**ABSTRACT**

Since 1978, annual studies have been conducted of the flow of transfer students from the California community colleges to the University of California (UC) and the California State University (CSU) systems. The studies have focused on trends in the numbers of transfers and the ethnicity, majors, and age of transfer students. Findings from the study of fall 1985 transfers, contrasted with findings from previous years, indicated that: (1) fewer students transferred from the community colleges to the UC and CSU systems in fall 1985 than in fall 1984, with a 6.2% decrease in UC transfers and a 1.5% decrease in CSU transfers; (2) community college districts and campuses varied widely with respect to the number of students and the magnitude of the change in the number of students who transferred between fall 1984 and fall 1985; (3) Hispanic transfer students increased in both numbers and percents in both the UC and CSU systems, while fewer Black students transferred to either segment, continuing a 3-year decline in their numbers and percentages; and (4) the percentage of Asian and Filipino transfer students in both segments continued to increase, though the number of Filipino transfer students remained small. Two factors were seen as possible influences on the decrease in transfer rates: the relatively new practice on some university campuses to admit as transfer students only those applicants who have met all requirements for junior standing; and the large decrease in first-time community college freshmen 2 years earlier. # UPDATE OF COMMUNITY COLLEGE TRANSFER STUDENT STATISTICS

## University of California and the California State University

### Fall 1985

# CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

JC 860 402

---

## Summary

This is the Commission's latest annual report on transfer students from the California Community Colleges to the University of California and the California State University, the first of which was issued in 1978 with information dating back to 1965.

Pages 1-2 present highlights of the findings for Fall 1985. Pages 3-8 review trends in the number of transfer students since 1965. Pages 9 and 10 discuss trends in the ethnicity of transfer students. Two appendices present statistics on the number and ethnicity of transfer students by individual Community College.

In a forthcoming report on transfer, the Commission will present additional analyses of these trends, together with full-year transfer statistics for the University of California and Fall 1985 transfers to California's independent colleges and universities.

Additional copies of the report may be obtained from the Publications Office of the Commission. Further information about the report may be obtained from Suzanne Ness, the public information officer of the Commission, at (916) 322-0145.

# Highlights of the Findings

---

## Trends in numbers

Fewer students transferred from the Community Colleges to the University of California and the California State University in Fall 1985 than in Fall 1984. The decrease in transfers to the University was 6.2 percent or 326 students, to a total of 4,931--the smallest number since 1981. For the State University, the decrease in transfer students from Community Colleges was 1.5 percent or 452 students, to 29,682 -- the smallest number since 1970. The full-year number of students transferring to the State University also decreased between 1983-84 and 1984-85 by 0.5 percent or 250 students, to a total of 45,726. Thus the increases in both segments earlier in the 1980s are not continuing.

---

## Differences among university campuses

Within the statewide decrease in Community College transfers to the University of California, four campuses experienced significant change. The Davis and Berkeley campuses, with two of the four largest enrollments of transfer students, had significant decreases in new transfers, while the Los Angeles and Riverside campuses each had increases. Los Angeles thus became the campus enrolling the largest number of new transfers (933 in Fall 1982) while Riverside remained the smallest, with 252, in spite of its increase.

The statewide decrease for the State University between Fall 1984 and Fall 1985 is attributable to three large campuses -- San Diego State, which continued to enroll the largest number of new Community College transfers (3,103) in spite of a 12 percent decrease, and the California State Polytechnic campuses at Pomona and San Luis Obispo, with decreases of 22 and 9 percent, respectively. At the same time, two campuses enrolling small numbers of transfer students experienced increases in these enrollments: San Bernardino's grew 17 percent to 840, and Bakersfield's grew 13 percent to 395

## Differences among Community Colleges

Despite the overall downward trend, Community Colleges and districts varied greatly with respect to their gains and losses. In the Los Angeles Community College District, 13 percent fewer students transferred to the University of California in Fall 1985 than in Fall 1984, with most of the decrease occurring at UCLA -- despite UCLA's overall increase of 4 percent in Community College transfers from all sources. Its loss from the Los Angeles District's colleges was accompanied by a gain in transfers from Santa Monica College and El Camino College. Among the three Los Rios District colleges in Sacramento, decreases in numbers of students transferring to the University from American River and Cosumnes River Colleges were balanced by an increase from Sacramento City College. Similarly, in the Peralta District in Oakland, from which students tend to transfer to Berkeley, decreases from the College of Alameda and Merritt College were balanced by an increase from Laney College. Also in the Bay Area, both the City College of San Francisco and the College of Marin experienced decreases, while Santa Rosa Junior College had an increase larger than any since 1978.

