## The Additions of the Reliable Trustworthy Narrators into the Prophetic Sayings' Texts and Their Impact on the Juridical Difference of Opinions

*Seri Zaid Al-Kilani\**

### ABSTRACT

Some of the prophetic narrations upon which jurists depend to derive legal/ juridical rules have contained additional sentences or words that do not exist in other narrations in the same subject.

The existence of these additions have sometimes led to conclude different legal opinions by jurists, therefore tackling this issue is of high importance.

This research aims basically to clarify the meaning, definition, cases and attitudes of Muslim scholars towards these additions. Furthermore, this research highlights the impact of these additions on creating different legal opinions, with some practical realistic examples and applications from Islamic Jurisprudence.
