending employees to fill vacancies, and ensuring that the operations of the program are efficient and economical. The Coordinator also provides guidance to approximately 34 teachers and the Title I staff by determining the methodology to be used in the classrooms and training situations, by ensuring that the materials prepared meet the needs of the students and teachers in the classroom, and by advising classroom teachers'

24

immediate supervisors on the basis of classroom observations.

Title I Central Staff. Four language and language learning specialists made up the original FY 74 Project ULA central staff. Two of these specialists have MA's in ESL, one has an MA in English and one has an MA in linguistics. Three of the specialists have teaching certificates in English or ESL. All four of the staff have teaching experience ranging from five to eleven years. Three had several years teaching experience in ESL before coming to American Samoa, and all of their teaching experience has been at the secondary level or above or in ESL.

The responsibilities of the staff are divided. The teacher trainer upgrades the language teaching abilities of the secondary teachers and prepares them to teach the secondary curriculum. The Language Arts Specialist writes, publishes, and disperses a Language Arts Handbook that includes objectives, exercises and instructional software for grades 9-12. The two ESL Specialists write, revise, publish, and disperse the materials for the ESL classes, grades 9-12, including the series of ESL texts, This Way Up. In December 1973, the Language Arts Specialist left the project. Her position was not filled. As a result, some project activities were altered, and some were cancelled.

Project Goals and Objectives

The goals and objectives of the American Samoa Department of Education provided the philosophic basis for

20

designing the Title I ULA program. The Department is committed to helping each person develop as an individual who has the skills, attitudes, and knowledge necessary to be a fluent, literate bilingual in Samoan and English, and to have respect for Samoan traditions and culture. Specific goals for ULA include:

1. Correct individual areas of deficiency in English language competence

2. Raise the level of proficiency in the English language enabling the student to read and express more sophisticated thoughts and ideas in English and to cope with the English medium of instruction in other courses

3. Develop language related study skills, such as research skills, outlining, note-taking, and dictionary use

4. Develop written and oral self-expression techniques

Nine long-range objectives were adopted to guide ULA during the 1973-74 school year. Program objectives include:

1. Reading

   By 1978, 60 percent of graduating Samoan secondary students, after reading selections from stateside high school texts, will be able to answer basic comprehension questions on the material indicating a reading comprehension level of at least adult basic literacy.

2. Listening

   By 1978, 40 percent of graduating Samoan secondary students in the English-as-a-Second-Language (ESL)

program, when exposed to a native speaker of English lecturing on material from a stateside secondary course, and to two or more native speakers discussing that topic, will be able to answer basic comprehension questions on the material.

3. Speaking

By 1978, 40 percent of graduating Samoan secondary students in the ESL program, when tested by two or more native speakers of English, will achieve an FS level 5-3 score or equivalent on a similar measurement instrument.

4. Writing

By 1978, 40 percent of graduating Samoan secondary students when given a topic familiar to them, will be able to compose a 25-word paragraph correctly punctuated and organized and sufficiently free of grammatical errors to be readily understood by a native speaker.

5. Attitude

Each year, beginning in 1975, tests on student attitudes toward Samoan language and culture will indicate no decrease in scores from the previous year.

Process Objectives include:

1. Test Development

By June 1974, a battery of Samoan culture-based tests will be purchased, written, or adapted to measure student achievement in reading comprehension, speaking, and listening.

22

2. Inservice

By September 1973, an inservice teacher training
program will be instituted to upgrade teachers'
language teaching methods (and knowledge of the
theoretical base of those methods).

3. Materials Usage

A review of lesson plans and classroom observations
will reveal that at least 75 percent of the project
teachers have appropriately applied project mater-
ials and techniques in the classroom.

ULA product objectives were analyzed in two ways:
(1) their relationship to the program goals, and (2) their
technical completeness as objectives according to specified
criteria. Tables 3 and 4 display analyses of the ULA objec-
tives.

Instructional Program

Instruction refers to the content, methodology, and
organization of learning activities in the ULA Program. The
content builds upon the language instruction students
experienced in elementary schools. Instruction, which is
in two parts, is designed to assist underachieving students
attain the English language objectives previously listed in
this report.

One part is an English-as-a-Second-Language (ESL) class
consisting of a 45-minute period of instruction daily and
concentrating on "language competence." Content of ESL
classes includes that part of language development which is

30

not taught to native speakers of English: the phonology, morphology, lexicon, semantics, and syntax which a native speaker knows.

ESL content can be divided into two subparts. One subpart emphasizes listening and reading comprehension: comprehension of spoken and written English and recognition of correct and appropriate English usage. The second sub-part focuses on oral production: the expression of students' ideas and feelings in correctly spoken English.

The content of instruction presupposes that students have been exposed to considerable English language instruction, and that they already can succeed to some extent in communicating in English. The problem being dealt with is incomplete comprehension and understanding, i.e., failure to detect distinctions intended by the speaker or writer, or failure to comprehend more than is conveyed by the words alone.

Students who master the ESL portion of the program, or who demonstrate the required proficiency by examination, do not participate in this phase of instruction.

The second part of instruction consists of the Language Arts classes. One 45-minute period of instruction daily is concerned with Language Arts content which is normally taught to native English speakers. This part of instruction deals specifically with secondary English Language Arts goals. Content helps students develop reading comprehension, language-related study skills, research skills, outlining,

26

note-taking, and dictionary use. In addition, students are provided opportunities to develop written and oral self-expression techniques.

Methodology. Instruction also includes the teaching activities, the types of interactions, and the learning principles underlying the ULA Program. ULA classes are predominantly teacher directed. Teachers use a variety of spoken and written activities ranging from controlled and directed use of language to free communication. These activities include teacher presentation of the language objective, student oral practice, question/answer sessions, listening comprehension exercises, reading, writing, discussions, role playing, etc. The focus of the learning process is on learning through use of language rather than on learning through the application of language rules. A common learning cycle is for a concept to be introduced through teacher demonstration followed by an activity that allows the student to apply his knowledge.

Textbooks and workbooks are available for all students, and supplementary materials are available in each school. Each school has its own teacher resource center.

Organization. ULA classes are organized by grade level with aproximately 20-25 students per class. Registration is managed by the individual school with assistance from the Title I staff. Target students progress through semester courses. Provision is made for ESL students to matriculate out of the ULA program.

32

27

Target students attend two 45-minute classes per day of special instruction. One period is primarily devoted to basic English competence in speaking and listening skills and is referred to as the English-as-a-Second-Language (ESL) class. The second period consists of instruction in language application skills, e.g., reading-writing, and is called the Language Arts class.

