## FOREWORD

The Minnesota Council on Family Relations is pleased to make available this 1974 Supplement to the 1972 edition of *Family Life, Literature and Films*. The Council feels that the two will be particularly valuable when used together.

Several new sections have been added to the Supplement, including "Sexuality and the Mentally Retarded," "Venereal Disease," "Audio-Visuals on Death," and "Mental Health: Therapies and Services." The section on "Male and Female Roles," previously a sub-section under Human Sexuality, now stands on its own, with sub-headings on "History of Women," "Sexuality, Sex Roles and Women's Health," and "Economics and Women in the Labor Force." The Table of Contents gives a complete profile of the contents.

An attempt has been made to avoid duplicate listings, so some materials have been assigned rather arbitrarily to the section of their major emphasis. The reader is encouraged to peruse all related sections of the Bibliography in order to find the most complete selection of materials. The Author Index will help in this search.

As the size of the Supplement indicates, a wealth of material has been published in the last two years. Even then, important materials may have been missed. We hope that users will inform the Council of any gross omissions so that they may be included in the next edition.

Special thanks go to the following persons who contributed their knowledge and expertise in order to make the Supplement useful and valuable:

Nye, F. Ivan and Felix M. Berardo, *The Family: Its Structure and Interaction*, The Macmillan Company, 1973.

The purpose of this basic text is to illuminate the nature of the family through maximal use of sociological research findings and selective utilization of key sociological concepts. The focus is on the American family system and the authors introduce social theory to explain various patterns of family behavior. The book attempts to utilize the various conceptual frameworks as they illuminate the phenomena rather than adhere strictly to framework throughout the text. The authors furthermore present the family as an institution continuously in the process of change. Solidly written and with a definite commitment to clearly present important concepts, this is a text to be seriously considered for college classes in family relationships and family sociology.

## THE FAMILY

Skolnick, Arlene, *The Intimate Environment*, Little, Brown and Company, 1973.

Using an interdisciplinary approach, the author examines marriage and the family, noting historical developments as well as major stress on contemporary insights. This text for basic college level courses covers a wide range of life styles. It explores the personal relationships of husbands and wives, parents and children, as they are influenced by their sociological, historical, and psychological environment. Teacher's Manual available.

Skolnick, Arlene and Jerome H. Skolnick, *Intimacy, Family and Society*, Little, Brown and Company, 1974, paper.

This reader is intended to complement the editors' previous volume *Family in Transition* and places greater emphasis on personal experience and interpersonal relations in the family. Traditional, deterministic roles of the family are re-examined in light of current thinking and research, and a variety of life styles are explored. The readings are interdisciplinary and each section as well as each article is preceded by an introduction.

Tavuchis, Nicholas and William J. Goode (eds.), *The Family Through Literature*, McGraw-Hill Book Co., 1975, 478 pp., paper, \$6.95.

The editors have chosen the selections in this book primarily for pleasure. Those who are offended by the idea of literature as sociology can ignore the sociological comments and simply enjoy the excerpts as works of artistic creation; those who prefer straight doses of sociology can view the readings as a profitable exercise.

Udry, Richard J., *The Social Context of Marriage*, Lippincott, 1974 (3rd ed.), 525 pp., paper.

Extensive revision of this exploration of the social-psychological aspects of courtship and marriage. New material on male/female roles, sexual behavior, and other areas.

Chester, Robert, "Is There a Relationship Between Childlessness and Marriage Breakdown?", *Journal of Biosocial Science*, October, 1972, 4:443-454.

The common belief that childlessness is positively associated with instability in marriage derives from official statistics using the conception of legal duration of the marriage. An alternative strategy of research is suggested.

As a result, families which vary from this norm have many unmet needs. The analysis indicates some of the problems nontraditional families have with current societal policies, legislation, and service organizations. Given are suggested changes which might support and enhance nontraditional as well as traditional family life.

Biographical information was gathered from drug users in Cheltenham and Southern Hampshire. Most were multi-drug users and the evidence suggests that the concept of the monodrug taker is misleading or generally inappropriate. Although the results support earlier evidence that most drug takers are from nonmanual family backgrounds, no support was found for the traditional point of view that drug takers are likely to come from broken homes. 17 references.

*Drugs Are Like That*, Junior League of Miami and the Community Television Foundation of South Florida (prod.), Benchmark Films, Inc. (dist.), 1973, 17 min.

(Grades 2-5) This film avoids the "strike fear into their hearts" authoritarian approach which usually results in children repressing the subject, or rebelling against an authority figure. The psychological reasons for drug abuse, its hazards and the difficulties of stopping are presented in six sequences. The film moves the young audience from their not-so-distant infantile past to their equally not-so-distant emerging adolescence, challenging them to reflect on a decision now about drug abuse which will prepare them for the actual decision later when first offered a marijuana joint.