Similar patterns of gains and losses occurred among State University campuses. The Los Angeles District colleges had 10 percent fewer transfers, with the largest decreases at its East, Harbor, Southwest, and West campuses -- all with large ethnic minority enrollments. Other Community Colleges with large ethnic minority enrollments that had decreases in State University transfers were Glendale, Ventura, and Laney and Merritt in the Peralta district. Most Community Colleges in the San Diego area also had fewer students transfer to the State University, with the decrease reflected primarily at San Diego State University. Palomar declined by 20 percent, San Diego City, by 24 percent; San Diego Mesa by 18 percent, and Grossmont, by 9 percent.

## **Ethnic differences**

Changes between Fall 1984 and Fall 1985 in numbers of students from ethnic minority groups who transferred to the University and the State University are small but appear to continue earlier trends. Hispanic transfer students increased in both

numbers and percents in both segments, while fewer Black students transferred to either segment -- continuing a three-year decline in their numbers and percentages. The percentage of Asian transfer students in both segments continued to increase, as did that of Filipino students, especially in the State University -- although the number of Filipino transfer students remains small.

---

# *Trends in Numbers of Transfers*

---

SINCE 1978, the Commission has published annual reports of the number and characteristics of Community College students who transfer to the University of California and the California State University (1978, 1979, 1981, 1982a, 1982b, 1983, 1984, and 1985). In 1982, it published these transfer student statistics separately and in advance of its college-going rates report for the first time. Information about transfer to independent California colleges and universities continues to be included in other Commission reports because it is not available in time for publication with University and State University data.

---

## **Overall transfer trends**

Numbers of Community College students who transferred to the University and the State University between 1965 and 1985 are shown in Display 1 on page 4, together with numbers of first-time freshmen enrolling in these two segments those same years. Numbers of transfer students from each Community College district are shown in Appendix A for Fall 1977, 1979, 1981, 1982, 1983, 1984, and 1985. Appendix B contains the number and ethnic distribution of transfer students from each Community College for Fall 1985, together with the ethnic distribution of first-time freshmen age 19 and under who enrolled in each Community College in Fall 1982.

In Fall 1985, the 4,931 Community College students who transferred to the University constituted a smaller group than in any year since 1970, with the exception of 1981, when 4,778 transferred. The decline between 1984 and 1985 was 6.2 percent -- a net decrease of 326 students. The 29,682 students who transferred to the State University in Fall 1985 was the smallest number since 1976 and represented a decline of 1.5 percent or 452 students between Fall 1984 and Fall 1985. While full-year enrollment statistics are not yet available for 1985-86, the number who transferred to the State University in 1984-85 was smaller than in 1983-84, thus ending

what appears to have been a brief recovery from a steady decline that began about ten years earlier

---

## **Transfers to the University of California**

Numbers of Community College students who transferred to the eight general campuses of the University between 1979 and 1985 are shown in Display 2 at the bottom of page 4. Five of the eight reported fewer new Community College transfer students in Fall 1985 than in 1984; one reported virtually no change; and two had increases. The latter are Los Angeles and Riverside, which this year enrolled the largest and the smallest number of such students, respectively. The Davis and Santa Barbara campuses had the largest proportional decreases (15 and 16 percent, respectively), while the Berkeley and Santa Cruz campuses had decreases of 9 and 8 percent, respectively; San Diego decreased 2 percent; and Irvine remained the same.