Instruction Materials

Instructional materials consist of textbooks, workbooks, supplementary books, and other media available for classroom use in the ULA Program. Program acquisition, development and dissemination of instructional materials fell into three general categories during the 1973-74 school year:

1. Selection and purchase of stateside materials.

2. Preparation and publication of locally relevant materials.

3. Selection and purchase of supportive hardware.

Stateside purchased materials included teacher reference materials, supplementary readers written in somewhat simplified English, educational materials kits, paperback dictionaries for students of English, and special materials, e.g., word puzzles.

Locally developed and published materials included a complete handbook for Language Arts classes, an extensive series of student exercises, cross-referenced to the handbook, continuation of a series of special texts, This Way Up,

33

for the ESL classes, and an accompanying handbook for ESL methodology including guide to the use of This Way Up and supplementary exercises.

Supportive hardware included continued use of tape recorders put into service during 1971-72.

Language Arts. The Language Arts Handbook for teachers provides the basis and the main source for the classroom teacher in the language arts program. Coordinated with the Secondary English Language Curriculum Guide, this handbook contains the objectives of the program, as well as suggested teaching approaches for the objectives. The revised handbook, consisting of 12 units, was distributed to teachers in January, 1974. It contains, in addition to the objectives, copies of exercises, quizzes, and visual aids for the teacher to use in class sets, and references to a library of approximately 45 teacher resource books.

Unit I of the handbook contains appendices listing the additional materials available for a teacher's use in class sets. These materials include the following:

1. Anthologies
   On several levels, these are readers for
   student use. Some contain study skills
   questions and/or comprehension questions.
   All have teacher's guides and answer keys.

2. Visual materials for overhead transparency
   machines
   These cover reading comprehension and
   study skills

34

3. Skills books

A variety of skills are included, such as
study skills, job skills, and word skills.

4. Kits

Includes SRA kits, remedial reading kits,
and kits for both reading and writing skills.
Approximately 15-20 different kits in all.

5. Class sets of books for teaching reading comprehension and for improving student interest in reading.

Many titles and levels of reading are
represented, as well as a wide variety of
interests. There are both structured and
unstructured readers. Included are books
from several sources recommending books for
second-language learners. There are about
135 different titles.

6. Dictionaries

English-as-a-Second-Language. Beginning in July of
1972, the development of book three of This Way Up introduced a shift in emphasis in the instructional methods and
materials in the ESL classroom. Essentially, the shift was
away from rule-centered materials and activities to language
use materials and activities which emphasize student-to-
student communication and student-to-teacher communication.

While usage rules remain a small part of the instructional materials, the rules function only as a rough introductory guide to the correct use of language. Students no
longer are expected to cite rules to justify the use of a
particular structure.

35

The new materials stress the presentation of language in discourse form rather than in the form of isolated sentence structures. Exercises consist of short plays, stories and conversations. The exercises are taped to give the students access to accurate native-speaker language models. Therefore, language learning comes from the observation of the language model, followed by language use in actual communication that is ultimately reinforced through written exercises.

In printed form, the stories, plays, and conversations allow the student to make appropriate selections from contrasted grammatical structures.

The materials focus primarily on the complex verb structure of English, introducing the structures in a sequenced manner. The sequence is determined by considerations such as frequency of use by speakers of English (and hence immediate need on the part of the students for those structures) plus considerations of ease of learning. The more easily learned structures are generally taught before the more difficult structures.

In September 1973, Units 1, 2, 5, and 6 were available for classroom use. In January 1974 portions of the revised Book 3 were made available, in September an ESL handbook consisting of methodology, a This Way Up teaching guide, and supplementary exercises were distributed.

Aside from locally developed materials tailored to the needs and interests of Samoan students, certain commercially

36

available materials are used. These included the Institute of Modern Language materials, the Educational Development Laboratory's vocabulary materials, and a number of short plays.

Physical Facilities

Project ULA classes are held in the four high schools in American Samoa, three high schools on Tutuila and one on Ta'u in Manu'a District, during the 1973-74 school year. At Samoana High School there are 14 English classrooms; at Faga'itua 6; at Leone 12; and at Manu'a 2.

Each high school has a resource center in the English teachers' workroom. The resource centers contain reference books on language arts and ESL techniques and methodology, sample texts and supplementary teaching materials. Each resource center contains over 100 titles. An ESL file of cassette tapes of This Way Up exercises is maintained as well as a Language Arts file containing class sets of exercises cross-referenced to the Language Arts Handbook. Each resource center also has a ditto machine.

ULA Instructional Staff

ULA instructional staff consists of the high school English teachers. Information about their educational and experience backgrounds was collected from the teachers through the form shown in Appendix A. It is estimated that the annual turn-over rate is one-half of the teachers

in the Title I Program. Information about the ULA instructional staff is displayed in Table 5.

Some conclusions about the ULA instructional staff can be drawn from Table 5. There tend to be slight`, more female than male teachers. Of the total group, at least eighty-one percent hold either BA or MA degrees compared to seventy-two percent in 1972-73. Forty-five percent of the instructional staff have degrees with field of study considered relevant to ESL teaching while fifty-one percent are fully certified to teach. All faculty are under fifty years old with sixty-seven percent in their twenties or early thirties.

Ninety percent of the Title I teachers are rated highly proficient in English while only seventeen percent are rated highly proficient in Samoan. Seventy percent of the teachers have taught three years or less in Samoa. Forty-four percent have four or more years of previous ESL teaching experience.

Staff Development

Staff development activities consisted of planned interactions between the Title I Teacher Trainer and the ULA instructional staff. Activities included inservice workshops, staff meetings, and individual conferences with ULA teachers in their schools. The focus of staff development activities was to increase ULA teachers' ability to plan and conduct instruction effectively and to use new

41

instructional materials successfully. Inservice training was provided for thirty-eight classroom teachers in Language Arts and English-as-a-Second-Language during 1973-74. The following section represents a summary of those activities.

Inservice sessions dealing with methods and techniques of ESL teaching and specific suggestions for teaching program materials were held in the schools.

From June 18 to July 13 the University of Hawaii held an extension course here, ESL 580, a methodology class in teaching English as a second language involving practice teaching, demonstration classes, seminar-type discussions and lecture. The Title I Teacher Trainer was responsible for the secondary section of this course, and nine secondary English teachers participating in the 100 hour program.

