## ABSTRACT

### **Physiological and Psychological effect of colors in the therapeutic buildings, Case Study, "Al-Shifa Hospital in Gaza Strip"**

The study aims to identify the colors that were used in the architecture of Al-Shifa Hospital, and whether they were utilized in line with the psychological health and comfort of individuals and users of architectural spaces of the complex.

Finally, data collection and analysis derived from field studies will be used to come up with proposals and recommendations to achieve a

---

...

greater understanding of colors and how to employ them appropriately in architectural spaces.

The main research problem of this study is the following: "Is the employment of the colors in the internal spaces of buildings at Al-Shifa Hospital, taking into account the psychological and physiological circumstances of the users, and achieving easy perception of those spaces?". As the research hypothesis based on the negative answer to the previous question.

The research follows descriptive and analytical methods have been utilized through the description and analysis of the colors of some selected buildings in Al-Shifa Hospital. Furthermore, the search adopted field interviews of a group of specialists and users of those architectural spaces with different functions to find out the role of psychological and physiological effects of colors on it.