Thus, after a 3 percent gain between 1982 and 1983, and stability between 1983 and 1984, the number of Community College transfer students to the University has decreased statewide, with significant changes for four campuses. The Davis campus, with the fourth largest number of transfer students, experienced an increase of 30 percent between 1981 and 1984 but a decrease of 15 percent between 1984 and 1985

Los Angeles, which tied with Berkeley in 1984 for having the second largest number of transfer students, experienced a decrease of 10 percent between 1981 and 1984 but increased 4 percent between 1984 and 1985, while Berkeley decreased 9 percent. Riverside, with the smallest number of transfer students, experienced an increase again in 1985 to the number enrolled in 1979 and 1982.

Campus-level changes from year to year may be due both to changes in numbers of qualified applicants and to the need for redirection from impacted campuses and programs. Data are not available at this time to analyze factors contributing to such changes at the campus level. Campus policies to restrict

transfer admission to applicants who would enter with full junior standing -- in effect for Fall 1985 -- may also have resulted in some decreases

---

### University transfers from particular Community Colleges

While the total number of Community College students who transferred to the University between 1984 and 1985 decreased by about 325, the gains and losses from particular Community Colleges are of particular interest. As in earlier years, more than one-fifth of the Community Colleges transferred fewer than 10 students each to the University. One-third of these colleges are in multi-campus districts where other colleges have significantly larger numbers of University transfer students, but others are very small institutions that are a considerable distance from a University campus. There continue to be grounds for concern about the resources available to this group of Community Colleges for offering programs and services to prepare students to transfer to the University.

At the other end of the continuum, 15 Community Colleges sent more than 100 transfer students each to the University in Fall 1985, accounting for 47 percent of the total number. Of the nearly 70 colleges remaining, 49 sent at least ten but no more than 50, and 18 sent more than 50 but fewer than 100.

The colleges with the largest number of University transfer students in 1985 were Santa Monica with 274 and Santa Barbara with 245 -- the former with a 34 percent increase between 1984 and 1985. Some of the colleges with very small numbers of University transfer students in 1985 were San Jose City (5), Los Angeles Southwest (1), and Fresno (19) -- representing among them a wide range of size, ethnic composition of student body, and location in the State.

Although the statewide decrease in University transfers between 1984 and 1985 was 6 percent, the Los Angeles Community College District had a loss of 13 percent, most of it with respect to the Los Angeles campus of the University. Only West Los Angeles College had an increase (from 13 to 21), but its decrease in State University transfers more than offset its increase for the University.

The Los Rios Community College District in the Sacramento area had about the same number of

students transferring to the University both years, primarily to the Davis campus, with which it has developed exemplary articulation programs Sacramento City College, with a large ethnic minority enrollment, increased its transfers to the University by 34 percent, to 149. It has been the recipient of Ford Foundation grants to improve transfer opportunities that may have helped it reverse its decline in transfer students that began in 1981. In contrast, American River College had a decrease of 14 percent, to 148, apparently as part of a shift in its transfer student enrollment from the University to the State University -- primarily from Davis to Sacramento State University.

Other Community Colleges with a significant decrease in transfers to the University between Fall 1984 and 1985 include but are not limited to Cabrillo (15 percent), College of the Sequoias (45 percent), Marin (30 percent), Napa (48 percent), Palomar (24 percent), and Pasadena (21 percent). Among the few with significant increases are Laney (37 percent, but with decreases at Alameda and Merritt), Santa Monica (34 percent), and Santa Rosa (30 percent).

Other notable decreases from previous years include Fresno City College, with 19 transfers to the University last fall, compared to 34 in 1980; the multi-campus Kern District with 35, compared to 51 in 1977; and Merced College with 16, compared with a high of 25 in 1978.

---

### Transfers to the California State University

Display 3 on page 6 shows numbers of Community College students who transferred to each of the 19 State University campuses between Fall 1979 and Fall 1985. While the total number decreased for the last two years shown, the experience of these campuses varied widely.