A "general" category of inservice assistance included the following: (a) collecting teacher-written classroom materials and activities, (b) preparing these materials for teachers in other schools, (c) being available at each school to take part in meetings with teachers with problems or questions concerning teaching techniques and materials, (d) determining needs for teacher resource centers in each school, (e) developing and maintaining a file on each teacher in the project to include background information, schedules, materials used, assistance received from the Project ULA staff, observation reports, and inservice training received, (f) teaching one regular ESL class at Samoana High School both semesters to test methods and program materials. A

42

Community College course, ESL Methodology for Secondary
t achers, was held at Samoana and Leone High Schools second
semester.

Program Costs

The ULA Program is financed by ESEA Title I funds.
The Government of American Samoa provides facilities for the
program.   Approximate FY 73 costs as of June 30, 1973 are
displayed in Table 6.

TABLE 6

 recent available monthly budget vs. expenditure
 reports prepared by the accounting office.

43

PROJECT EVALUATION

Evaluation is used in this report to mean the process of systematically collecting, analyzing, and reporting i'.formation that decision makers consider necessary for judging the efficiency and effectiveness of the ULA Program.

Evaluation Design

The evaluation for 1973-74 specified the collection of both process and product information.

Process Evaluation. During this phase of the evaluation, informaticn about ULA's management, plans, and implementation procedures was regularly collected and fed back to decision makers. The purposes included identifying problems in the program design or its implementation, providing timely information for program managers, and monitoring program implementation. The reason for conducting the process evaluation was to allow the staff to improve ULA while the program was in progress.

To facilitate the process evaluation, a Management and Evaluation Matrix for Upgrading Language Abilities was designed that included process objectives for each of the program components, designation of the person responsible for each task, completion dates, and space for evaluative comments relative to each process objective.

Process objectives (tasks) are described in Column I. The person or group responsible for seeing that the task is

44

completed is specified in Column II. Column III indicates

the desired date of completion. The evaluation documenta-

tion, Column IV, indicates what must be on file as evidence

(trace) that the task was in fact completed.

The project director determined the extent to which

specific project management objectives (tasks) were met at

each stage of the project's development. With the comple-

tion of each project task, the director was to record the

disposition of that task in Column V and to maintain a file

which included necessary documentation specified in Column

IV and V. During the final evaluation the evaluator verified

the completion of each task. Column VI, Projected Modifica-

tion for Subsequent Planning, includes information to guide

the revision and refinement of the project.

The completed matrix is included in this report as

Appendix B, pages 71-98.

Evaluative Criteria for Product Evaluation. Long-range

success of the ULA project is based on the increased language

ability of Samoan secondary students. The evaluation in

this context requires linear data and measurement of cumula-

tive long-rang effects.

The target population consisted of all 9th, 10th, 11th,

and 12th grade students in English-as-a-Second-Language (ESL)

classes attending the four public high schools of American

Samoa. Descriptive data about the student were previously

displayed on page 11.

45

Criterion variables. Cognitive achievement was measured with the EST developed and refined the previous year. Through the evaluation processes during FY 73, several important developments resulted which enhanced FY 74's evaluation design. For example, the English Structure Test (EST), used as a project achievement instrument, was developed, field tested, and now reflects acceptable standards of validity and reliability; it provides baseline data for the FY 74 evaluation. In addition, a computer-based information system initiated in FY 73 has begun to provide measures of cumulative long-range effect of the ULA project. Both of these factors added strength to the FY 74 evaluation.

FY 74's product evaluation examined the effects of seven predictor variables on one evaluative criterion variable, the English Structure Test (EST). The following predictor variables were included in the evaluation: grade level, ESL level, use of project materials, teacher's degree, teacher's sex, teacher's level of certification, and teacher's experience as an ULA teacher.

Data on the grade level and ESL level were collected on student Biographical Information Form. Grade level covered the four high school grades. The predictor variable "language level" consisted of three values: high ESL middle ESL, and low ESL. Target students were divided among the three values based upon language proficiency grouping in each high school. Proficiency grouping decisions were based on principal and teacher recommendations and achievement

test scores. "Language level" was determined by the ESL proficiency group to which each student was assigned for the 1974-75 school year. High ESL is defined as a student who is able to learn from English medium instruction nearly as well as a native speaker; middle ESL is defined as a student who is able to learn from English medium instruction with difficulty and more slowly than a native speaker; low ESL is defined as a student who is not able to acquire significant learning from English medium instruction.

Data on the teacher degree, teacher sex, level of certification, and experience as ULA teacher come from personnel records and through individual interviews conducted by the Title I staff. Data concerning teacher usage of material with students were derived from each project teacher's class plan and from classroom observation by project staff. Table 7 reports the data on usage of materials.

TABLE 7

Usage of Project Material in ULA Classes

Usage of Materials	No. of Classes	Percent
High Usage	20	33.9
Medium Usage	20	33.9
Low Usage	19	32.2
Total	59	100.0

Evaluation Questions. The purpose of developing evaluation questions was to avoid the common error made in evaluating programs by building the evaluation exclusively around

47

a set of program objectives. Stenner[3] lists at least two
deficiencies of this practice.

1. Analysis techniques must related to evaluation
   questions, not program objectives; and

2. treating objectives as the foundation for the
   evaluation limits the possibilities for
   providing information and for relating one
   objective to another.

The project staff and evaluator generated evaluation
questions by analyzing the classes of information necessary
to satisfy project information requirements. The task in
question generation was to analyze all possible combinations
of three sets of variables (product objective, program
organization, and target population) necessary to satisfy
program information requirements.

The following were identified as important evaluation
questions for the Upgrading Language Ability Project:

1. Are program milestones being attained on
   time?

2. Do students who use ULA materials gain more
   than those who do not use the materials?

3. What types of students gain most from the
   program and what types gain least?

4. How is the teacher's educational level
   related to student performance?

5. How are teacher attitudes related to program
   implementation?

6. To what degree have teachers appropriately
   applied project materials and techniques in
   classroom instruction?

---

[3]A. Jackson Stenner, An Overview of Information Based
Evaluation: A Design Procedure. Institute for Development
of Educational Auditing, Arlington, Virginia. 1972.

7. What are the costs of the project?

8. Is there adequate support for ULA from school and Department of Education administration?

9. Is the project staffed with qualified personnel?

10. Is concentrated instruction effective in relieving specific deficiencies?

11. Do teachers find the project-developed and project-purchased materials appropriate for their teaching skills and their students' language proficiency?