The 1.5 percent statewide decrease of 452 students between Fall 1984 and Fall 1985 is attributable primarily to the 12 percent drop of 426 students at San Diego State University, which has consistently enrolled the largest number of Community College transfer students and which had a gain of 382 students, or 12 percent, between 1983 and 1984, followed by California Polytechnic University, Pomona and San Luis Obispo, with decreases of 22 and 9 percent, respectively, between 1984 and 1985. The campus at Dominguez Hills experienced a loss of 18 percent, following a loss of 12 percent between

<b>Total</b>	<b>30,428</b>	<b>30,490</b>	<b>30,026</b>	<b>29,824</b>	<b>30,274</b>	<b>30,134</b>	<b>29,682</b>

Source: California Postsecondary Education Commission.

1983 and 1984, but its decrease in numbers of transfer students was small.

In contrast, large percentage increases occurred at two State University campuses with relatively small enrollments -- San Bernardino, with a 17 percent increase, and Bakersfield, with 13 percent. The remaining 13 campuses had changes of 5 percent or less between 1984 and 1985 -- nine of them increases and four decreases.

Community College students tend to transfer to the nearest State University campus, and some State University campuses depend on their nearby Community Colleges for their transfer enrollments. For example, 87 percent of the Fresno City College students who transferred to the State University in Fall 1985 were enrolled at its Fresno campus. Similarly, 86 percent of the transfer students from Butte College enroll at California State University,

Chico, and 63 percent of the Community College transfer students to California State University, Bakersfield, are from Bakersfield College. A somewhat different picture is presented by Santa Rosa Junior College -- 40 percent of whose State University transfers enroll on the Sonoma campus and comprise 41 percent of all Community College transfers there. While a majority of the Community College transfer students continue their baccalaureate programs at a nearby State University campus, an important minority transfer from small Community Colleges in single-college districts to several State University campuses. Colleges with fewer than 100 transfer students each to the State University in Fall 1985 are Barstow, Compton, Gavilan, Lake Tahoe, Lassen, Mendocino, Mira Costa, Mt. San Jacinto, Palo Verdes, Victor Valley, West Hills, and Taft. Together, these 12 Community Colleges transferred 599 students to the State University in Fall 1985, or

2 percent of the total. These same 12 colleges transferred 63 students to the University in Fall 1985, or 1 percent of the total.

---

### **State University transfers from particular Community Colleges**

While the total number of students who transferred from Community Colleges to the State University decreased 1.5 percent between Fall 1984 and Fall 1985, larger gains and losses were experienced by particular colleges and districts. For example, the Los Angeles District had an overall decrease in State University transfers of 10 percent, but East Los Angeles College, Los Angeles Harbor, Los Angeles Southwest College, and West Los Angeles College experienced decreases in State University transfers that ranged from 17 to 33 percent. Like other Community Colleges that showed large percentage decreases in transfer students to the State University in Fall 1985, these Los Angeles District colleges enroll large numbers of Blacks and Hispanics. Others with similarly large decreases in State University transfers include Laney and Mer-

ritt Colleges in the Peralta District, Glendale College, and Ventura College.

Most Community Colleges in the San Diego area also had significantly fewer students transfer to the State University in Fall 1985 than in Fall 1984, with the change related primarily to the decrease in transfers to San Diego State University. The San Diego colleges with such losses include Palomar (20 percent), San Diego City (24 percent), San Diego Mesa (18 percent), Southwestern (17 percent), and Grossmont (9 percent).

Cuesta College in San Luis Obispo had 22 percent fewer students transfer to the State University in Fall 1985 -- a loss associated with the smaller number enrolled at the San Luis Obispo campus.

Gains at several Community Colleges in different parts of the State appear to be the result both of more students transferring to their closest State University campus and, at the same time, of more leaving their home community to transfer to campuses in other parts of the State. For example, 56 of the 65 additional students transferring from Butte College attended the State University at Chico while the remainder chose campuses to which Butte students did not usually transfer in the past.

# Ethnicity of Transfer Students

ETHNIC distributions for students who transferred from Community Colleges to the University and the State University in Fall 1980 through Fall 1985 are shown in Display 4 below. Distributions for individual Community Colleges for Fall 1985 are given in Appendix B.

## University of California

Hispanic transfer students continued to increase in terms of both numbers and proportions in Fall 1985. Their 7 percent gain of 492 transfer students between 1984 and 1985 continued a five-year increase dating back to 1980. Black transfer students were

fewer in number, but their proportion remained the same, while Asian students represented a slightly higher proportion but no greater number. Of the two smallest ethnic minority groups, American Indian students transferred in equal numbers both years, while the number of Filipino students increased by three to 75.

Two other decreases should be noted and are not taken into account in computing the ethnic distributions appearing in Display 4. They are the category of "other," that decreased 20 percent to 90 transfer students, and "non-resident alien," that decreased 9 percent to 179. The largest decrease in transfers to the University was found for white students -- 274 students or almost 8 percent, with a corresponding

**DISPLAY 4** *Ethnic Distribution of Community College Transfer Students to the University of California and the California State University, Fall 1980-Fall 1985, in Percents\**

Transfer to	Year	N*	Ethnicity						Percent Unknown
			American Indian	Asian	Filipino	Black	Chicano	White	
UC	1980	5,356	1.1%	9.6%	1.1%	3.7%	7.4%	77.1%	10.0%
	1981	4,778	1.0	10.2	1.2	4.0	8.1	75.5	9.9
	1982	5,137	0.7	11.1	1.3	3.8	8.3	74.8	3.6
	1983	5,305	0.9	12.0	1.0	4.2	8.9	73.0	3.3
	1984	5,257	0.9	12.2	1.5	3.3	9.6	72.5	3.0
	1985	4,931	0.9	12.6	1.7	3.3	10.8	70.7	2.4
CSU	1980	30,527	1.5	6.1	1.2	6.1	10.0	75.1	37.2
	1981	30,026	5.6	7.1	1.3	6.4	8.4	71.2	16.3
	1982	29,824	1.4	8.5	1.4	5.9	9.1	73.7	5.6
	1983	30,274	0.9	9.3	1.5	6.6	9.7	72.0	6.2
	1984	30,134	1.1	9.5	1.6	6.4	9.7	71.7	4.6
	1985	29,682	1.4	9.9	1.9	5.8	10.0	71.0	4.4

\* N includes nonresident aliens, "other" ethnicity, and nonrespondents, all of whom were excluded from the N on which the computation of percentages for the various ethnic groups was based. Therefore, Ns for specific ethnic groups which might be computed from the data in this table would likely be larger than those actually reported.

Source: California Postsecondary Education Commission.

decrease in the proportion from 72.5 to 70.7 between Fall 1984 and 1985

Changes in numbers and proportions of men and women between Fall 1984 and 1985 are not equal for certain ethnic groups. For Hispanic students, the increase occurred primarily among women, to the point where the number of men and women are almost the same. For Black students, where the number of men and women were about equal in Fall 1984, a decrease in the number of men in Fall 1985 has changed the proportions of men and women to 45/55. Finally, the decrease in the number of male white students was 177, compared with 98 for white women. Thus, while males continue to be the slightly larger proportion in the white transfer student groups (50.2 percent), their majority in Fall 1985 was only 11 students.

---

### The California State University

Year-to-year comparisons of the ethnic composition of the Community College students who transfer to the State University must be interpreted cautiously because of the relatively large but decreasing percentage of students whose ethnicity is not known. Thus, increases in numbers may be attributable simply to a larger number of students each year whose ethnicity is known. In Fall 1980, ethnicity was unknown for 37.2 percent of the new transfer students to the State University, compared with 4.4 percent in Fall 1985. However, the latter figure includes 12 percent of the new transfer students on the Los Angeles and San Francisco campuses, both of which enroll large numbers of ethnic minority students. Thus, ethnic minority students are probably still undercounted in Fall 1985, since campuses with the highest percentages of students whose

ethnicity is unknown also tend to have high minority enrollments

The ethnicity of a relatively large but decreasing percentage of transfer students at the California State University is unknown, but the data in Display 4 suggest that the increased percentages of Asian and Filipino students in the 1985 transfer group continued a six-year trend. Hispanic students represented the same proportion in Fall 1985 as in Fall 1980, with smaller proportions in the intervening years. Looking at numbers, rather than percentages, the 1985 transfer group included 44 more Asian, 23 more Hispanic, 196 fewer Black, and 548 fewer white students than in 1984.