12. Is there a relationship between materials use and teacher participation in inservice training?

13. Is there a relationship between teacher participation in scheduled inservice and pupil performance?

14. Do inservice training activities help teachers' self-confidence in teaching?

15. Did the teachers consider the ULA class plan helpful?

Instrumentation Selection

Table 8 outlines the instrumentation and data collection procedures for each evaluation question. Instruments are included in the appendix section of this report.

Data Collection and Analysis of
English Structure Test

The EST results from May, 1973 provided pre test data for all target students grades 10, 11, and 12. An EST pre test was administered to all freshmen of the target group in October 1973. Title I staff members monitored the testing procedures in the high schools. Testing was conducted

48

under closely supervised conditions, using the same instructions and procedures in each classroom and allowing the same amount of testing time. Testing was preceded by inservice training for ESL teachers conducted by the Title I staff. Testing proc 'ures and instructions are located in Appendix F pages 114-118.

Data by Grade Comparison 1973-1974. The first analysis involved a grade by grade comparison between 1973 and 1974 EST results i ord_r to assess possible cognitive growth as measured by EST. One-way analysis of variance with repeated measures was used. Table 9 displays EST means and sample size for all categories for each year.*

TABLE 9

Evaluation Means for Participant Categories
Grade by Grade 1973-1974

12th	214	29.72	259	33.95

---
*Data were gathered both years for the freshmen. However, different test forms were used in 1973 and 1974, therefore, comparisons were not included for freshman groups.

Applying the analysis of variance, a significant dif-
ference (p. < .01) was found to exist between 1973 10th
grades and 1974 10th grades. The 1973 and 1974 12th grade
classes were also found to be significantly different (p.<
.01). Eleventh grades scores for 1973 and 1974 were not
significantly different. Table 10 reports the analysis of
variance data for each grade.

When a significant relationship was found between EST
evaluation and one of the categories, the relationship was
tested further using the Scheffe method which is an overall
estimation of the strength of a relationship.

TABLE 10

Grade by Grade Comparison for
1973-1974 Students

Category	Source	SS	df	MS	F ratio
10th	Between	71,469.60	776	92.10	
	Within	769.00	1	769.00	
	Total	72,238.60	777		8.35**
11th	Between	34,017.07	641	84.27	
	Within	123.38	1	123.38	1.47NS
	Total	44,140.45	642	–

	Within	2,096.88	1	2,096.88	27.82**
	Total	37,595.09	472		

**Significant p. < .01

These findings would seem to suggest a positive influ-
ence of the instructional variable in grades 10 and 12

55

during 1973-74.

Evaluation Relative to Several Predictor Variables. A
triple classifications analysis of variance was used to test
for a relationship between achievement as measured by EST
and the following predictor variables: grade level, language
level, teacher's degree, teach s sex, level of certifica-
tion, usage of ULA materials with students, and experience
as an ULA teacher.

Data were analyzed using Program AVAR23[4]. This tech-
nique permits classification of subjects into levels of two
or three independent variables simultaneously. Tests of
significance are computed for the general effects of each of
the two or three "factors", as well as for their interaction
effects upon the dependent variable.

An analysis of variance between achievement as measured
by EST and predictor variables of materials usage and
student levels was made. Table 11 displays EST means and
sample size for each category.

_____

[4]Fortran Programming for the Behavioral Science,
Arnold V. Veldman. Holt, Rinehart and Winston, N.Y. 1967,
p. 257.

TABLE 11

Evaluation Means and Sample Size for Participant Groups
Language Level - Material Usage

Category	Learning Level (ESL)					
	High		Middle		Low	
Materials Usage	n	m	n	m	n	m
High	52	36.135	277	29.206	60	21.500
Middle	96	37.365	176	26.375	37	22.000
Low	40	38.575	39	24.282	136	20.581

The analysis revealed an interesting relationship
(p. < .01) between student achievement as measured by the EST
and predictor variables of student level and ULA material
usage. Relationship between student level and EST scores
was significant. This was to be expected in that the
student ESL grouping and EST achievement are both related to
the student language ability.

In the high level group and the low level group there
was no significant difference in achievement between high,
medium, and low users of materials.

In the middle level group, the students using materials
scored significantly higher (p. < .01) than students who did
not use the material. Table 12 reports the triple analysis
of variance data.

Figure 1 illustrates the findings in a graphic manner.

62

The relationship between achievement and the predictor variables of grade level and student ESL level and school was examined at Samoana and Faga'itua. EST evaluation means and sample size by category are reported in Table 18.

Achievement level at Samoana High School was found to be significantly higher (p. < .01) than achievement level at Faga'itua High School. However there was no significant difference between grade level and achievement by low, mid, and high students.

63

CONCLUSIONS AND RECOMMENDATIONS

The purpose of the FY 74 evaluation of the ESEA Title I project, Upgrading Language Ability (ULA), was twofold: one to collect process information about program management and implementation; and two, to assess the extent to which the program achieved its goals and objectives. A set of evaluation questions was systematically developed to provide scope and quality to the evaluation design. A discussion of each question follows.

1. <u>Were</u> <u>Project</u> <u>Milestones</u> <u>Achieved</u> <u>on</u> <u>Schedule?</u> The evaluator reviewed the Management and Evaluation Matrix with the project director and verified the completion of project tasks. Data indicate that approximately 80% of all management tasks were completed as scheduled. Several management tasks were not accomplished (e.g., second semester teacher plan utilization and the development of Language Arts handbook unit phase II) because of the departure of the Language Arts specialist in December. Complete information relative to the disposition of intended management activities prescribed in the evaluation design is detailed in Appendix B.

Although some management tasks were not achieved, adequate data were collected to provide conclusions about the several components of the Title I program.

64

2. Do Students Who Use ULA Material Gain More Than
Those Who Do Not Use the Material? Mid level students who
were high users of ULA materials achieved significantly more
than students not using ULA materials.

High level and low level students gain least from the
project. The discovery that low students who use the ULA
material do not perform better than low students who do not
use the ULA material might be accounted for by the facts
that 1) the ULA materials presuppose a modicum of facility
with English and 2) in recognition of this, the project
provides commercially available materials suited for begin-
ning learners of English. The discovery that high students
who use the ULA material do not perform better than high
students who do not use the ULA material might be accounted
for by an ability in this proficiency group to learn better
from heavier exposure to uncontrolled reading materials such
as are made available for use at the teacher's discretion.
It is also not inconceivable to this writer that the language
proficiency of this group is nearing the level where overt
language instruction produces greatly diminished returns.
If this hypothesis were to be shown to be correct, a wise
course of action might be to lower the standards for exemp-
tion from ESL.

3. What Type of Student Gains Most From ULA Program
and What Type Gains Least? As reported in question 2, mid
level students who were high users of ULA materials achieved
significantly higher than students not using ULA materials.

60

High level and low level students gain least from the project. The discovery that low students who use the ULA material do not perform better than low students who do not use the ULA material might be accounted for by the facts that 1) the ULA materials presuppose a modicum of facility with English and 2) in recognition of this, the project provides commercially available materials suited for beginning learners of English. The discovery that high students who use the ULA material do not perform better than high students who do not use the ULA material might be accounted for by an ability in this proficiency group to learn better from heavier exposure to uncontrolled reading materials such as are made available for use at the teacher's discretion. It is also not inconceivable to this writer that the language proficiency of this group is nearing the level where overt language instruction produces greatly diminished returns. If this hypothesis were to be shown to be correct, a wise course of action might be to lower the standards for exemption from ESL.

4. How Is the Teacher's Educational Level Related to Pupil Performance? Data analysis suggests that teacher's educational level is not significantly related to pupil performance on the EST. Other teacher predictor variables including certification (certified/non-certified) and experience as an ULA teacher were also found not to be significantly related to student achievement.

5. How Are Teacher Attitudes Related to Program
Implementation? The project staff reported less utilization
of project materials by teachers who did not regularly
attend workshops. This likely affected student achievement
at least in the mid level classes.

Teachers did not use complete class plans for second
semester. Lack of data from this source had a negative
effect on project monitoring.

6. To What Degree Have Teachers Appropriately Applied
Project Materials and Techniques in Classroom Instruction?
Data are not available.

7. What Are the Costs of the Project? During FY 74
the ULA ESEA Title I project expenditures included $184,807
through March 31, 1974. Budget break outs by cash flow
objects are reported in Table 6 page 38.

8. Is There Adequate Support for ULA from School
and DOE Administration? School and DOE administration always
supported and cooperated with the project in arranging
meetings, tests, and other requirements involving personnel.
One school failed to act on requests by project staff to
improve security for project equipment. Occasional long
delays were experienced in shipping supplies to Manu'a High
School but it is not known if these delays were caused by
negligence on the part of Department of Education warehouse
personnel or on the part of Government of American Samoa
Port Facility personnel.

9. Is the Project Staffed with Qualified Personnel?
The project appears to be staffed with personnel who meet the established qualifications.

The Title T central staff includes two specialists with masters degrees in ESL, one specialist with a Masters in English, and one with a Masters in Linguistics. Three of the specialists have teaching certificates; all four have teaching experience.

The ULA instructional staff consists of the high school English teachers. The Government of American Samoa official description of classroom teacher (English) lists the following minimum qualification.

- o BA degree
- o Teacher certificate - Master Teacher evaluation status
- o Proficiency in use of English may be substituted for the degree and certification
- o Lxperience: at least one year of successful classroom teaching with English as the language of instruction

76% of the project teachers have a BA or above

55% have certificates

100% have proficiency in the use of English

100% have at least one year of experience in English

10. Is Concentrated Instruction Effective in Relieving Specific Deficiency? Process data are incomplete in this area. Classroom observations were not completed as scheduled, therefore, this question cannot be answered.

11. Do Teachers Find Project Developed Materials and
Project Purchased Materials Appropriate for Their Teaching
Styles and Their Students' Language Proficiency? In general,
yes. The project teachers were asked to respond to various
questions concerning ULA materials on an interview schedule.
The interview form and relevant data are reported in
Appendix C. Approximately 67% of the project teachers were
classified as moderate or high users of the material. In
response to the question "What do you like best about the
material?", there were 66 positive responses by the teachers.
The following comments were the ones most often listed.

   o Very interesting (high interest)

   o Culturally appropriate

   o Exercises good

   o Grammar is easy to understand

The most often mentioned comments concerning the ques-
tion, "What do you like least about the materials?", were as
follows:

   c Too long and difficult (students get bored)

   o Need more exercises

   o No pictures

There were 36 responses to the "like least" question.

   Data from another question provides additional inter-
esting information. Teachers were asked, "If you do not use
This Way Up in this class, could you please explain why you
selected other materials?". The most predominate comment
from teachers in low level groups was that the materials

were too difficult for the low level students. Teachers in mid and high levels did not comment on the question.

12. <u>Is There a Relationship Between Materials Used and Teacher Participation in Scheduled Inservice Programs</u>? The project staff reported better utilization of project materials by teachers who attended workshops. Unfortunately classroom observation data were not systematically collected which could be used to corroborate the staff's perceptions.

13. <u>Is There a Relationship Between Teacher Participation in Scheduled Inservice and Pupil Performance</u>? The question cannot be answered because of a lack of classroom observation data.

14. <u>Do Inservice Training Activities Help Teachers' Self-Confidence in Teaching</u>? Data are limited in this area. However, those teachers who attended workshops were perceived by the project staff to use materials more intensively and more effectively.

15. <u>Did the Teachers Consider the ULA Class Plan Helpful</u>? The ULA class plans were not used second semester. It may be concluded from this that teachers did not consider them helpful.

Recommendations

The following recommendations are offered for program improvement.

1. Each of the recommendations stated in the 1972-73 final evaluation report continues to be valid. Specific

65

attention should be paid to those recommendations that were not followed or where minimal progress was made.

2. Product evaluation reported elsewhere in this document recommends that "Specific instructional materials should be designed for ESL low language proficiency students." This is of particular importance.

3. Process evaluation of the ULA should be continued, utilizing appropriate management tools. FY 75 process evaluation should more effectively collect and feed back information on a regular basis, thus providing more timely and complete data for program monitoring and evaluation.

4. More complete student biographical data should be gathered in order to provide information about the extent to which ULA project objectives are being achieved with different groups of students.

5. The difficulties encountered with the 1973-74 planned methods of keeping student records and the resultant difficulties in product evaluation on the basis of individual pre/post testing make it highly desirable that new and perhaps innovative student record keeping procedures be planned in close cooperation with school and DOE personnel and that concerted efforts be made to carry out the plans. The possibility that the Title I program could provide significant help and perhaps leadership for the fledgling Student Information System should be explored.

6. In view of product evaluation reported elsewhere in this document, consideration should be given to lowering the standards for exemption from ESL and concentrating efforts on what are currently the mid and low level groups.