Sex differences in each ethnic group are worthy of note. The net gain of 23 Hispanic transfer students in Fall 1985 represents 55 fewer men and 78 more women than in 1984. Thus, while men comprised 53 percent of the Hispanic transfer students in 1984, their proportion decreased to 50 percent in 1985. Among the Black students, 74 fewer men and 122 fewer women transferred in Fall 1985 than in Fall 1984, but women continued to be the larger proportion (52 percent of its group).

East Los Angeles College, Los Angeles Harbor, Los Angeles Southwest College, and West Los Angeles experienced decreases in State University transfers that range from 17 to 33 percent. Like other Community Colleges that showed large percentage decreases in transfer students to the State University in Fall 1985, these Los Angeles District colleges enroll large numbers of Black and Hispanic students. Others with similarly large decreases in State University transfers include Laney and Merritt Colleges in the Peralta District, Glendale College, and Ventura College.

---

## Concluding Comments

---

FALL 1985 brought a downturn in the number of Community College students who transferred to the University and the State University that was not wholly unexpected. The decrease was larger for the University than for the State University in terms of percentage changes but not numbers

Two factors may have contributed to the decrease:

- The first is the relatively new practice on some University campuses to admit as transfer students only those applicants who have met all requirements for junior standing. This practice was put into effect to alleviate as much as possible the problem of certain impacted majors and campuses. Thus some qualified students who may have transferred as sophomores in the past are now required to complete two full years of baccalaureate degree work before transfer.
- A second explanation is the large decrease in first-time freshmen in the Community Colleges two years earlier, particularly among recent high school graduates enrolling full time, who are the major sources of transfer students. Many Community College students need more than two years to prepare for transfer -- particularly those who would not have been eligible for University admission on the basis of their high school record -- but the long-term effect of lower Community College enrollments on transfer may have been felt for the first time in Fall 1985.

While the largest decrease in transfer was among white students, in terms of both numbers and proportions, the decline among Blacks, particularly in the State University, is particularly disappointing because of special efforts being made to improve

transfer opportunities for such students. At both the freshman and transfer levels in the Community Colleges, Black student losses were greater among men than women. Hispanic students are the "under-represented" minority group that has been making gains in numbers of transfer students at a time of overall losses. The gains are largely for women, whose numbers are now almost equal to men.

The proportion of Asian students among transfer students continued to increase in Fall 1985 but their number did not increase. In fact, 11 fewer transferred to the University in Fall 1985 than in Fall 1984.

Special efforts have been made by some urban Community Colleges to improve transfer opportunities since 1983, several of these with foundation grants for this purpose. While the success of these programs cannot be measured solely in increased numbers of transfer students, a few such programs are located at colleges which showed increases in transfer students at a time of statewide decline. Among those colleges from which transfers to the University increased (often, however, with a decrease to the State University) are Laney, Sacramento City, San Diego City, and Compton. Other colleges in the districts in which Laney and Sacramento City are located had fewer students transfer to the University in Fall 1985 than in Fall 1984.

The Commission is now collecting current information about numbers of Community College students transferring to independent California college and universities. Findings will be published separately as soon as they are complete. However, data from previous years indicate that this segment is providing transfer opportunities for a large number of Community College students.

# APPENDIX A

## Flow of Transfer Students from California Community College Districts and Colleges to the University of California and the California State University, Fall 1977 Through Fall 1984

District, College, and Year	Number of Transfers to:	
	UC	CSU
<b>ALLAN HANCOCK JOINT COMMUNITY COLLEGE DISTRICT</b>		
Allan Hancock College		
1979	40	209

\* Fall 1983 data since information was not available for Fall 1982.