7. The relationship between inservice and impact on instruction should be more closely examined.

8. Systematic classroom observations should be implemented on a regular basis to assess inservice training needs and to provide feedback data to project staff on material usage.

9. The Title I Advisory Council should be more effectively involved in project planning and assessment.

10. Objectives for FY 75 dissemination activities should be established and an implementation program developed to provide information about the Title I program to the Department of Education and the community.

11. The DOE Title I director and director of the testing department are able to utilize the computer in data analysis, storage, and retrieval. As a result of the past two years operation considerable descriptive data about ULA students and staff are now available. For example frequency distribution of 1973 and 1974 EST scores converted to percentile ranks and T-scores are available to facilitate project planning. These data are reported in Appendix G. It is recommended that steps be taken to assure continued support and development in this vital area.

2.0 Language Arts					
2.1 Classroom					
2 1.1 The teacher will plan a one-semester instructional program for each class based on the DOE Curriculum Guide and an assessment of student achievement and needs within 3 weeks of the beginning of the semester.	Teacher	3rd week of semester	A copy of the plan reviewed by project staff. Upon receipt of the instructional program plan the project staff will check the plan to verify that it is based on curricular goals, student needs and available material.	All 2.1 activities completed 1st semester at Samoana and Faga'itua but not Leone nor Manu'a. Dropped 2nd semester for lack of project personnel to adequately review teacher plans.	Allocate necessary staffing in order to carry out effective monitoring of classroom activities.
a. Determine the semester's required curriculum for a given class by examining the DOE Curriculum Guide and the Language Arts Handbook.					
b. Select texts on basis of requirements and/or recommendations in both sources above. (a.)					
c. Evaluate the students' knowledge of a given required Handbook unit by using either Handbook exercises & quizzes or teacher-made exercises & quizzes as pretests.

2.2 Support					
2.2.1 By September 4, 1973, the Language Arts (LA) Specialist will provide for all high schools, materials supplementary to the LA Handbook written prior to FY 74. These locally printed materials (including exercises, transparencies, and other supplementary materials) will be in quantities sufficient to meet the needs of LA classes whose teachers will use the LA Handbook for an entire school year.	Ellen	September 4, 1973	The printed requests, placement of these materials in the school and a memo to English department chairman summarizing the current inventory after delivery.	Completed on schedule.

2.2.3	By September 4, 1973, the LA Specialist will have available for use in LA classes commercial materials as needed to support the LA program. These materials will include class sets of readers, reading and writing kits, workbooks, etc. Selection will be on the basis of past experience and formative evaluation. Distribution will be ongoing throughout the school year.	Ellen	Ongoing through May 30, 1974	Purchase requisitions and the Title I book inventory file will contain evidence of the completion of this work.	Completed on schedule.	
2.2.4	Throughout project year, LA Specialist will order, receive and distribute commercial materials as needed to support LA program. Materials will be similar in nature to those described in 2.2.3 and will be selected upon teacher request &/or need. Distribution will be upon arrival of materials.	Ellen	Ongoing through May 30, 1974	Purchase requisitions and the Title I inventory file will contain evidence of the completion of this task.	Completed on schedule up until departure of L.A. specialist; distribution continued but no new ordering following her departure.	Provide adequate staffing for FY 75.

Task, Process &/or Activity					
2.2.5 Throughout the project year the LA Specialist will order, receive and distribute commercial materials as needed to maintain and build up the current English Teachers' Resource Centers in each high school. Selection will be on basis of teacher recommendation, appropriate available books, deficiencies in current library and need. Distribution will be upon the arrival of the materials.	Ellen	Ongoing through May 30, 1974	Purchase requisitions and the Title I book inventory file will contain evidence of completion of this task.	Completed on schedule up until departure of L.A. specialist; distribution continued but no new ordering following her departure.	
2.2.6 By June 1, 1974, LA Specialist will write, reproduce and distribute 2 revised LA Handbook units, Phase I and 4 revised LA Handbook units Phase II. Units will contain teacher guidance for LA class, copies of all student exercises and transparencies available for use in classroom and answer keys.	Ellen	By June 1, 1974	The print requests, the delivery of the units to the the teachers and the date of distribution of the units in the Title I book inventory file.	Not completed due to departure of L.A. specialist.

2.2	Support (cont'd.)					
2.2.8	In September, November, January & March of project year the LA Specialist will consult with and advise teachers on their instructional program plans for each individual class. Specialist will provide input in areas of curriculum, text selection, supportive materials, etc., which will be based on teachers' needs and their evaluation of their classes. (see 2.1.1) This kind of support will be the primary reason for consultation with teachers in September and January. The primary reason for further consultation in November and March will be to observe the teachers' instructional program plans in classroom and to observe their implementation of LA curriculum and materials. Suggestions and/or required changes will be put forth based upon formative evaluation	Ellen	Ongoing September, November, January, March	Evidence of the completion of this task will be reports to be filed in the Title I teacher file.	Records indicate activity completed for September only.	Procedure will be established and staff allocated to adequately support instructional program.

APPENDIX C

Summary of Teacher Evaluation
Of ULA Materials

Summary of Teacher Evaluation

Of ULA Materials

Teachers were asked to assess ULA materials by responding to the following questions.

1. Please rate the unit by circling the appropriate number

    A. Too easy - too difficult
    B. Too little vocabulary - too much vocabulary
    C. Too few exercises - too many exercises
    D. Unit too long - unit too short
    E. Stories too childish - stories too mature

2. Please rate the unit by circling the appropriate number

    A. Stories boring - stories interesting
    B. Exercises boring - exercises interesting
    C. Culturally inappropriate - culturally appropriate
    D. Grammar inappropriate - grammar appropriate
    E. Vocabulary inappropriate - vocabulary appropriate
    F. Instruction not clear - instruction clear

3. What do you like best about the materials? (Comments)

4. What do you like least about the materials? (Comments)

5. Do you have any recommendations for additions, subtractions, or changes in the material in either content, format, or any other aspects? Please give details.

6. If you have any other comments not covered in this questionnaire that you would like to make about the materials, please do so here.

Summary of the responses to each question are reported on the following pages.

104

Table 20

Overall Summary of Teachers' Ratings

of TWU Units I, II, III, IV, V, and VII

		Means on Five-Point Scale				
	Unit I (N=1)	Unit II (N=8)	Unit III (N=24)	Unit V (N=25)	Unit VI (N=2)	Unit VII (N=2)
1. Description of ULA material:						
a. Too easy - too difficult	3.00	3.12	3.45	2.60	2.00	3.00
b. Too little - too much vocabulary	3.00	3.00	3.83	2.00	2.00	2.00
c. Too few - too many exercises	1.00	2.50	2.50	2.60	2.50	2.00
d. Unit too long - too short	3.00	3.50	2.91	3.60	3.50	4.00
e. Stories too childish - too mature	1.00	2.87	2.91	3.40	3.00	3.00
2. Please rate the unit						
a. Stories boring - interesting	3.00	4.14	4.00	2.60	5.00	3.00
b. Exercises boring - interesting	4.00	3.42	3.20	2.60	2.00	3.00
c. Culturally inappropriate - appropriate	5.00	5.00	4.54	4.60	5.00	4.00
d. Grammar inappropriate - appropriate	5.00	4.42	4.70	4.20	4.50	4.00
e. Vocabulary inappropriate - appropriate	5.00	4.00	3.95	3.80	4.50	4.00
f. Instruction not clear - clear	2.00	4.28	4.38	2.80	5.00	5.00

3.   What do you like best about the materials?

```
--culturally appropriate                              7
--very interesting (high interest)                   15
--variety of exercises                                6
--simple enough for students                          2
--good reading level                                  1
--kids liked it
--taught the students something they needed
     to know                                          2
--content = stimulating discussion                    1
--content                                             1
--the fact that someone else prepared them            1
--stories                                             2
--vocabulary exercises                                3
--it was something                                    1
--exercises good (esp. multiple choice)               5
--grammar is easy to understand                       4
--materials provide lots of teaching
     activities                                       3
--students ask lots of questions about
     cultural differences                             3
--taped exercises by teacher                          4
--exercises where students have multiple
     choice of verbs                                  4
--number of exercises                                 4
--fill in blank exericses                             2
--more interesting story than past exercises          1
--being presented with a story                        2
```

4.   What do you like least about the materials?

```
--no pictures                                         3
--the vocabulary (exercises)                          3
--repetition of exercises at beginning                2
--too many sentence combining at beginning            2
--instructions (T.G.)                                 2
--also, five more examples in the instructions        1
--doesn't provide enough exercises                    2
--stories boring                                      1
--rules and examples don't get across                 1
--format dull                                         1
--not "slick"                                         1
--need more exercises                                 6
--more vocabulary/spelling                            1
--more examples needed                                1
--some exercises a bit long                           1
--too long and difficult (students get bored)         7
--format - not much open space                        1
--no tape recorder or scripts                         2
```

RESPONSE: FREQUENCY:

--exercises difficult to present   1
--more exercises on the easy level   1
--had trouble with #10   1
--need more paraphrase exercises at easier
     level   1
--too many new words   1
--length   1
--no tape recorder   2

5. Do you have any recommendations for additions, subtrac-
    tions, or changes in the material in either content,
    format, or any other aspects? Please give details.

--pictures   17
--tape recorder   5
--more vocabulary and exercises (with
     examples)   5
--more interesting stories   2
--give instructions to teachers about how
     to do exercises   1
--for this class the exercises with the
     factual, historical students were good
     (If Gr. Britain. . ., etc.)   2
--more examples that can be acted out in class   1
--more of exercise #8 type   2
--more puzzles (structure oriented)   4
--more __?__ exercise #9 and #10   1
--exercise #6, too much jargon   1
--more reading materials   3
--need tests   1
--more stories like, "Let's Fall in Love",
     mysteries   5
--need more   1
--must have locally developed high interest
     material   1
--more tape work (exercises)   1
--more short stories   1
--pages are too crowded (format)   6
--tapes made by competent actors   1
--video tapes   1
--most of vocabulary is at recognition level   5
--more "speaking" exercises   4
--games, crossword puzzles   3

6. If you have any other comments not covered in this
    questionnaire that you would like to make about the
    materials, please do so here.

--tape recorders would be useful, if FHS is refurbished	2
--need low level materials	1
--commercial materials too dull	1
--need locally developed materials	2
--teachers should be given more information about the purpose for some exercises (ex., "Here's a passive exercise.")	1
--tape recorder	1
--on usage rule pages, leave outside half blank for students' notes	1
--more materials (topics) be about cultural differences between U.S. and Samoa	1
--topics be related to other themes and resources available (movies)	4
--have story straight (all verbs included)	4
--more examples	4
--add short anecdotes using same vocabulary as stories to reinforce vocabulary	1
--low level ESL class in A.M.	1
--dictionaries - not enough (Leone)	1
--use real characters in stories	2

DATE PREPARED:_____

Complete this calendar as instructed during Teacher Orientation or, if you were unable to attend, ask your Dept. Head for instructions. Sample calendars are available in your Teacher's Resource Center.

MATERIALS AND ACTIVITIES CALENDAR

Week 1	2	3	4	5	6	7

Nbr. of days in the week.

ALL CLASSES

Which of the above materials or activities do you expect to be the major source of NEW learning for these students?

_____

What other materials, not on the calendar, do you hope to use during the semester? (Reference works, occasional readers, etc.)

_____

_____

_____

_____

111

8	9	10	11	12	13	14	15	16	17	18

ESL CLASSES ONLY

Indicate briefly how you selected each of the materials or activities on the above calendar. Answers such as "EST scores," "advice of last year's teacher of these students" or "tryout during first two weeks" are sufficient.

Material	Basis for selection

Please read these instructions before completing your class plans.

1 Complete a plan in duplicate for each Language Arts or ESL class that you teach.
2 Keep one copy and submit the other to your Department Head.

3 The plan will be reviewed by your Department Head, your Principal, and the project staff before being approved on your Principal's authority.
4 Any changes that you wish to make after submitting the plan should be made on your Department Head' copy and the project office notified that a change has been made.
5 Be sure to keep your Department Head's copy of the class lists up to date. Test score summaries, pre-labelled test answer sheets, and such like will be based on this list.
6 Suggestions for making Class Plans and this form more useful for you and your school will be appreciated.

APPENDIX E

Classroom Observation Checklist
For ULA Project

114

CLASSROOM OBSERVATION CHECKLIST
FOR ULA PROJECT

Directions:

1. Contact each of the teachers involved and request permission to observe their class for at least 30 minutes during the week. Leave uncertain the exact date within the week decided upon.

2. Assure each teacher that your observation is not for the purpose of an employment evaluation but is simply to gain an impression of how things are going in the ULA program.

3. Ask each teacher to designate what portion of the day is specifically devoted to planned "language arts" or ESL instructional activities.