Note: "Total N" includes the categories of "nonresident aliens," "nonrespondents," and "other" ethnic groups. "Percent Unknown Ethnicity" is the percent of "Total N" who did not respond to the race/ethnicity question. The percentages of the six ethnic groups are calculated on a base number which does not include "No Response," "Nonresident Alien," or "Other." If "Total N" is smaller than 50, only the percentage of white students is shown.

Community College	Group	Total	Ethnicity						Percent Unknown Ethnicity
			American Indian	Asian	Filipino	Black	Hispanic	White

\* Fall 1983 data since information was not available for Fall 1982.

Note: "Total N" includes the categories of "nonresident aliens," "nonrespondents," and "other" ethnic groups. "Percent Unknown Ethnicity" is the percent of "Total N" who did not respond to the race/ethnicity question. The percentages of the six ethnic groups are calculated on a base number which does not include "No Response," "Nonresident Alien," or "Other." If "Total N" is smaller than 50, only the percentage of white students is shown.

# CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

---

THE California Postsecondary Education Commission is a citizen board established in 1974 by the Legislature and Governor to coordinate the efforts of California's colleges and universities and to provide independent, non-partisan policy analysis and recommendations to the Governor and Legislature.

## Members of the Commission

The Commission consists of 15 members. Nine represent the general public, with three each appointed for six-year terms by the Governor, the Senate Rules Committee, and the Speaker of the Assembly. The other six represent the major segments of postsecondary education in California.

As of 1986, the Commissioners representing the general public are:

Seth P. Brunner, Sacramento, *Chairperson*  
C. Thomas Dean, Long Beach  
Seymour M. Farber, M.D., San Francisco  
Patricia Gandara, Sacramento  
Ralph J. Kaplan, Los Angeles  
Roger C. Pettitt, Los Angeles  
Sharon N. Skog, Mountain View  
Thomas E. Stang, Los Angeles, *Vice Chairperson*  
Stephen P. Teale, M.D., Modesto

Representatives of the segments are:

Sheldon W. Andelson, Los Angeles; representing the Regents of the University of California

Claudia H. Hampton, Los Angeles; representing the Trustees of the California State University

Beverly Benedict Thomas, Los Angeles; representing the Board of Governors of the California Community Colleges

Jean M. Leonard, San Mateo; representing California's independent colleges and universities

Willa Dean Lyon, Newport Beach; representing the Chairman of the Council for Private Postsecondary Educational Institutions

Angie Papadakis, Palos Verdes; representing the California State Board of Education

## Functions of the Commission

The Commission is charged by the Legislature and Governor to "assure the effective utilization of public postsecondary education resources, thereby eliminating waste and unnecessary duplication, and to promote diversity, innovation, and responsiveness to student and societal needs."

To this end, the Commission conducts independent reviews of matters affecting the 2,600 institutions of postsecondary education in California, including Community Colleges, four-year colleges, universities, and professional and occupational schools.

As an advisory planning and coordinating body, the Commission does not administer or govern any institutions, nor does it approve, authorize, or accredit any of them. Instead, it cooperates with other state agencies and non-governmental groups that perform these functions, while operating as an independent board with its own staff and its own specific duties of evaluation, coordination, and planning,

## Operation of the Commission

The Commission holds regular meetings throughout the year at which it debates and takes action on staff studies and takes positions on proposed legislation affecting education beyond the high school in California. By law, the Commission's meetings are open to the public. Requests to address the Commission may be made by writing the Commission in advance or by submitting a request prior to the start of a meeting.

The Commission's day-to-day work is carried out by its staff in Sacramento, under the guidance of its director, who is appointed by the Commission. On July 1, 1986, William H. Pickens assumes the directorship from Patrick M. Callan.

The Commission issues some 30 to 40 reports each year on major issues confronting California postsecondary education. Recent reports are listed on the back cover.

Further information about the Commission, its meetings, its staff, and its publications may be obtained from the Commission offices at 1020 Twelfth Street, Third Floor, Sacramento, CA 98514; telephone (916) 445-7933.