4. Observe an hour of inclass activity devoted to "ULA" teaching.

5. Make an unobtrusive record of classroom activities.

6. Be sure to sample one hour of language arts or ESL instruction for each teacher participating in the programs.

7. Discuss written observations and options for improvement with project staff.

8. Forward all completed and edited forms to evaluator to be used as one record of progress made in upgrading instruction.

Section #1

Name of School _____

Date Observed _____, _____, _____
                month   day   year

Name of Observer _____

Section #2

1. Were specially prepared ULA materials utilized during the

    period observed?

    ☐ a. yes   ☐ b. no

1a. If yes, specify type of materials being used.

    1. _____

    2. _____

    3. _____

    4. _____

    5. _____

2. Note the proportion of the hour that the teacher utilized

    ULA material in instruction.

        ☐ a.   6 minutes or less

        ☐ b.   7 - 12

        ☐ c.   14 - 18

        ☐ d.   19 - 24

        ☐ e.   25 - 30   **116**   112

3. Did the teacher utilize methods cover in previous inservice sessions.

☐ a. yes   ☐ b. no

3a. If yes specify type of methods being used.

1. _____

2. _____

3. _____

4. _____

4. Gauge the amount of intellectual curiosity evidenced by pupils in the classroom. Would you characterize the atmosphere as being:

☐ a. Highly charged with intellectual curiosity.

☐ b. Moderately charged with intellectual curiosity.

☐ c. Somewhat charged with intellectual

☐ d. Not very charged with intellectual curiosity.

5. Additional observation and comments.

APPENDIX F

English Structures Test
Test Administration Procedure

/

118

TEACHER _____ CLASS _____ PERIOD _____

ENGLISH STRUCTURES TEST

NO. OF TESTS

TEST ADMINISTRATION PROCEDURE

1. Have on hand the dozen pencils, sharpened, that you were
    given along with all of your tests. Also, if students
    are not to leave when they finish (see instruction #23)
    have on hand something to occupy students who have
    finished the test, such as a worksheet, a book or maga-
    zine, etc.

2. Take roll.

3. List missing students in the space provided below; last
    name first, comma, first name. Please print.

4. Write on the chalkboard, in large block letters;

    NAME _____

    DATE ___May 10, 1974_____

    *SCHOOL_Manu'a_____

    **TEACHER ___Helene Miller_____

    *OR FAGA'ITUA or SAMOANA or LEuNE as appropriate but do
    not write "High School" since the space on the answer
    sheet is limited.

    **or whatever your name is. Note that we want the name of
    the students' ESL teacher, not LA teacher or some sub-
    stitute test administrator. Note also that field testing
    indicates that not all students know their teacher's
    name, many know only first or last name, and many can't
    spell either name.

5. Tell the students that they are going to take an English
    test today. Tell them that it will measure how much
    English they know but that they will NOT be graded on
    the test; that the test is for planning.

6. Announce the policy on leaving (or not leaving) after
    completing the test (see instruction #23).

119

7. Tell the students that you are now going to pass out
    the answer sheets and that they should PRINT their
    COMPLETE name, first name first, second name second,
    and the information that you have put on the blackboard,
    in the appropriate spaces on the answer sheet. (Not all
    students know the difference between 'print' and 'write'
    so you may need to explain.)

8. Distribute the answer sheets.

9. Remind students that they are to PRINT.

10. WALK AROUND THE ROOM AND CHECK THAT STUDENTS ARE FILLING
    IN THE INFORMATION CORRECTLY.

11. Tell the students that the test books will now be
    distributed and they are NOT to OPEN them until you tell
    them to.

12. If you trust the students behind your back, pass out the
    tests. If you don't, have a helper or student pass
    them out. Check here if someone else passed out the
    test;____

13. Tell the students to read the instructions on the front
    cover of the test, work the example, and mark the
    answer of the example in the box labeled. "EXAMPLE" at
    the top of the answer sheet.

14. Watch that no students open the books or begin working
    the test.

15. When the students seem to have finished, ask "What
    should Roma say?" Accept "I am fine, thank you."

16. Say "The answer on your answer sheet should look like
    the answer in the instruction," or words to that effect
    in Samoan or English.

ENGLISH STRUCTURES TEST, TEST ADMINISTRATION PROCEDURES,
PAGE TWO

17. Ask if there are any questions.

18. When all questions about the mechanics of taking the
    test have been answered, say "WHEN YOU FINISH, RAISE
    YOUR HAND AND I WILL TAKE YOUR TEST AND ANSWER SHEET.
    DO NOT BRING THEM TO ME. NOW OPEN YOUR BOOKS AND BEGIN."

19. Students shall have up to 40 minutes to complete the test. Write the actual beginning time in the first box below. Add 40 minutes and write the last possible finishing time in the second box below.

Begin		Finish

   If any students have not finished the test by the finishing time that you have calculated above, take their papers from them and write "unfinished" above the "example" box. Do not worry if the last possible finishing time is after the class period is supposed to end. In field testing the slowest students took 32 minutes. Allow any student the full 40 minutes if he wants it even if that goes over into the next period.

20. If any student arrives during the instructions, give them the papers that the rest of the class has at that time and help him to catch up. If any student arrives after the actual timed test has begun, do not administer the test to him; treat him as a student who has finished (see inst. #23 below).

21. During the test, walk around the room watching the students. If any students are obviously cheating, put an 'X' in the box in the lower right hand corner of their answer sheets but do not take their tests away.

22. When students finish and raise their hands, take their tests and answer sheets, check that all information has been included and that the answer sheet has been used correctly, underline the student's surname (second name) on his answer sheet.

23. If school policy permits, students should be excused from class when they finish. If not, they should be required to stay quietly at their desks. If no policy has been established, consideration should be given to the fact that at Samoana and Faga'itua some students will have to pass through other classrooms if they are excused.

24. If some students bring their test book and answer sheet to you, remind the whole class that they are to raise their hand and wait for you to collect their papers.

121

25. When all students have finished, count the test books and answer sheets. You should have used and unused tests tests and answer sheets totaling the figure in the box at the beginning of these instructions. Check that you have underlined all surnames.

26. Repackage the materials in the envelopes that they came in with these instructions around the outside and return them to the Project test supervisor at your school.

MISSING STUDENTS:

_____   _____

_____   _____

_____   _____

Please note on the back of this sheet, any disturbances that occurred during the test (such as pneumatic hammers outside the window, students passing through the room, etc). Also please make any suggestions or criticisms that you feel would help make future test administrations better.
